

First Sentier Asian Property Securities Fund

Monthly Fund Factsheet

30 April 2021

– The Fund invests primarily in Asian equity or equity related securities issued by REITs or companies own, develop or manage real property. It may expose to risks akin to direct ownership of real property and value of securities may fluctuate more than actual property. Operation and management of underlying properties and changes in economic conditions may impact its value.

– The Fund invests in emerging markets which may have increased risks than developed markets including liquidity risk, currency risk/control, political and economic uncertainties, high degree of volatility, settlement risk and custody risk. The Fund may expose to China market risk including repatriation risk, uncertainties to taxation policies. The Fund may also expose to RMB currency and conversion risk. The Fund's investments may be concentrated in limited or specialist sector, single country/specific region, fast growing economies or small numbers of companies/countries which may have higher volatility or greater loss of capital than more diversified portfolios. Investing in securities of small/mid-capitalisation companies may have lower liquidity and more volatile prices during adverse economic developments. The Fund may use FDIs for hedging and efficient portfolio management purposes, which may subject the Fund to additional liquidity, valuation, counterparty and over the counter transaction risks. For certain share classes, the Fund may at its discretion pay dividend out of capital or pay fees and expenses out of capital to increase distributable income and effectively a distribution out of capital. This amounts to a return or withdrawal of your original investment or from any capital gains attributable to that, and may result in an immediate decrease of NAV per share.

– It is possible that a part or entire value of your investment could be lost. You should not base your investment decision solely on this document. Please read the offering document including risk factors for details.

Investment objective & strategy

The Fund aims to achieve a total investment return consistent with income and long term capital growth and invests primarily in a broad selection of Asian equity and equity related securities issued by real estate investment trusts or companies that own, develop or manage real property and which are listed, traded or dealt in on regulated markets in the Asian Region.
