KEY PRODUCT FEATURES

WHAT ARE YOU INVESTING IN?

- You are investing in a unit trust constituted in Singapore whose investment objective is to maximise returns over the longer term by investing mainly in bonds denominated in Singapore Dollars (issued by entities incorporated or domiciled globally) and bonds denominated in foreign currencies (issued by entities incorporated or domiciled in Singapore). Apart from investments in bonds, the Sub-Fund may also invest in money market instruments (denominated in SGD or foreign currencies), bond funds (including funds managed by the Managers) and time deposits in any currency. Investments shall be made in accordance with the CPF Investment Guidelines. There is no target industry or sector.
- “bonds” include, without limitation, fixed income/debt securities of all maturities, zero coupon bonds, callable bonds, equity-linked bonds and convertible bonds, whether issued by governments, statutory bodies or public or private entities.
- Please check with your distributor for the Classes available for subscription.
- The current distribution policy is to make regular quarterly distributions of 2% p.a. of the NAV per Unit in respect of Distribution Classes. **The making of distributions is at the absolute discretion of the Managers and is not guaranteed.**

Refer to paragraphs 2 and 5 of Appendix 1 of the Prospectus for further information on features of the product.

Investment Strategy

- The investment process is principally driven by the Managers’ assessment of the fundamental factors which they consider to be important to the direction of interest rates. The process involves a top down approach supplemented by bottom up analysis to arrive at the final asset allocation.
- The Sub-Fund may use or invest in FDIs for the purposes of hedging existing positions in a portfolio, efficient portfolio management or a combination of both purposes.
- Units are Excluded Investment Products. Accordingly, the Sub-Fund will not invest in any product or engage in any transaction which may cause the Units not to be regarded as Excluded Investment Products.

Refer to paragraphs 2 and 3 of Appendix 1 of the Prospectus for further information on the investment strategy of the product.

¹ The Prospectus is available from the Managers (whose operating address is at 80 Raffles Place, 3rd Storey, UOB Plaza 2, Singapore 048624) or through their authorised agents or distributors during their respective business hours, or through the Managers’ website at uobam.com.sg.

<ul style="list-style-type: none"> The Sub-Fund is actively managed with reference to its benchmark (as set out in the Prospectus), which is used for performance comparison purposes. The benchmark is neither used as a constraint on how the Sub-Fund's portfolio is to be constructed nor set as a target for the Sub-Fund's performance to beat. 	
Parties Involved	
WHO ARE YOU INVESTING WITH? <ul style="list-style-type: none"> The Managers are UOB Asset Management Ltd. The Trustee is State Street Trust (SG) Limited. The Custodian is State Street Bank and Trust Company, Singapore Branch. 	Refer to <u>paragraphs 2, 3 and 21.4</u> of the Prospectus for further information on these entities and what happens if they become insolvent.
KEY RISKS	
WHAT ARE THE KEY RISKS OF THIS INVESTMENT? The value of the Sub-Fund and its distributions (if any) may rise or fall. These risk factors may cause you to lose some or all of your investment:	Refer to <u>paragraph 9 and paragraph 6 of Appendix 1</u> of the Prospectus for information on risks of the product.
Market and Credit Risks	
<ul style="list-style-type: none"> You are exposed to market risks in the markets where the Sub-Fund invests. <ul style="list-style-type: none"> Prices of the securities that the Sub-Fund invests in may be affected by changes in economic conditions, interest rates and the market's perception of the securities, which in turn may affect the value of your investment. 	
Liquidity Risks	
<ul style="list-style-type: none"> The Sub-Fund is not listed and you can redeem only on Dealing Days. <ul style="list-style-type: none"> There is no secondary market for the Sub-Fund. All realisation forms should be submitted to the Managers' authorised agents or distributors. You are exposed to liquidity risk in the Sub-Fund's investments. <ul style="list-style-type: none"> Investments by the Sub-Fund in some Asian and/or emerging markets often involve a greater degree of risk due to the nature of such markets which do not have fully developed services such as custodian and settlement services. There may be a greater degree of volatility in such markets because of the speculative element, significant retail participation and lack of liquidity. 	
Product-Specific Risks	
<ul style="list-style-type: none"> You are exposed to foreign exchange/currency risk. <ul style="list-style-type: none"> Where investments are denominated in currencies other than SGD (the denomination of the Sub-Fund), exchange rate fluctuations against the SGD may affect the value of Units. The Managers may hedge the foreign currency exposure of the Sub-Fund and may adopt an active currency management approach. Foreign currency exposure may not be fully hedged depending on the circumstances of each case, which include the outlook, hedging costs and market liquidity of the relevant currency. You are exposed to political risk. <ul style="list-style-type: none"> Investments by the Sub-Fund may be adversely affected by political instability as well as exchange controls, changes in taxation, foreign investment policies, restrictions on repatriation and other restrictions and controls imposed by the relevant authorities in the relevant countries. You are exposed to debt securities risk. <ul style="list-style-type: none"> Investments in debt securities are subject to interest rate fluctuations and credit risks, such as risk of default by issuers. Prices of debt securities may go up or down in response to interest rate fluctuations. Adverse changes in the financial condition of the issuer of the debt securities, or in general economic conditions, or both, or an unanticipated rise in interest rates, may increase the potential for default by the issuers of these securities. You are exposed to single country, sector and regional risk. <ul style="list-style-type: none"> Investors should be aware that while investments in single country, single sector or regional funds may present greater opportunities and potential for capital appreciation, they may be subject to higher risks as they may be less diversified than a global portfolio. 	

- **You are exposed to derivatives risks.**
 - o An investment in a FDI (including foreign exchange forward contracts) may require the deposit of an initial margin and additional deposit of margin on short notice if the market moves against the investment position. If the required margin is not provided in time, the investment may be liquidated at a loss. Therefore, it is essential that investments in FDIs are monitored closely. The Managers have controls for investments in FDIs and have in place systems to monitor the FDI positions of the Sub-Fund.
 - **You are exposed to risks relating to distributions.**
 - o Dividend/interest income of the Sub-Fund may be adversely affected by (amongst others) investee entities suffering unexpected losses and/or paying lower than expected dividends. Distributions may also be made out of capital which may amount to a reduction of part of your original investment and may result in reduced future returns to you. Payment of distributions (whether out of capital or otherwise) may have the effect of lowering the Sub-Fund's NAV.
- You should be aware that the Sub-Fund may be exposed to other risks of an exceptional nature from time to time.**
