[#] The ongoing charges figures are based on the expenses over a 12-month period from 1 January 2020 to 31 December 2020. These figures represent the sum of the ongoing expenses chargeable to the respective share class of the Sub-Fund expressed as a percentage of the average net asset value of the respective share class of the Sub-Fund over the same period. These figures may vary from year to year.

Dealing frequency:	Daily
Base currency:	USD
Dividend policy:	A and C Income Shares – annually; if declared, will be paid or reinvested A Inc-2 Shares* - monthly; if declared, will be paid or reinvested A Inc-2 IRD Shares [#] - monthly; if declared, will be paid or reinvested A and C Accumulation Shares – no dividend will be declared

*The Board of Directors may at its discretion pay dividend out of gross income while charging all or part of the Share Class's fees and expenses to the capital of the Share Class, resulting in an increase in distributable income for the payment of dividends by the Share Class and therefore, the Share Class may effectively pay dividend out of capital. Any distributions involving payment of dividends effectively out of the Share Class's capital may result in an immediate reduction of the net asset value per Share.

[#]Distributions made in relation to IRD Share Classes may include a component of interest rate differential resulting from the currency hedging transactions and such component in the IRD Share Classes' dividend will be considered a distribution from capital or capital gains attributed to the relevant IRD Shares Classes. As such, dividend will be paid out of capital, which may result in an immediate reduction of the net asset value per Share.

The Board of Directors may amend the dividend policy (including any change to dividend payment out of capital) subject to the SFC's prior approval and by giving not less than one month's prior notice to affected shareholders.

What is this product?

This is a fund constituted in the form of a mutual fund. It is domiciled in Luxembourg and its home regulator is Commission de Surveillance du Secteur Financier (CSSF).

Objectives and Investment Strategy

The Sub-Fund aims to achieve long-term capital growth primarily through investment in shares of companies around the world. The Sub-Fund will have a blend of investments and will be unrestricted in its choice of companies either by size or industry, or in terms of the geographical make-up of the portfolio. The Sub-Fund will focus investment on stocks deemed to be of high quality which are typically associated with global brands or franchises.

The Sub-Fund may invest up to 5% of its net asset value in onshore securities issued in Mainland China (for example, China A Shares and B Shares).

The Sub-Fund may use derivatives for the purposes of hedging and/or efficient portfolio management.

The Sub-Fund is actively managed. This means the Investment Manager is free to select investments with the aim of achieving the Sub-Fund's objectives. The Sub-Fund uses the MSCI AC World (Net Return) Index for performance comparison. The Sub-Fund does not seek to replicate the index. It will generally hold assets that are components of the index, but not in the same proportions, and it is allowed to hold assets which are not components of the index. The assets of the Sub-Fund therefore may be very different from the index.

The Sub-Fund currently do not intend to enter into any securities lending transactions. The prior approval of the SFC will be sought and at least one month's prior notice would be given to shareholders should there be a change in such intention.

Use of derivatives / investment in derivatives

The Sub-Fund's net derivative exposure may be up to 50% of its net asset value.

What are the key risks?

Investment involves risks. Please refer to the offering document for details including the risk factors.

- **Investment risk** – The underlying investments of the Sub-Fund may fall in value due to any of the key risk factors below and therefore your investment in the Sub-Fund may suffer losses. You may not get back the full amount of money you invest. In addition, the Sub-Fund primarily invests in equities or equity-related securities. Generally, equities or equity-related securities are subject to higher volatility and therefore higher risk of loss, compared to other instruments such as bonds, money markets instruments or bank deposits.
- **Concentration risk** – The Sub-Fund invests in a concentrated portfolio of holdings compared to a typical fund with a similar investment mandate and therefore may be more volatile than more broadly diversified funds.
- **Derivatives usage risk** – The Sub-Fund may use derivatives for the purposes of hedging and/or EPM. Investments in derivatives involve additional risks such as leverage risk, counterparty risks, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk. In adverse situations, the Sub-Fund's use of derivatives may become ineffective in hedging and/or in EPM and the Sub-Fund may suffer significant losses.
- **Risk of distribution out of capital for Inc-2 Share Class** – The Management Fee, the Management Company Fee, the Administration Servicing Fee, the Distribution Fee (if any), the Custodian's fee and all other expenses attributable to the Share Class will be charged against the capital account of that Share Class. This has the effect of increasing the Share Class's distributions (which may be taxable) whilst reducing its capital to an equivalent extent and therefore the Share Class may effectively pay dividend out of capital. This could constrain future capital and income growth. Payment of dividends out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any distributions involving payment of dividends effectively out of the Share Class's capital may result in an immediate reduction of the net asset value per Share.
- **Risk associated with IRD Share Classes** – IRD Share Classes give priority to dividends, rather than capital growth, and will typically distribute more than the income received by the relevant Sub-Fund. As such, dividends will typically be paid out of capital, which may result in greater **erosion of the capital invested** than other share classes. Furthermore, uncertainties in interest rate and foreign exchange rate movements could adversely affect the return of IRD Share Classes. The net asset value of IRD Share Classes may fluctuate more than and may significantly differ from other Share Classes due to a more frequent distribution of dividends and the fluctuation of the interest rate differential between the reference currency of the Sub-Fund and the currency denomination of the IRD Share Classes.
- **Currency Hedged Share Class risk** – The Investment Manager will implement a currency hedging strategy to limit the exposure to the currency position of the reference currency of the Sub-Fund and the currency denomination of the relevant Hedged Share Classes. However, there can be no assurance that the currency hedging strategy implemented by

the Investment Manager will be successful. Foreign exchange rate fluctuation between the reference currency of the Sub-Fund and the currency denomination of the relevant Hedged Share Classes may result in a decrease in return and/or loss of capital for the shareholders.

- **Portfolio Currency Hedged Share Class (“PCHSC”) risk** – the Investment Manager (or its delegate) will use hedging transactions (i.e. actual portfolio currency hedging method) to reduce the impact of exchange rate movements between the currency denomination of the PCHSC and the primary currency exposures in the relevant Sub-Fund’s portfolio. However, there can be no assurance that the currency hedging strategies implemented by the Investment Manager (or its delegate) will be successful. Foreign exchange rate fluctuation between the primary currency exposures in the relevant Sub-Fund’s portfolio and the currency denomination of the relevant PCHSC may result in a decrease in return and/or loss of capital for the shareholders. There will be extra fees and costs which will accrue only to the shareholders of the PCHSC and that the performance of any PCHSC will diverge from the performance of the equivalent share classes that do not make use of these hedging strategies.
- **Exchange rate fluctuation risk** – Currency fluctuations may adversely affect the value of a Sub-Fund’s investments and the income thereon. Currency fluctuations may also adversely affect the profitability of an underlying company in which a Sub-Fund invests.
