# What is this product?

Invesco US Value Equity Fund (the "Fund") is a fund constituted in the form of a mutual fund. It is domiciled in Luxembourg and its home regulator is the CSSF, Luxembourg supervisory authority.

# **Objectives and Investment Strategy**

The investment objective of the Fund is to provide reasonable long-term capital growth, measured in US Dollars. Investments will be sought in equity securities that the Investment Manager believes to be undervalued relative to the stock market in general at the time of purchase.

The Fund will invest primarily (at least 70% of the net asset value of the Fund) in the common or preferred stocks of companies which are located in the United States of America ("US"). A company will be considered located in the US if (i) it is organised under the laws of the US and has its principal office in the US or (ii) it derives 50% or more of its revenues

8 April 2021

from businesses in the US. The Fund may also invest, on an ancillary basis, in the equity securities of companies traded principally on US stock exchanges, convertible debt securities, US Government securities (securities issued or guaranteed as to principal and interest by the US Government or its agencies and instrumentalities), money market instruments and investment grade corporate debt securities. For the avoidance of doubt, less than 30% of the net asset value of the Fund may be invested in convertible debt securities, US Government securities and investment grade corporate debt securities.

Not more than 10% of the net asset value of the Fund may be invested in securities issued by or guaranteed by a country which is unrated (debt securities which are not rated by any international rating agency such as Moody's, Standard & Poor's and Fitch) and/or whose credit rating is below investment grade (below investment grade is defined as credit rating that is below BBB- from Standard & Poor's and Fitch, or below Baa3 from Moody's or an equivalent rating from an internationally recognized rating agency).

The Fund may use derivatives (including but not limited to futures, forwards, non-deliverable forwards, swaps and complex options structures) for hedging and efficient portfolio management purposes. Such derivatives may also incorporate derivatives on derivatives (i.e. forward dated swaps, swap options). However, financial derivative instruments will not be extensively used for investment purposes (i.e. entering into financial derivative instruments to achieve the investment objectives).

The Fund may engage in securities lending. The expected proportion of the net asset value of the Fund subject to securities lending is 20%. Under normal circumstances, the maximum proportion of the net asset value of the Fund subject to securities lending is 29%.

# Use of derivatives / investment in derivatives

The Fund's net derivative exposure<sup>1</sup> may be up to 50% of the Fund's net asset value.

#### What are the key risks?

Investment involves risks. Please refer to the Prospectus for details including the risks factors.

- General investment risk There can be no assurance that the Fund will achieve its investment objective. The instruments invested by the Fund may fall in value due to any of the key risk factors below and therefore your investment in the Fund may suffer losses. There is no guarantee of the repayment of principal.
- Currency exchange risk The Fund's assets may be invested in securities denominated in currencies other than the base currency of the Fund. Also, a class of shares may be designated in a currency other than the base currency of the Fund. The net asset value of the Fund may be affected unfavorably by fluctuations in the exchange rates between these currencies and the base currency and by changes in exchange rate controls.
- Volatility risk Investors should note that volatility in the Fund's investment portfolio may result in large fluctuations in the net asset value of the Fund which may adversely affect the net asset value per share of the Fund and investors may as a result suffer losses.
- Equities risk The value of, and income derived from, equity securities held may fall as well as rise and the Fund may not recoup the original amount invested in such securities. The prices of and the income generated by equity securities may decline in response to certain events, including the activities and results of the issuer, general political, economic and market conditions, regional or global economic instability and currency and interest rate fluctuations. Thus, this may adversely impact the Fund and/or the interests of investors.

#### Concentration risk

- As the Fund will invest primarily in companies in the common or preferred stocks of companies which are located in the US, such concentration may exhibit a higher than usual degree of risk and the Fund may be subject to above average volatility. The diversification benefits that would ordinarily accrue from investment in a fund having a more diverse portfolio of investments, may not apply to this Fund.
- The value of the Fund may be more susceptible to adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory event and natural disaster affecting the US market.
- Risk of investing in financial derivative instruments ("FDI") for efficient portfolio management and hedging purposes Investments of the Fund may be composed of FDI used for efficient portfolio management or to attempt to hedge or reduce the overall risk of its investments. Risks associated with FDI include counterparty/credit risk, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk. The leverage element/component of a FDI can result in a loss significantly greater than the amount invested in the FDI by the Fund. Exposure to FDI may lead to a high risk of significant loss by the Fund.

<sup>&</sup>lt;sup>1</sup> Please refer to the offering document for details regarding the calculation methodology of net derivative exposure.

#### Other fees

You may have to pay other fees when dealing in the shares of the Fund.

### Additional Information

- You generally buy and redeem shares at the Fund's next-determined net asset value after the Hong Kong Sub-Distributor and Representative receives your request in good order on or before 5:00pm, Hong Kong time, being the Fund's dealing cut-off time. Before placing your subscription or redemption orders, please check with your distributor for the distributor's internal cut-off time (which may be earlier than the Fund's dealing cut-off time).
- The net asset value of the Fund is calculated each "Business Day" as defined in the Prospectus and the price of shares is published each Hong Kong business day (i.e. a day on which banks in Hong Kong are open for normal banking business) at www.invesco.com/hk. This website has not been reviewed by the SFC.
- Investors may obtain the past performance information of other share classes offered to Hong Kong investors at www.invesco.com/hk. This website has not been reviewed by the SFC.
- Investors may obtain other information of this product at www.invesco.com/hk. This website has not been reviewed by the SFC.
