

Non-UCITS Retail Scheme Key investor information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

M G T S

MGTS Future Money Income Fund R Inc (GB00B5MFQ093)

The Sub-fund is managed by Margetts Fund Management Limited.

Objective and Investment Policy

Investment Objective

The Sub-fund is intended to provide increasing income (measured by annual monetary gross distributions per share per annum) and a total return after fees of at least the rate of inflation, measured by the UK Consumer Price Index (CPI), plus 1% (per annum) over any five-year period. For these purposes, total return means the amount of capital and income an investor earns.

How will the objective be achieved?

A minimum of 70% of the portfolio will be invested in collective investment schemes which provide exposure to a range of economic sectors and geographic areas, across a wide range of assets (for example shares, bonds, cash and property). The Sub-fund may also invest directly (maximum of 30%) in shares, bonds, cash, near cash instruments, investment trusts, real estate investment trusts (REITs) and structured products which may embed derivatives.

Overall exposure to shares will be a maximum of 60%, with the average exposure close to this limit. Bonds will have a minimum exposure of 30% and maximum exposure of 70%.

Exposure to cash may vary depending upon prevailing circumstances and although it would normally not exceed 10% of the total value of the Fund, it may be up to 50% when the Manager considers stock markets around the world to be overpriced or that a period of instability exists.

Management Style

The Sub-fund is actively managed, meaning that the manager selects investments, rather than tracking a stock exchange or index.

Derivative Use

The use of derivatives and/or hedging transactions are permitted in connection with the efficient portfolio management (EPM - managing the Sub-fund in a way that is designed to reduce risk or cost and/or generate extra income or growth or both).

Performance Comparison

The Sub-fund has a performance target of UK CPI as detailed in the objective above. The Sub-fund is designed to protect or grow the real value of investments over the long-term, which means that the growth should be at least equal to the rate of inflation. Performance may differ significantly in profile to the rate of inflation and therefore it is not expected that the target benchmark will be an appropriate direct comparison over periods shorter than the objectives timeframe.

The IA (Investment Association) Mixed Investment 20-60% Shares Sector is used as a comparator. This is considered appropriate for investors to use when comparing performance as the strategy results in the Sub-fund meeting the definition of this sector.

General

Shares in the Sub-fund can be bought and sold daily (every Business Day of the Sub-fund). If you invest in income shares, income from investments in the Sub-fund will be paid out to you. If you invest in accumulation shares, income will be retained in the value of your shares.

Recommendation: this Sub-fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and Reward Profile

The risk and reward score is not guaranteed and may change over time. The lowest category does not mean risk free.

The Sub-fund is in this category due to the nature of its investments and previous levels of volatility (how much the value of the Sub-fund rises and falls). The risk and reward score is based on past performance and calculated in accordance with European legislation. It may not be a reliable indication of the future risk profile.

The following risk factors are relevant to the overall risk profile of the Sub-fund. A full description of risk warnings is provided in the prospectus, which is available on our website, or by requesting a copy.

Exposure to currencies other than the base currency is subject to currency fluctuations which could add to the rise and fall in value of investments.

Exposure to various asset classes may include some assets that are considered to carry more risk. This means that the rise and fall in value could be greater than for lower risk investments, or that they may take longer to sell. In addition, the way in which these assets interact with each other may change through time causing higher or lower fluctuations of value.

Investments in collective investment schemes may provide a higher level of diversification but may also increase costs. The underlying collective investment schemes may also experience operational or credit issues which could impact liquidity (the ability to sell) or capital value.

There may be a significant exposure to cash or money markets. If investment markets generally rose during this period, against expectation, then returns would be reduced.

The objective, policy and strategy set out above should align with the objectives of the investors and their minimum timeframe for investment.

Charges

The charges you pay are used to pay the costs of running the Sub-fund, including the costs of marketing and distribution. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	0.00%
Exit Charge	0.00%

Charges taken from the Sub-fund over a year	
Ongoing Charges	1.52%
Performance Fee	0.00%

The entry and exit charges shown are the maximum figures. In some cases you might pay less – you can find this out from your financial adviser.

The ongoing charges figure is based on the last year's expenses (or reasonable estimate where Sub-fund has not been operating for a full calendar year), for the year to 31 Jul 2023 and this figure may vary, year to year. It excludes portfolio transaction costs.

For further details on the calculation of the charges please refer to the Sub-fund's prospectus.

Past Performance

Past performance is not a reliable guide to future performance.

The past performance shown here takes account of all charges and costs except entry and exit charges and it is inclusive of net reinvested income.

The Sub-fund was launched on 08 Dec 2008.

The share class was launched on 03 Dec 2012.

The performance is calculated in pounds sterling.

Practical Information

The Depositary is The Bank of New York Mellon (International) Limited.

The Prospectus and latest annual and semi-annual reports, in English, along with the most recent prices, literature and further Sub-fund information is available on-line at www.mgtsfunds.com.
