

Global Environment Fund

'A' shares, EUR As at end December 2022

Objectives and investment policy summary

The Fund aims to achieve total returns comprised of capital growth and income over at least 5-year periods, before allowing for fees. The Fund's environmental objective is to make sustainable investments that aim to contribute to positive environmental impact.

Past performance should not be taken as a guide to the future and there is no guarantee that this investment will make profits; losses may be made. If the currency of this share class differs from your domestic currency, your returns may increase or decrease as a result of currency fluctuations.

Performance data source: © Morningstar, dates to 31.12.22, NAV based, (net of fees, excluding initial charges), total return, in Euro. The Fund is actively managed, any index shown is for illustrative purposes only. Performance would be lower had initial charges been included as an initial charge of up to 5% may be applied to your investment. This means that for an investment of €1,000, €950 would actually be invested in the Fund.

All measurements in Tonnes CO2e per \$mm invested by the fund

Carbon avoided is the strategy's measure of carbon impact from its portfolio companies. We set out the aggregated carbon avoided for the portfolio alongside aggregated emissions, but believe it is important to look at this data company by company which is provided in our annual impact report (www.ninetyone.com).

Please note that avoided emissions refers to a metric that compares actual emissions against a hypothetical reference scenario.

While this is a helpful metric to assess the impact of specific interventions and monitor positive contributions, we believe that tracking and reducing overall emissions needs to be the cornerstone of any approach to addressing climate change.

Reporting carbon data is still at an early stage with considerable variation in estimates and disclosure across companies. Double counting is inherent in all aggregate carbon data. We believe in engaging with companies to improve carbon reporting and disclosure.

[§]This Fund is classified under Article 9 of the EU Sustainable Finance Disclosure Regulation. Article 9 applies to products which, alongside their financial investment objectives, have specific investment objectives to invest sustainably. For further information, please see www.ninetyone.com/SFDR-explained

[¶]Funds that seek out investments based on their positive impact on one or more sustainable theme. For further information, please see www.ninetyone.com/ESG-explained

The MSCI AC World Net Return Index is used for performance comparison. The Fund does not seek to replicate the index. It will generally hold assets that are components of the index, but not in the same proportions, and it is allowed to hold assets which are not components of the index. The assets of the Fund therefore may be very different from the index.

The portfolio may change significantly over a short period of time. This is not a buy or sell recommendation for any particular security. Figures may not always sum to 100 due to rounding.

The yield information has been calculated as at 31.12.22. Where FTSE data is shown, source: FTSE International Limited ("FTSE") © FTSE 2022. Please note a disclaimer applies to FTSE data and can be found at https://research.ftserussell.com/products/downloads/FTSE_Wholly_Owned_Non-Partner.pdf. Where MSCI data is shown, source: MSCI. MSCI makes no express or implied warranties or representations and shall have no liability whatsoever with respect to any MSCI data contained herein. The MSCI data may not be further redistributed or used as a basis for other indices or any securities or financial products. This report is not approved, endorsed, reviewed or produced by MSCI. None of the MSCI data is intended to constitute investment advice or a recommendation to make (or refrain from making) any kind of investment decision and may not be relied on as such. All other information is from Ninety One at 31.12.22.

General risks

The value of these investments, and any income generated from them, will be affected by changes in interest rates, general market conditions and other political, social and economic developments, as well as by specific matters relating to the assets in which they invest. Past performance does not predict future returns; losses may be made. Ongoing costs and charges will impact returns. The Fund's objectives will not necessarily be achieved and there is no guarantee that these investments will make profits; losses may be made. Environmental, social or governance related risk events or factors, if they occur, could cause a negative impact on the value of investments. This Fund may not be appropriate for investors who plan to withdraw their money within the short to medium term.

Specific fund risks

Commodity-related investment: Commodity prices can be extremely volatile and losses may be made.

Concentrated portfolio: The portfolio invests in a relatively small number of individual holdings. This may mean wider fluctuations in value than more broadly invested portfolios.

Currency exchange: Changes in the relative values of different currencies may adversely affect the value of investments and any related income.

Derivatives: The use of derivatives is not intended to increase the overall level of risk. However, the use of derivatives may still lead to large changes in value and includes the potential for large financial loss. A counterparty to a derivative transaction may fail to meet its obligations which may also lead to a financial loss.

Emerging market (inc. China): These markets carry a higher risk of financial loss than more developed markets as they may have less developed legal, political, economic or other systems.

Equity investment: The value of equities (e.g. shares) and equity-related investments may vary according to company profits and future prospects as well as more general market factors. In the event of a company default (e.g. insolvency), the owners of their equity rank last in terms of any financial payment from that company.

Sustainable Strategies: Sustainable, impact or other sustainability-focused portfolios consider specific factors related to their strategies in assessing and selecting investments. As a result, they will exclude certain industries and companies that do not meet their criteria. This may result in their portfolios being substantially different from broader benchmarks or investment universes, which could in turn result in relative investment performance deviating significantly from the performance of the broader market.

Important information

All data as at 31.12.22. The most up to date fund details (e.g. name, overview, key facts etc) are reflected as at the date of publication. Any changes effective after publication will appear in the next update. This is a marketing communication. It is not to be distributed to retail customers who are resident in countries where the Fund is not registered for sale or in any other circumstances where its distribution is not authorised or is unlawful. Please visit www.ninetyone.com/registrations to check registration by country.

For further information on our sustainability-related funds, please visit www.ninetyone.com

A rating is not a recommendation to buy, sell or hold a fund.

The Fund is a sub-fund of the Ninety One Global Strategy Fund, which is a UCITS authorised by the CSSF and organised as a Société d'Investissement à Capital Variable under the law of Luxembourg. Ninety One Luxembourg S.A. (registered in Luxembourg No. B 162485 and regulated by the Commission de Surveillance du Secteur Financier) is the Manager of the Fund. This communication is not an invitation to make an investment nor does it constitute an offer for sale. Please refer to the Prospectus of the UCITS and to the Key Information Documents (KID) or Key Investor Information Documents (KIID), where relevant, before making any final investment decisions.

Fund prices and English language copies of the Prospectus, annual and semi-annual Report & Accounts, Articles of Incorporation and where relevant, local language copies of the KID and KIID may be obtained from www.ninetyone.com. A summary of investor rights can be found in the Prospectus, and details of Ninety One's complaints handling procedures are available in English on www.ninetyone.com/complaints. Ninety One Luxembourg reserves the right to discontinue the marketing of its Funds in countries where they are registered.

In Switzerland, this information is available free of charge from the Swiss Representative and Paying Agent, RBC Investor Services Bank S.A., Esch-sur-Alzette, Blicherweg 7, CH-8027 Zurich, Switzerland. In Spain, the Ninety One Global Strategy Fund is registered with the Comisión Nacional de Mercados y Valores as a foreign collective investment scheme marketed in Spain, with the number 734.

In the US, this material may be distributed only to a person who is a "distributor," or who is not a "U.S. person," as defined by Regulation S under the U.S. Securities Act of 1933 (as amended). No shares may be offered or sold in the US to any US person. The fund has not been registered under the United States Investment Company Act of 1940, as amended, nor the United States Securities Act of 1933, as amended (1933 Act).

In Australia, this communication is provided for general information only to wholesale clients (as defined in the Corporations Act 2001).

Glossary summary

Alpha: Jensen's alpha is a risk adjusted measure of a fund's performance relative to its performance comparison benchmark.

Beta: A measure of the volatility of a fund relative to its performance comparison index, i.e. how sensitive the fund is to movements in the market. A figure greater than 1 indicates that the fund will tend to outperform in a rising market and underperform in a falling one, i.e. is more volatile than the market. The reverse applies to a Beta of less than 1.

Credit rating: A score awarded by an independent rating agency to indicate the financial strength of the issuer of a bond, and the potential for a default on interest and principal payments. The top credit rating is 'AAA'. The lowest rating to be considered 'investment grade' is 'BBB'. Below 'BBB', bonds are termed 'sub investment grade' or 'high yield'.

Average credit ratings are based on the individual bond ratings issued by the ratings agencies. For each bond, the ratings issued by each agency are combined to form a single rating based on the methodology that most closely matches the performance comparison index (PCI), otherwise median is typically used where there is no PCI. The portfolio rating is the weighted average of the above bond ratings.

Distribution types

Accumulation (Acc): An accumulation share will not make income payments to shareholders but will instead accrue the income daily in the net asset value of the share class.

Income (Inc): An income share will distribute all or part of the income accruing in that share class.

Income-2 (Inc-2): These distribute the income accruing in the share class and charge all their expenses to capital. This maximises the income available for distribution – although it also reduces capital by an equivalent extent which could constrain future capital and income growth. This can be inefficient from a tax perspective in those countries where income tax rates are higher than those on capital gains.

Income-3 (Inc-3): These share classes are similar to Inc-2 share classes in that they charge all their expenses to capital in order to maximise the amount of distributable income. Additionally, Inc-3 share classes aim to provide a consistent distribution rate which is based on the investment manager's expectation of the long term underlying yield. To achieve this they may make distributions from capital or carry over excess income from one calendar year to the next. As the income rate is based on a forecast, there is a risk that future income generated by the fund is overestimated leading to distributions being taken from capital which could also constrain future capital and income growth.

Duration: This is a measure of risk for funds which invest in bonds as it predicts the sensitivity of the value of a fund's portfolio given changes in interest rates. The higher the value the greater the volatility of the fund's performance resulting from changes to interest rates. The Modified duration is shown.

GSF: Ninety One Global Strategy Fund.

Information ratio: A measure of a portfolio manager's skill against a performance comparison index. The over or underperformance of the fund relative to its performance comparison index is divided by the tracking error. In this way, we arrive at the value, per unit of extra risk assumed, that the manager's decisions have added to what the market would have delivered anyway. The higher the Information Ratio the better.

KIID SRRI: The Synthetic Risk Reward Indicator (SRRI) which appears in the Key Investor Information Document (KIID). A number on a scale of 1 to 7 based on how much the value of a fund has fluctuated over the past 5 years (or an estimate if the fund has a shorter track record). A rating of 1 represents the lower end of the risk scale with potentially lower rewards available whilst a rating of 7 reflects higher risk but potentially higher rewards.

Maturity profile: The average life of each bond in a fund's portfolio, weighted by value.

Morningstar 'star' ratings: The overall rating for a fund, often called the 'star rating', is a third party rating derived from a quantitative methodology that rates funds based on an enhanced Morningstar™ Risk-Adjusted Return measure. 'Star ratings' run from 1 star (lowest) to 5 stars (highest) and are reviewed at the end of every calendar month. The various funds are ranked by their Morningstar™ Risk-Adjusted Return scores and relevant stars are assigned. It is important to note that individual shareclasses of each fund are evaluated separately and their ratings may differ depending on the launch date, fees and expenses relevant to the share class. In order to achieve a rating the share class of a fund must have a minimum three-year performance track record.

Ongoing charge: This figure includes the annual management fee and administrative costs but excludes any performance fee or portfolio transaction costs (except in the case of an entry or exit charge paid by a fund when buying or selling units in another fund). Ongoing charges may vary from year to year.

NAV: The Net Asset Value (NAV) represents the value of the assets of a fund less its liabilities.

Sector: A peer group of funds managed to a similar investment policy. Not every fund will have a relevant sector, but for those that do, a full list of the funds included in the sector can be obtained from us on request.

Tracking error: A measure of how much a fund's returns deviate from those of its performance comparison index. The lower the number the closer the fund's historic performance has followed that of its performance comparison index.

Volatility: The amount by which the performance of a fund fluctuates over a given period.

YTD: Year to date.

Yields

Yield: The Yield reflects distributions declared over the past 12 months as a percentage of the mid-market share price, as at the date shown. Yields do not include any preliminary charge and investors may be subject to tax on their distributions.
