Quick Facts

Fund Manager/ Management Company:	Invesco Management S.A.
Investment Manager(s):	Invesco Advisers, Inc., located in the USA. (Internal delegation)
Investment Sub-Manager:	Invesco Canada Ltd., located in Canada. (Internal delegation)
Base Currency:	US Dollar
Custodian (Depository):	The Bank of New York Mellon SA/NV, Luxembourg Branch
Dealing Frequency :	Daily
Financial Year End:	The last day of February
Ongoing charges	Class A (AUD hedged) monthly distribution-1 - AUD 1.23%^
	Class A (EUR hedged) accumulation - EUR 1.23%^
over a year:	Class A (EUR hedged) monthly distribution - EUR 1.23%^
	Class A (HKD) monthly distribution - HKD 1.23%^
	Class A fixed monthly distribution - USD 1.23%^
	Class A semi-annual distribution - USD 1.23%^
	Class B semi-annual distribution - USD 2.23%^
	Class C (EUR hedged) accumulation - EUR 0.98%^
	Class C accumulation - USD 0.98%^
	Class C semi-annual distribution - USD 0.98%^

^ The ongoing charges figure is estimated based on the expected annualised total of charges (excluding portfolio transaction costs) expressed as a percentage of the average net asset value over the same period taking into account any discretionary cap on ongoing charges or on operational expenses that has been imposed, the details of which are set out in the Supplement - Additional Information for Hong Kong Investors. The Management Company may from time to time apply a discretionary cap on ongoing charges or on operational expenses. Such discretionary cap may be applied or removed at the absolute discretion of the Management Company in the best interest of investors, with a view to keeping the ongoing charges competitive. The cap may vary from year to year and any actual fees incurred which are above the capped level will be borne by the Management Company. The ongoing charges figure may also vary from year to year.

Dividend Policy:	<p>Net Income distribution (Dividends, if any, will be paid to investors)</p> <p>Accumulation (Dividends, if any, will be re-invested into the Fund)</p> <p>Fixed distribution (Dividends, if any, of a fixed yield will be paid to investors monthly. Such yield will be re-set on at least a semi-annual basis. The SICAV may at its discretion pay dividends out of gross income while paying all or part of the share class's fees and expenses, together with miscellaneous expenses, out of the capital of the share class, resulting in an increase in distributable income for the payment of dividends by the share class and therefore, the share class may effectively pay dividends out of capital and may reduce the net asset value per share of this share class immediately after the monthly distribution date)</p> <p>Monthly Distribution-1 (Dividends, if any, will be paid to investors monthly. The SICAV may, at its discretion, pay (a) a portion of dividends out of gross income, (b) a portion of dividends out of capital, and (c) with respect to hedged Monthly Distribution-1 Share classes (if applicable), the interest rate differential between the currency in which the share class is denominated and the base currency of the Fund. The Fund may pay dividends out of capital and/or effectively out of capital</p>
-------------------------	--

and may reduce the net asset value per share of this share class immediately after the monthly distribution date)

Minimum Investment/ Minimum Subscription Amount:

What is this product?

Invesco Global High Income Fund (the "Fund") is a fund constituted in the form of a mutual fund. It is domiciled in Luxembourg and its home regulator is the CSSF, Luxembourg supervisory authority.

Objectives and Investment Strategy

The Fund aims to achieve a high level of income together with long term capital growth.

The Fund seeks to achieve its objective by investing primarily (at least 70% of the net asset value of the Fund) in global non-investment grade debt securities, most of which are issued by corporate issuers.

Debt securities will include but are not limited to debt securities issued by governments, local authorities, public authorities, quasi-sovereigns, supranational bodies, public international bodies as well as corporates and convertibles, and unrated debt securities.

The Investment Manager will apply a combination of fundamental and systematic, quant-based approach to invest in the universe. The Investment Manager will gain exposure to actively selected debt securities based on fundamental credit research, complementing the fund's allocation with systematic exposure to global debt securities (including emerging markets), using a range of factors (including quality, value, carry, liquidity) together with an assessment of risk to evaluate the relative attractiveness of an instrument. The Investment Manager expects the combination of fundamental and systematic strategies to deliver a higher ratio of return to risk than the use of a single strategy.

The Fund may invest in debt instruments with loss-absorption features ("LAP"), including contingent convertible debt securities and debt instruments meeting the qualifying criteria to be Additional Tier 1 Capital or Tier 2 Capital under the Banking (Capital) Rules and debt instruments issued under an equivalent regime of non-Hong Kong jurisdictions, in addition to senior non-preferred debt with a bail-in flag on Bloomberg or any other debt security with a bail-in flag, as classified by Bloomberg. These instruments may be subject to contingent write-down or contingent conversion to ordinary shares on the occurrence of trigger event(s). The Fund's expected maximum investments in LAP will be up to 20% of its net asset value. The Fund may invest up to 10% of its net asset value in contingent convertibles.

The Fund may invest up to 20% of its net asset value in securities which are either in default or deemed to be at high risk of default as determined by the SICAV.

The Fund may access China onshore bonds in the China Interbank Bond Market via Bond Connect for less than 10% of its net asset value.

In addition, the Investment Manager may also seek to gain exposure to such debt securities by investing up to 10% of its net asset value in structured notes, including credit-linked notes, deposit-linked notes and notes linked to a total return swap. The Investment Manager will use these structured notes where investing directly into debt securities issued by governments, local authorities and public authorities is not possible or is unattractive, for example, due to restrictions on foreign money inflows. These structured notes will be freely transferable and will not be leveraged.

Up to 30% of the net asset value of the Fund may be invested in cash and cash equivalents, money market instruments and other eligible transferable securities not meeting the above requirements.

For the purposes of the Fund, the Investment Manager has defined the emerging countries as all the countries in the world other than (i) members of the European Union that the Investment Manager regards as developed countries, (ii) United Kingdom, (iii) United States of America, (iv) Canada, (v) Japan, (vi) Australia, (vii) New Zealand, (viii) Norway, (ix) Switzerland, (x) Hong Kong and (xi) Singapore.

Not more than 10% of the net asset value of the Fund may be invested in securities issued by or guaranteed by a country which is unrated and/or whose credit rating is below investment grade (as rated by the major recognised credit rating agencies including but not limited to Standard & Poor's, Fitch and Moody's). For the avoidance of doubt, this restriction does not apply to securities issued by quasi-sovereigns (i.e. not being a government, public or local authority) and other types of debt securities, which are not subject to any minimum credit rating requirements.

The Fund may invest up to 100% of its net asset value in debt securities which are unrated (debt securities which are not rated by any international rating agency such as Moody's, Standard & Poor's and Fitch) or rated below investment grade (below investment grade is defined as credit rating that is below BBB- from Standard & Poor's and Fitch, or below Baa3 from Moody's or an equivalent rating from an internationally recognized rating agency).

The Fund may enter into financial derivatives instruments for efficient portfolio management, hedging purposes and not extensively for investment purposes. The Fund's use of derivatives may include derivatives on credit, rates, currencies and volatility and may be used to achieve both long and short positions, which overall will not result in the Fund being directionally short or short any asset class. In addition, the Fund will not have uncovered short positions, in line with appropriate UCITS regulatory requirements. The Fund may also use derivatives on equities, where the Fund Manager believes that such investment could reduce drawdowns. The long and short active financial derivative positions (including active currency/interest rate/credit/volatility and equity positions) implemented by the Fund may not be correlated with the underlying securities positions held by the Fund (i.e. debt securities).

The expected level of leverage of the Fund calculated using the commitment approach is 0 to 40% of the net asset value of the Fund. The level of leverage of the Fund using the commitment approach is expressed as a ratio between the market value of the equivalent position in the underlying assets of the financial derivative instruments (taking into account the possible netting and hedging arrangements) and its net asset value.

The expected proportion of the net asset value of the Fund to total return swaps is 5%. Under normal circumstances, the maximum proportion of the net asset value of the Fund subject to total return swaps is 30%.

Use of derivatives / investment in derivatives

The Fund's net derivative exposure¹ may be up to 50% of the Fund's net asset value.

What are the key risks?

Investment involves risks. Please refer to the Prospectus for details including the risks factors.

- **General investment risk** - There can be no assurance that the Fund will achieve its investment objective. The instruments invested by the Fund may fall in value due to any of the key risk factors below and therefore your investment in the Fund may suffer losses. There is no guarantee of the repayment of principal.
- **Currency exchange risk**
 - The Fund's assets may be invested in securities denominated in currencies other than the base currency of the Fund. Also, a class of shares may be designated in a currency other than the base currency of the Fund. The net asset value of the Fund may be affected unfavorably by fluctuations in the exchange rates between these currencies and the base currency and by changes in exchange rate controls.
 - For the hedged share classes, there is no guarantee that the exposure of the currency in which the shares are denominated can be fully hedged at all times against the base currency of the Fund or the currency or currencies in which the assets of the Fund are denominated. Investors should also note that the successful implementation of the strategy may substantially reduce the benefit to shareholders in the relevant class of shares as a result of decreases in the value of the share class currency against the base currency of the Fund. In the event that investors request payment of redemption proceeds in a currency other than the currency in which the shares are denominated, the exposure of that currency to the currency in which the shares are denominated will not be hedged.
- **Volatility risk** - Investors should note that volatility in the Fund's investment portfolio may result in large fluctuations in the net asset value of the Fund which may adversely affect the net asset value per share of the Fund and investors may as a result suffer losses.
- **Credit risk**
 - Investment in bonds, debt or other fixed income securities (including corporate and sovereign bonds) are subject to the risk that issuers do not make payments on interest and principal of such securities. An issuer

¹ Please refer to the offering document for details regarding the calculation methodology of net derivative exposure.

suffering from an adverse change in its financial condition could lower the quality of a security leading to greater price volatility on that security.

- Securities which were investment grade at the time of acquisition may be downgraded. The risk of any such downgrading will vary over time. The Fund's investment policy does not specifically require the Fund to sell such securities if they should fall below investment grade. Besides, the Investment Manager and/or Investment Sub-Manager (if applicable) may not be able to dispose of the debt instruments that are being downgraded. Investments in below investment grade securities carry a higher risk of default and therefore may adversely impact the Fund and/or the interests of investors.
- **Risk of investing in high yield bonds/non-investment grade bonds and un-rated bonds** - The Fund may invest in high yield bonds/ non-investment grade bonds and un-rated bonds which involve substantial risk. High yield bonds/ non-investment grade bonds and un-rated bonds are regarded as being predominantly speculative as to the issuer's ability to make payments of principal and interest. Issuers of high yield bonds/ non-investment grade bonds and un-rated bonds may be highly leveraged, subject to lower liquidity and higher volatility and may not have available to them more traditional methods of financing. An economic recession may adversely affect an issuer's financial condition and the market value of high yield bonds/ non-investment grade bonds and un-rated bonds issued by such entity. High yield bonds/ non-investment grade bonds and un-rated bonds are generally subject to greater loss of principal and interest than high-rated bonds. As such, this may adversely impact the Fund and/or the interests of investors.
- **Interest rate risk** - The bonds or fixed income securities that the Fund invests in may fall in value if the interest rates change and this will adversely impact the net asset value of the Fund. In general, the prices of debt securities rise when interest rates fall, whilst their prices fall when interest rates rise. Longer term debt securities are usually more sensitive to interest rate changes.
- **Liquidity risk** - The Fund may be adversely affected by a decrease in market liquidity for the securities in which it invests where some of the Fund's securities may become illiquid and the Fund may experience difficulties in selling securities at a fair price within a timely manner.
- **Credit rating risk** - Credit ratings assigned by rating agencies are subject to limitations and do not guarantee the creditworthiness of the security and/or issuer at all times.
- **Concentration risk** - As the Fund will invest primarily in high yield debt securities, such concentration may exhibit a higher than usual degree of risk and the Fund may be subject to above average volatility. The diversification benefits that would ordinarily accrue from investment in a fund having a more diverse portfolio of investments, may not apply to this Fund.
- **Emerging markets risk** - The Fund invests in emerging markets which may involve increased risks and special considerations not typically associated with investment in more developed markets such as, liquidity risk, currency risks/ control, political and economic uncertainties, policy, legal or regulatory event affecting the relevant markets and taxation risks, settlement risks, custody risk and the likelihood of a high degree of volatility.
- **Risk of investing convertibles/convertible bonds/convertible debts** - Convertibles/convertible bonds/convertible debts are a hybrid between debt and equity, typically permitting holders to convert into shares in the company issuing the bond at a specified future date. As such, convertibles/convertible bonds/convertible debts may be exposed to equity movement and greater volatility than non-convertibles/convertible bonds/convertible debts investments. Investments in convertibles/convertible bonds/convertible debts are subject to the similar interest rate risk, credit risk, liquidity risk and prepayment risk associated with comparable non-convertibles/convertible bonds/convertible debts investments.
- **Risk of investing in financial derivative instruments ("FDI") for efficient portfolio management and hedging purpose and for investment purposes** - Investments of the Fund may be composed of FDI used for efficient portfolio management or to attempt to hedge or reduce the overall risk of its investments. Risks associated with FDI include counterparty/credit risk, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk. The leverage element/component of a FDI can result in a loss significantly greater than the amount invested in the FDI by the Fund. Exposure to FDI may lead to a high risk of significant loss by the Fund. As well as the risks identified above, the Fund may use derivatives for investment purposes and may be exposed to additional leveraged risk, which may result in significant fluctuations of the net asset value of the Fund and/or extreme losses where the Investment Manager is not successful in predicting market movements. This in turn may lead to an increase in the risk profile of the Fund.
- **Risks of implementing active FDI positions not correlated with underlying asset of the Fund** - As the active FDI positions (including active currency/interest rate/credit/volatility and equity positions) implemented by the Fund may not be correlated with the underlying securities positions held by the Fund (i.e. debt securities), the Fund may

suffer a significant or total loss even if there is no loss of the value of the underlying securities positions (i.e. debt securities) held by the Fund.

■ Risks associated with payment of dividends and/or fees and expenses out of capital

- Payment of dividends out of capital and/or effectively out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any such distributions may result in an immediate reduction of the net asset value per share in respect of such share class after the monthly distribution date.
- For Monthly Distribution-1 share classes that are currency hedged, the Fund may take into account the return driven by the interest rate differential between the currency in which the hedged Monthly Distribution-1 share class is denominated and the base currency of the Fund in determining the distribution to be paid. Investors should be aware that the uncertainty of relative interest rates which will have an impact on the return of the hedged Monthly Distribution-1 share class. The net asset value of the Monthly Distribution-1 hedged share class may fluctuate and may significantly differ from other share class due to the fluctuation of the interest rate differential between the currency in which the hedged Monthly Distribution-1 share class is denominated and the base currency of the Fund, and may result in an increase in the amount of distribution that is paid out of capital and hence a greater erosion of capital than other non-hedged share class. Investors in such share class may therefore be adversely affected.

■ Contingent convertibles risk

- Contingent convertible bonds are a type of debt security, issued by a financial institution that may be converted into equity or could be forced to suffer a write down of principal upon the occurrence of a pre-determined trigger event. The trigger event is ordinarily linked to the financial position of the issuer. In stressed market conditions, the liquidity profile of the issuer can deteriorate significantly and a significant discount may be required in order to sell the contingent convertible bonds.
- Contingent convertible bonds can carry higher risk than investment in traditional debt instruments/ convertibles and in certain cases equities since coupon payments may be discretionary and can be cancelled at any time for any reason.
- Contingent convertible bonds can also be exposed to several other risks, including but not limited to trigger level risk, capital structure inversion risk, call extension risk, unknown/uncertainty risk and valuation risk.

How has the Fund performed?

■ The historical performance shown in the chart above up to 5th October 2018 has been simulated based on the performance of a share class with the same features (e.g. investment objectives and strategy, risk profiles and fee structure) of another fund, which was merged into the Fund on that date.

■ (From 27 January 2020) The performance shown in the chart above was based on an investment objective and policy that no longer applies, with certain changes being made to the Fund on 27 January 2020.

- The Fund Manager views Class A fixed monthly distribution - USD (the "Share Class"), being the focus share class of the Fund available to the public of Hong Kong, as the most appropriate representative share class.
- Fund launch date: 08 October 2018.
- Share Class launch date: 08 October 2018.
- The base currency of the Fund is USD.
- Past performance of the Share Class is calculated in USD.
- Performance is calculated after deduction of ongoing charges and is inclusive of gross income reinvested. Any entry/exit charges shown are excluded from the calculation.
- Past performance is not a guide to future performance.
- Investors may not get back the full amount invested.
- The computation basis of the performance is based on the calendar year end, NAV-To-NAV, with dividend reinvested.
- These figures show by how much the Share Class increased or decreased in value during the calendar year being shown.

Is there any guarantee?

The Fund does not have any guarantees. You may not get back the full amount of money you invest.

What are the fees and charges?

Charges which may be payable by you

You may have to pay the following fees when dealing in the shares of the Fund.

Fee	What you pay	
Subscription fee/ Initial charge	Class A: Not exceeding 5.00% of the gross investment amount. Class B: N/A Class C: Not exceeding 5.00% of the gross investment amount.	
Switching fee	Up to 1.00% of the value of the shares being switched.	
Redemption fee	N/A	
Contingent Deferred Sales Charge ("CDSC") (Class B only)	Redemption during (during X years since purchase)	Applicable rate of CDSC [#]
	1st Year	Up to 4%
	2nd Year	Up to 3%
	3rd Year	Up to 2%
	4th Year	Up to 1%
	After end of 4th Year	None
	The CDSC will be calculated by reference to the lesser of (i) the current market value (based on the net asset value per share ruling on the date of redemption); or (ii) the acquisition cost of the Class B shares being redeemed.	
	[#] The actual rate is set out in the latest audited annual report and accounts of the SICAV and on the website at www.invesco.com.hk where it deviates from the maximum rate. This website has not been reviewed by the SFC.	

Ongoing fees payable by the Fund

The following expenses will be paid out of the Fund. They affect you because they reduce the return you get on your investments.

	Annual rate (as a % of the Fund's value)
Management fee*	Class A: 1.00% Class B: 1.00% Class C: 0.75%
Custodian fee/ Depositary charge	Up to 0.0075%
Performance fee	N/A
Administration fee	N/A
Distribution fee	Class A: N/A Class B: Up to 1.00% [#] Class C: N/A [#] The actual rate is set out in the latest audited annual report and accounts of the SICAV and on the website at www.invesco.com.hk where it deviates from the maximum rate. This website has not been reviewed by the SFC.
Service agents fee	Class A: Up to 0.27% Class B: Up to 0.20% Class C: Up to 0.20%

*The fees can be increased subject to the prior approval of the Securities and Futures Commission ("SFC") and by giving not less than three months' prior notice to the investors.

Other fees

You may have to pay other fees when dealing in the shares of the Fund.

Additional Information

- The compositions of the dividends (i.e. the relative amounts paid out of (i) net distributable income and (ii) capital) for the last 12 months are available from the Hong Kong Sub-Distributor and Representative on request and at www.invesco.com.hk. This website has not been reviewed by the SFC.
- You generally buy and redeem shares at the Fund's next-determined net asset value after the Hong Kong Sub-Distributor and Representative receives your request in good order on or before 5:00pm, Hong Kong time, being the Fund's dealing cut-off time. Before placing your subscription or redemption orders, please check with your distributor for the distributor's internal cut-off time (which may be earlier than the Fund's dealing cut-off time).
- The net asset value of the Fund is calculated each "Business Day" as defined in the Prospectus and the price of shares is published each Hong Kong business day (i.e. a day on which banks in Hong Kong are open for normal banking business) at www.invesco.com.hk. This website has not been reviewed by the SFC.
- Investors may obtain the past performance information of other share classes offered to Hong Kong investors at www.invesco.com.hk. This website has not been reviewed by the SFC.
- Investors may obtain other information of this product at www.invesco.com.hk. This website has not been reviewed by the SFC.
