

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Dynamic Credit Fund

a sub-fund of T. Rowe Price Funds SICAV
Class In (EUR) (ISIN: LU2098181675)

Management company: T. Rowe Price (Luxembourg) Management S.à r.l.

Objectives and Investment Policy

Objective The fund seeks total return through a combination of income and capital appreciation.

Portfolio securities The fund is actively managed and invests mainly in a diversified portfolio of bonds of all types from issuers around the world, including emerging markets.

The fund may use derivatives for hedging, efficient portfolio management and investment purposes. The fund may also use derivatives to create synthetic short positions in currencies, debt securities, credit indices and equities. The fund may use total return swaps (TRS).

Investment process The investment manager's approach is based on proprietary fundamental research and relative value analysis. The investment manager seeks to add value primarily through security selection, sector allocation, duration management, and currency selection. The investment process places an emphasis on downside protection, utilising robust risk management practices and portfolio diversification to manage the overall risk profile. The investment manager also assesses environmental, social and governance ("ESG") factors with particular focus on those considered most likely to have a material impact on the performance of the holdings or potential holdings in the funds' portfolio. These ESG factors, which are incorporated into the investment process alongside financials, valuation, macro-economics and other factors, are components of the investment decision. Consequently, ESG factors are not the sole driver of an investment decision but are instead one of several important inputs considered during investment analysis

SFDR classification The fund is not classified under Article 8 or 9 but applies ESG integration into the investment process, in line with Article 6 of the SFDR.

Benchmark ICE BofA US 3-Month Treasury Bill Index. The investment manager is not constrained by any country, sector and/or individual security weightings relative to the benchmark index and has complete freedom to invest in securities that do not form part of the benchmark. However, at times, market conditions may result in the fund's performance being more closely aligned with that of the benchmark index.

Benchmark use For performance comparison.

Portfolio reference currency USD

Other Information:

Income generated by the fund is reinvested and included in the value of its shares.

Orders to buy, switch and redeem shares are ordinarily processed any day that is a full bank business day in Luxembourg.

Orders received and accepted by 13:00 Luxembourg time on a business day will generally be processed that day.

Designed for Investors who plan to invest for the medium to long term.

Risk and Reward Profile

Lower Risk ← Higher Risk
Typically Lower Rewards ← Typically Higher Rewards

1	2	3	4	5	6	7
---	---	---	---	---	---	---

The value of an investment in the fund can go up and down. When you sell your shares, they may be worth less than what you paid for them. If your currency as an investor is different from the subscription currency of the fund, changes in currency exchange rates could reduce any investment gains or increase any investment losses.

The risk/reward rating above is based on medium-term volatility (actual or estimated variations in the fund's share price over five years) but is not a reliable indicator of future risk reward profile.

The lowest category does not mean a risk-free investment.

The fund is in the category shown because it invests in a segment of the market that is moderately volatile.

The fund's risk level reflects the following:

MAIN RISKS TYPICALLY ASSOCIATED WITH ORDINARY MARKET CONDITIONS

The fund's main risks are at least partially reflected in the risk/reward number. The most important of these risks are:

Asset-Backed Securities (ABS) and Mortgage-Backed Securities (MBS) may be subject to greater liquidity, credit, default and interest rate risk compared to other bonds. They are often exposed to extension and prepayment risk

The China Interbank Bond Market may subject the fund to additional liquidity, volatility, regulatory, settlement procedure and counterparty risks. The fund may incur significant trading and realisation costs

Country risk Russian and Ukrainian investments may be subject to higher

risks associated with custody and counterparties, liquidity, market disruptions, as well as strong or sudden political risks.

Emerging markets are less established than developed markets and therefore involve higher risks.

ESG and Sustainability risk may result in a material negative impact on the value of an investment and performance of the fund.

Frontier markets are less mature than emerging markets and typically have higher risks, including limited investability and liquidity.

High Yield Bond High yield debt securities are generally subject to greater risk of issuer debt restructuring or default, higher liquidity risk and greater sensitivity to market conditions.

Investment Fund involves certain risks an investor would not face if investing in markets directly.

MAIN RISKS TYPICALLY ASSOCIATED WITH UNUSUAL MARKET CONDITIONS

Unusual market conditions or large unpredictable events can amplify the fund's main risks. They can also trigger other risks, such as:

Contingent Convertible Bonds may be subject to additional risks linked to: capital structure inversion, trigger levels, coupon cancellations, call extensions, yield/valuation, conversions, write downs, industry concentration and liquidity, among others.

Counterparty risk may materialise if an entity with which the fund does business becomes unwilling or unable to meet its obligations to the fund.

Country risk China Chinese investments may be subject to higher levels of risks such as liquidity, currency, regulatory and legal risks due to the structure of the local market.

Derivatives may be used to create leverage which could expose the fund to higher volatility and/or losses that are significantly greater than the cost of the derivative.

Liquidity risk may result in securities becoming hard to value or trade within a desired timeframe at a fair price.

Total return swap contracts may expose the fund to additional risks, including market, counterparty and operational risks as well as risks linked to the use of collateral arrangements.

A more detailed description of the risks that apply to the fund is set out in the

section "Risk Descriptions" in the prospectus.

Charges

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

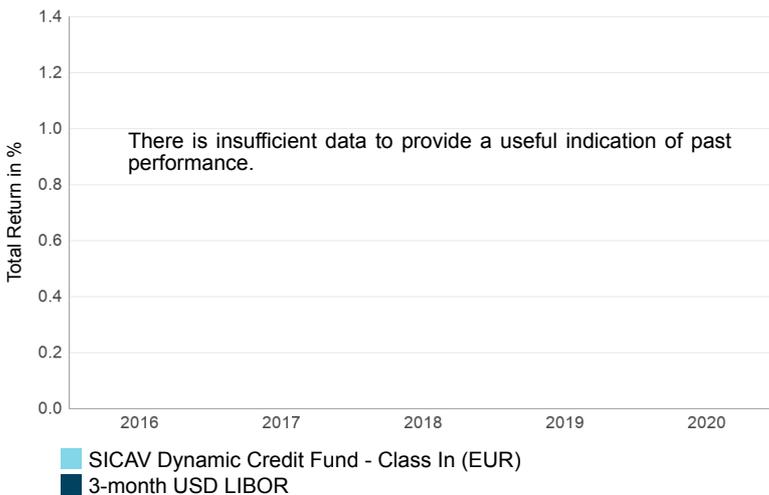

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing charges	0.68%
Charges taken from the fund under certain specific conditions	
Performance fee	None

The **entry** and **exit charges** shown are maximum figures. In some cases you may pay less. You can find this out from your distributor or financial adviser.

The **ongoing charges** figure is based on expenses for the year ending 12/2020. This figure may vary from year to year. It excludes portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units/shares in another collective investment undertaking.

For more information about charges, please see the sections entitled "NOTES ON FUND COSTS" and "EXPENSES" in the fund's prospectus, which is available at www.troweprice.com/sicavfunds.

Past Performance

The fund started to issue shares in 2019.

The class started to issue shares in 2020.

For currency hedged share classes, the benchmark index may be hedged to the currency of that share class.

Effective 2 November 2021, the fund changed its primary comparator benchmark from the 3-month USD LIBOR to the ICE BofA US 3-Month Treasury Bill Index.
