Quartile rankings are determined by Morningstar Research Inc., an independent research firm, based on categories maintained by the Canadian Investment Funds Standards Committee (CIFSC). Quartile rankings are comparisons of the performance of a fund to all other funds in a particular category. The quartiles divide the data into four equal segments expressed in terms of rank (1, 2, 3 or 4). Morningstar quartile rankings show how well a fund has performed compared to all other funds in its peer group. Each fund within a peer group is ranked based on its performance, and these rankings are broken into quarters or quartiles. Within a group, the top 25% (or quarter) of the funds are in the first quartile, the next 25% are in the second quartile, the next group in the third quartile, and the bottom 25% of funds with the poorest relative performance are in the fourth quartile.

The ratings are subject to change every month. The ratings are calculated for funds
