### What is the product?

This is a fund constituted in the form of a mutual fund. It is domiciled in Luxembourg and its home regulator is Commission de Surveillance du Secteur Financier ("CSSF").

### Investment Objectives

To achieve long-term total return by investing at least two-thirds of the Fund's assets in equities and equity-related securities of:

- 1) companies with their registered office in a Latin American country; and/or
- 2) companies which have the preponderance of their business activities in a Latin American country; and/or
- 3) holding companies that have the preponderance of their assets in companies with their registered office in a Latin American country.

### Strategy

The Fund may use derivatives for the purpose for hedging but will not use financial derivative instruments for investment purposes.

The Fund is actively managed. The Fund aims to outperform the MSCI EM Latin America 10/40 Net Total Return Index (USD) benchmark before charges. The benchmark is also used as a reference point for portfolio construction and as a basis for setting risk constraints.

In order to achieve its objective, the Fund will take positions whose weightings diverge from the benchmark or invest in securities which are not included in the benchmark. The investments of the Fund may deviate significantly from the components of and their respective weightings in the benchmark. Due to the active nature of the management process, the Fund's performance profile may deviate significantly from that of the benchmark over the longer term.

### Use of derivatives/investment in derivatives

The Fund's net derivative exposure may be up to 50% of the Fund's net asset value.

## What are the key risks?

Investment involves risks. Please refer to the offering document of Aberdeen Standard SICAV I for details including the risk factors.

### 1. Equity risk

- The value of the Fund that invests in equity and equity-related securities will be affected by economic, political, market, and issuer specific changes. Such changes may adversely affect securities, regardless of company specific performance.

### 2. Risk of investing in specific regional market

- The Fund invests in a specific regional market (i.e. Latin America) and is likely to be more volatile than a more widely invested fund.

### 3. Risk of using financial derivative instruments

- Risks associated with financial derivative instruments include counterparty/credit risk, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk. The leverage element/component of a financial derivative instrument can result in a loss significantly greater than the amount invested in the financial derivative instrument by the Fund. Exposure to financial derivative instrument may lead to a high risk of significant loss by the Fund.

### 4. Emerging markets risk

- The Fund invests in equities and equity-related securities in Latin America, thereby providing exposure to emerging markets which tend to be more volatile than mature markets and its value could move sharply up or down. In some circumstances, the underlying investments may become less liquid which may constrain the Investment Manager's ability to realise some or all of the portfolio. The registration and settlement arrangements in emerging markets may be less developed than in more mature markets so the operational risks of investing are higher. Political risks and adverse economic circumstances are more likely to arise, putting the value of your investment at risk.

### 5. Exchange rates risk

- The Fund may invest in securities denominated in a number of different currencies other than the base currency in which the Fund is denominated. Changes in foreign currency exchange rates may adversely affect the value of the Fund's investments and the income thereon.

### 6. Risk of Foreign Account Tax Compliance Act ("FATCA")

- The Fund will attempt to satisfy any obligations imposed on it to avoid the imposition of FATCA withholding tax. However, no assurance can be given that the Fund will be able to satisfy these obligations. If the Fund becomes subject to a withholding tax as a result of the FATCA regime, the value of the shares held by the shareholders may suffer material losses.

### 7. General risk

- The value of shares and the income from them can go down as well as up and you may not get back the amount invested.

## How has the fund performed?

% Returns

- Past performance information is not indicative of future performance. Investors may not get back the full amount invested.
- The computation basis of the performance is based on the calendar year-end, NAV-to-NAV, with dividend reinvested.
- These figures show by how much the Class A Acc USD increased or decreased in value during the calendar year being shown. Performance data has been calculated in USD including ongoing charges and excluding subscription fee and redemption fee you might have to pay (if any).
- Where no past performance is shown there was insufficient data available in that year to provide performance.
- The Investment Manager views Class A Acc USD being the most appropriate representative share class as this share class is opened for investment by Hong Kong retail investors and broadly indicative of the Fund's performance characteristics.
- The benchmark is MSCI EM Latin America 10/40 Net Total Return Index (USD).
- Fund launch date: 03/1994
- Class A Acc USD launch date: 07/2010

### Is there any guarantee?

This Fund does not have any guarantees. You may not get back the full amount of money you invest.
