What is this product?

Invesco Greater China Equity Fund (the "Fund") is a fund constituted in the form of a mutual fund. It is domiciled in Luxembourg and its home regulator is the CSSF, Luxembourg supervisory authority.

Objectives and Investment Strategy

The objective of the Fund is to achieve long-term capital growth by investing in securities of Greater China. The Fund shall primarily invest (at least 70% of the net asset value of the Fund) in equity or equity-related securities issued by (i) companies and other entities having their registered office in Greater China, their governments or any of their respective agencies or instrumentalities or any local government, (ii) companies and other entities located outside Greater China carrying out their business activities principally (50% or more by revenue, profit, assets or production)

in Greater China, or (iii) holding companies, the interests of which are principally invested in subsidiary companies with a registered office in Greater China. Greater China refers to mainland China, Hong Kong SAR, Macau SAR and Taiwan.

Up to 20% of the net asset value of the Fund may be exposed to China A shares listed on the Shanghai or Shenzhen Stock Exchanges, via Stock Connect. The Fund may invest up to 30% of its NAV in China A shares and China B shares (including exposure through Stock Connect, participation notes, equity linked notes or similar access products or arrangements).

Up to 30% of the net asset value of the Fund may be invested in cash and cash equivalents, money market instruments, equity and equity-related instruments issued by companies and other entities not meeting the above requirement or debt securities (including convertible debt) of issuers worldwide. For the avoidance of doubt, less than 30% of the net asset value of the Fund may be invested in debt securities (including convertible debt).

The Fund will not invest in units of UCITS and/or other UCIs (including Exchange Traded Funds), with the exception of possible investment in money market funds for liquidity management purposes which will not exceed 10% of the net asset value of the Fund.

Not more than 10% of the net asset value of the Fund may be invested in securities issued by or guaranteed by a country which is unrated (debt securities which are not rated by any international rating agency such as Moody's, Standard & Poor's and Fitch) and/or whose credit rating is below investment grade (below investment grade is defined as credit rating that is below BBB- from Standard & Poor's and Fitch, or below Baa3 from Moody's or an equivalent rating from an internationally recognized rating agency).

The Fund may use derivatives (including but not limited to futures, forwards, non-deliverable forwards, swaps and complex options structures) for hedging and efficient portfolio management purposes. Such derivatives may also incorporate derivatives on derivatives (i.e. forward dated swaps, swap options). However, financial derivative instruments will not be extensively used for investment purposes (i.e. entering into financial derivative instruments to achieve the investment objectives).

The Fund may engage in securities lending. The expected proportion of the net asset value of the Fund subject to securities lending is 20%. Under normal circumstances, the maximum proportion of the net asset value of the Fund subject to securities lending is 29%.

Use of derivatives / investment in derivatives

The Fund's net derivative exposure[1] may be up to 50% of the Fund's net asset value.

What are the key risks?

Investment involves risks. Please refer to the Prospectus for details including the risks factors.

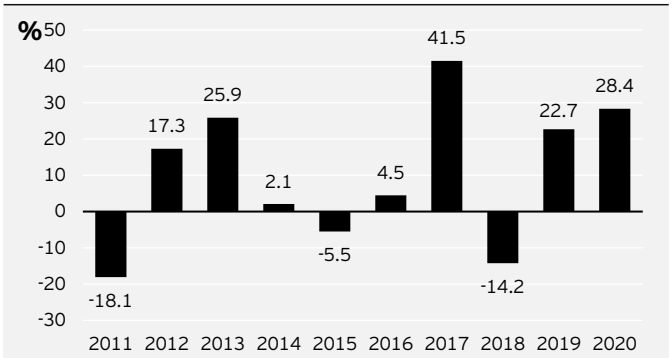

- **General investment risk** - There can be no assurance that the Fund will achieve its investment objective. The instruments invested by the Fund may fall in value due to any of the key risk factors below and therefore your investment in the Fund may suffer losses. There is no guarantee of the repayment of principal.
- **Currency exchange risk**
  - The Fund's assets may be invested in securities denominated in currencies other than the base currency of the Fund. Also, a class of shares may be designated in a currency other than the base currency of the Fund. The net asset value of the Fund may be affected unfavorably by fluctuations in the exchange rates between these currencies and the base currency and by changes in exchange rate controls.
  - For the hedged share classes, there is no guarantee that the exposure of the currency in which the shares are denominated can be fully hedged at all times against the base currency of the Fund or the currency or currencies in which the assets of the Fund are denominated. Investors should also note that the successful implementation of the strategy may substantially reduce the benefit to shareholders in the relevant class of shares as a result of decreases in the value of the share class currency against the base currency of the Fund. In the event that investors request payment of redemption proceeds in a currency other than the currency in

[1] Please refer to the offering document for details regarding the calculation methodology of net derivative exposure.

which the shares are denominated, the exposure of that currency to the currency in which the shares are denominated will not be hedged.

- **Volatility risk** - Investors should note that volatility in the Fund's investment portfolio may result in large fluctuations in the net asset value of the Fund which may adversely affect the net asset value per share of the Fund and investors may as a result suffer losses.
- **Equities risk** - The value of, and income derived from, equity securities held may fall as well as rise and the Fund may not recoup the original amount invested in such securities. The prices of and the income generated by equity securities may decline in response to certain events, including the activities and results of the issuer, general political, economic and market conditions, regional or global economic instability and currency and interest rate fluctuations. Thus, this may adversely impact the Fund and/or the interests of investors.
- **Concentration risk**
  - As the Fund will invest primarily in securities of the Greater China, such concentration may exhibit a higher than usual degree of risk and the Fund may be subject to above average volatility. The diversification benefits that would ordinarily accrue from investment in a fund having a more diverse portfolio of investments, may not apply to this Fund.
  - The value of the Fund may be more susceptible to adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory event and natural disaster affecting the market in the Greater China region.
- **Emerging markets risk** - The Fund invests in emerging markets which may involve increased risks and special considerations not typically associated with investment in more developed markets such as, liquidity risk, currency risks/ control, political and economic uncertainties, policy, legal or regulatory event affecting the relevant markets and taxation risks, settlement risks, custody risk and the likelihood of a high degree of volatility.
- **Risk associated with investment in China**
  - The Fund may invest in securities or instruments which have exposure to the Chinese market. Investors should note the differences in accounting and disclosure practices in China.
  - The value of the Fund's assets may be affected by uncertainties such as changes in government policies, taxation, currency repatriation restrictions, permitted foreign ownership levels, and other developments in the law or regulations of China.
- **Risk of investing in financial derivative instruments ("FDI") for efficient portfolio management and hedging purposes** - Investments of the Fund may be composed of FDI used for efficient portfolio management or to attempt to hedge or reduce the overall risk of its investments. Risks associated with FDI include counterparty/credit risk, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk. The leverage element/component of a FDI can result in a loss significantly greater than the amount invested in the FDI by the Fund. Exposure to FDI may lead to a high risk of significant loss by the Fund.

How has the Fund performed?

- The Fund Manager views Class A accumulation - USD (the "Share Class"), being the focus share class of the Fund available to the public of Hong Kong, as the most appropriate representative share class.
- Fund launch date: 15 July 1992.
- Share Class launch date: 15 July 1992.
- The base currency of the Fund is USD.
- Past performance of the Share Class is calculated in USD.
- Performance is calculated after deduction of ongoing charges and is inclusive of gross income reinvested. Any entry/exit charges shown are excluded from the calculation.
- Past performance is not a guide to future performance.
- Investors may not get back the full amount invested. The computation basis of the performance is based on the calendar year end, NAV-To-NAV, with dividend reinvested.
- These figures show by how much the Share Class increased or decreased in value during the calendar year being shown.
