	The figure may vary from year to year.		
Dealing frequency:	Daily	Financial year end:	31 August
Base currency:	EUR		
Dividend policy: (Class A, C and D as at the above date)	Non-Distributing Shares: No dividends will be declared or paid ▶ A2, C2, D2 Distributing Shares: Dividends, if declared will be paid in cash or reinvested ▶ Daily: A1 ▶ Monthly: A3, D3 ▶ Yearly: A4, D4 All declared dividends result in an immediate decrease in the Fund's net asset values per share on ex-date, whether paid in cash or reinvested.		
Minimum investment:	US\$5,000 initial, US\$1,000 additional for Class A and C Shares US\$100,000 initial, US\$1,000 additional for Class D Shares		

What is this product?

Euro Bond Fund (the "Fund") is a sub-fund of BlackRock Global Funds ("BGF"), an open-ended investment company incorporated in Luxembourg. Its home regulator is the Commission de Surveillance du Secteur Financier (CSSF).

Objectives and Investment Strategy

To maximise total return by investing at least 70% of the Fund's total assets in bonds denominated in Euro, and at least 80% of its total assets in investment grade* bonds.

Subject to applicable regulatory restrictions and internal guidelines, the remaining 30% may be invested in financial instruments of companies or issuers of any size in any sector of the economy globally such as debt and other securities consistent with the Fund's objective, subject to the restriction that no more than 10% of the Fund's assets will be invested in equities.

The Fund's expected total maximum investment in debt instruments with loss-absorption features, including but not limited to contingent convertible bonds, will be less than 30% of its net asset value. These instruments may be subject to contingent write-down or contingent conversion to ordinary shares on the occurrence of trigger event(s). The Fund's exposure to contingent convertible bonds is limited to 20% of its total assets.

Derivatives such as government bond futures and interest rate swaps may be used for hedging and mitigating interest rate risk. Foreign exchange forwards and futures may be used to minimize currency exposure. In addition to using derivatives for hedging and risk mitigation, the Fund may use derivatives such as futures, foreign exchange derivatives, swaps and options for investment purposes but it is not limited to a particular strategy regarding the derivatives usage.

The Fund uses Relative "Value at Risk" using Bloomberg Barclays Euro-Aggregate 500mm+ Bond Index (formerly known as Barclays Euro-Aggregate 500mm+ Bond Index) as the appropriate benchmark to monitor and manage its global exposure.

Certain derivatives used by the Fund may be in respect of asset classes not correlated with the underlying securities positions held by the Fund such as derivatives on currencies.

The proportion of the Fund's net asset value that is expected to be subject to securities lending transactions from time to time ranges from 0% to 40% and will be consistent with the overall investment policy of the Fund.

* Meaning, at the time of purchase BBB– (Standard & Poor's or equivalent) or better by at least one recognised rating agency or, in the opinion of the Management Company, and, where applicable, based on the Internal Credit Quality Assessment Procedure, are of comparable quality.

Use of Derivatives/Investment in Derivatives

The Fund's net derivative exposure may be more than 100% of the Fund's net asset value.

What are the key risks?

Investment involves risks. Please refer to the offering document for details including the risk factors.

1. Investment Risks

The Fund is an investment fund. The Fund's investment portfolio may fall in value due to any of the risk factors below and therefore your investment in the Fund may suffer losses. There is no guarantee of the repayment of principal.

2. Credit Risks

The Fund may be exposed to the credit/default risk of bonds that it invests in. In the event of bankruptcy or default of an issuer, the Fund may experience losses and incur costs.

The actual or perceived downgrading of a rated debt security or its issuers could decrease its value and liquidity, and may have an adverse impact on the Fund, however, the Fund may continue to hold it to avoid a distressed sale.

3. Interest Rate Risks

An increase in interest rates may adversely affect the value of the bonds held by the Fund.

4. Sovereign Debt Risks

Investment in bonds issued or guaranteed by governments or authorities may involve political, economic, default, or other risks, which may in turn have an adverse impact on the Fund. Due to these factors, the sovereign issuers may not be able or willing to repay the principal and/or interest when due.

Holders of defaulting sovereign debt may be requested to participate in the restructuring of such debt. In addition, there may be limited legal recourses available against the sovereign issuer in case of failure of or delay in repayment.

The Fund may have exposure to Eurozone sovereign debts. In light of the fiscal conditions of certain European countries, the Fund may be subject to a number of increased risks arising from a potential crisis in the Eurozone (such as volatility, liquidity, price and currency risks). The performance of the Fund could deteriorate should there be any adverse events in the Eurozone (e.g. downgrade of sovereign credit ratings, default of one or more European countries, or even break-up of the Eurozone).

5. Currency Risks

The Fund may invest in assets denominated in a currency other than the base currency of the Fund. Also, a class of shares may be designated in a currency other than the base currency of the Fund. Changes in exchange rates between such currency and the base currency and changes in exchange rate controls may adversely affect the value of the Fund's assets.

The Investment Adviser may utilise techniques and instruments (e.g. currency overlays) in relation to currencies other than the base currency with the aim of generating positive returns. Any active currency management techniques implemented by the Fund may not be correlated with the underlying securities held by the Fund. As a result, the Fund may suffer significant losses even if there is no loss to the value of the underlying securities held by the Fund.

6. Derivatives Risks

Risks associated with derivatives include counterparty/credit risk, liquidity risk, valuation risk, volatility risk and market risk. The leverage effect of derivatives can result in a loss significantly greater than the amount invested and extensive exposure to derivatives may lead to a significant loss by the Fund.

The Fund may have a net derivative exposure of more than 100% of its net asset value. This may magnify any potential impact of any negative change in the value of the underlying assets on the Fund and may also increase the volatility of the Fund's price and may lead to significant losses.

Certain derivatives such as derivatives on currencies may be uncorrelated with the underlying securities held by the Fund. In this regard the Fund may suffer significant losses notwithstanding that there may be no loss in respect of the underlying securities positions (predominantly fixed income securities) held by the Fund.

7. Geographical Concentration Risks

The Fund's investments are concentrated in Europe. This may result in greater volatility than more broad-based investments. The value of the Fund may be more susceptible to adverse economic, political, policy, foreign exchange, liquidity, tax, sustainability related, legal or regulatory event affecting Europe.

8. Securities Lending Risks

When engaging in securities lending, the Fund will have a credit risk exposure to the counterparties to any securities lending contract. Fund investments can be lent to counterparties over a period of time. A default by the counterparty combined with a fall in the value of the collateral below that of the value of the securities lent may result in a reduction in the value of the Fund.

9. Contingent Convertible Bonds Risks

A contingent convertible bond may be converted into the issuer's equity or be partly or wholly written off (a "write-down") if a pre-specified trigger event occurs. Trigger levels differ and the exposure to conversion risk depends on the distance of the capital ratio to the trigger level. In case of conversion into equity, the Fund might be forced to sell these new equity shares. Such a forced sale might have an effect on market liquidity as there may not be sufficient demand for these shares. In the event of a write-down, which may be either temporary or permanent, the Fund may suffer a full, partial or staggered loss of the value of its investment. It might be difficult for the Fund to anticipate the trigger events or how the securities will behave upon conversion.

Investment in contingent convertible bonds may suffer a loss of capital. Further, contingent convertible bonds are usually subordinated to comparable non-convertible securities, and thus are subject to higher risks than other debt securities. Coupon payments on certain contingent convertible bonds may be entirely discretionary and may be cancelled by the issuer, in which event the Fund may experience losses. Investment in contingent convertible bonds may also lead to increased industry concentration risk and thus counterparty risk as such securities are issued by a limited number of banks.

How has the fund performed?

Historic performance to 31 December 2022

During this period the performance of the Fund was achieved under circumstances that no longer apply. The Fund changed its investment policy in 2017.

Notes:

Past performance information is not indicative of future performance. You may not get back the full amount invested. The computation of the performance is based on the calendar year end, NAV-To-NAV, with dividend reinvested expressed as a % change. These figures show by how much the share class increased or decreased in value during the calendar year shown. Performance data has been calculated in EUR, including ongoing charges and taxes and excluding subscription and redemption fees, if applicable. The past performance information reflects the performance of the A2 base currency share class which the Investment Adviser views as the most appropriate representative share class. Please refer to the website www.blackrock.com/hk for performance information regarding other share classes. This website has not been reviewed by the SFC.

† The benchmark of the Fund is Bloomberg Euro-Aggregate 500mm+ Bond Index (formerly known as Bloomberg Barclays Euro-Aggregate 500mm+ Bond Index).

Fund launch date: 1994

Share class launch date: 1994

Is there any guarantee?

This Fund does not have any guarantees. You may not get back the full amount of money you invest.

What are the fees and charges?

Charges which may be payable by you

You may have to pay the following fees when dealing in the shares of the Fund:

Fee	What you pay
Subscription Fee (Initial Charge)	Class A and Class D Shares: up to 5% of the price of shares Class C Shares: Nil
Switching Fee (Conversion Charge)	Nil [^] , except a delayed Initial Charge of up to 5% of the price of Class A or Class D Shares may be payable upon switching newly acquired Shares in a Reserve Fund into this Fund
Redemption Fee	Nil [^]
Contingent Deferred Sales Charge	Class A and Class D Shares: Nil Class C Shares: 1% of the lower of the original investment amount or redemption proceeds if the Shares are held for less than one year
[^] A 2% charge on redemptions/conversions may be levied where excessive trading by a shareholder is suspected.	

Ongoing fees payable by the Fund

The following expenses paid by the Fund affect you because they reduce the return on your investments:

Fee	Annual rate
Management Fee	0.75% of the net asset value of the relevant Class A and Class C Shares respectively* 0.40% of the net asset value of the relevant Class D Shares*
Depository Fees[#]	Safekeeping fees: 0.0024% to 0.45% of the value of the securities Transactional fees: US\$5.5 to US\$124 per transaction
Performance Fee	Nil
Annual Service Charge	Up to 0.25% of the net asset value of the relevant share class*
Distribution Fee	Class A and Class D Shares: Nil Class C Shares: 1.25% of the net asset value of the relevant share class
* May be increased to a combined 2.25% maximum upon giving three months' prior notice to shareholders	
[#] Subject to change without prior notice	

Other fees

You may have to pay other fees and charges when dealing in the shares of the Fund.

Additional Information

- ▶ You generally buy and redeem shares at the Fund's next-determined price as long as the Hong Kong Representative or the Transfer Agent receives your request in good order before the 6:00p.m. cut-off (HK time). Please check whether your distributor has an internal cut-off time which is earlier than this.
- ▶ The net asset value of the Fund is calculated daily. Prices of shares are published each business day on www.blackrock.com/hk. This website has not been reviewed by the SFC.
- ▶ The updated list of currently available shares is available from the Hong Kong Representative.
