	Class D3	EUR Hedged	0.62%
	Class D3	USD	0.63%
	The ongoing charges figure for a class is based on the costs and expenses of that class with reference to the annual report of the Fund for the year ended 31 August 2019.		
	For any share class marked ^, the ongoing charges figure is based on the costs and expenses for the 12-months period ended 31 January 2020. The ongoing charges figure of such share class is calculated based on the costs and expenses for the past 12-month period because the ongoing charge figure has varied by more than 5% from that calculated based on the annual report of the Fund for the year ended 31 August 2019.		

	The figure may vary from year to year.		
<b>Dealing frequency:</b>	Daily	<b>Financial year end:</b>	31 August
<b>Base currency:</b>	USD		
<b>Dividend policy:</b> (Class A, C and D as at the above date)	Non-Distributing Shares: No dividends will be declared or paid ▶ A2, C2, D2  Distributing Shares: Dividends, if declared will be paid in cash or reinvested ▶ Daily: A1, C1 ▶ Monthly: A3, C3, D3  All declared dividends result in an immediate decrease in the Fund’s net asset values per share on ex-date, whether paid in cash or reinvested.		
<b>Minimum investment:</b>	US\$5,000 initial, US\$1,000 additional for Class A and C Shares US\$100,000 initial, US\$1,000 additional for Class D Shares		

**What is this product?**

Global Government Bond Fund (the “Fund”) is a sub-fund of BlackRock Global Funds (“BGF”), an open-ended investment company incorporated in Luxembourg. Its home regulator is the Commission de Surveillance du Secteur Financier (CSSF).

**Objectives and Investment Strategy**

To maximise total return by investing at least 70% of the Fund’s total assets in investment grade\* bonds issued by governments/authorities worldwide.

The Fund may also invest in “To Be Announced” securities (“TBAs”). TBAs are mortgage-backed securities bought from a mortgage pool for a fixed price at a future date, where the exact security is not known but the main characteristics are specified, and can be either investment grade\* or non-investment grade.

Subject to applicable regulatory restrictions and internal guidelines, the remaining 30% may be invested in financial instruments of companies or issuers of any size in any sector of the economy globally such as debt and other securities consistent with the Fund’s objective, subject to the restriction that no more than 10% of the Fund’s assets will be invested in equities.

The Fund’s expected total maximum investment in debt instruments with loss-absorption features, including but not limited to contingent convertible bonds, will be less than 30% of its net asset value. These instruments may be subject to contingent write-down or contingent conversion to ordinary shares on the occurrence of trigger event(s). The Fund’s exposure to contingent convertible bonds is limited to 20% of its total assets.

The Fund may use derivatives for hedging, efficient portfolio management and investment purposes. The Fund may employ currency management and hedging techniques which may include hedging the currency exposure on the Fund’s portfolio and/or using more active currency management techniques such as currency overlays. Any active management techniques implemented by the Fund through the currency derivatives such as forward exchange contracts, currency futures and options may not be correlated with the primary underlying securities held by the Fund.

The proportion of the Fund’s net asset value that is expected to be subject to securities lending transactions from time to time ranges from 0% to 40% and will be consistent with the overall investment policy of the Fund.

**Use of Derivatives/Investment in Derivatives**

The Fund’s net derivative exposure may be more than 100% of the Fund’s net asset value.

\* Meaning, at the time of purchase BBB– (Standard & Poor’s or equivalent) or better by at least one recognised rating agency or, in the opinion of the Management Company, and, where applicable, based on the Internal Credit Quality Assessment Procedure, are of comparable quality.

## What are the key risks?

Investment involves risks. Please refer to the offering document for details including the risk factors.

### 1. Investment Risks

The Fund is an investment fund. The Fund's investment portfolio may fall in value due to any of the risk factors below and therefore your investment in the Fund may suffer losses.

### 2. Credit Risks

The Fund may be exposed to the credit/default risk of bonds that it invests in. In the event of bankruptcy or default of an issuer, the Fund may experience losses and incur costs.

The actual or perceived downgrading of a rated debt security or its issuers could decrease its value and liquidity, and may have an adverse impact on the Fund, however, the Fund may continue to hold it to avoid a distressed sale.

### 3. Interest Rate Risks

An increase in interest rates may adversely affect the value of the bonds held by the Fund.

### 4. Sovereign Debt Risks

Investment in bonds issued or guaranteed by governments or authorities may involve political, economic, default, or other risks, which may in turn have an adverse impact on the Fund. Due to these factors, the sovereign issuers may not be able or willing to repay the principal and/or interest when due.

Holders of defaulting sovereign debt may be requested to participate in the restructuring of such debt. In addition, there may be limited legal recourses available against the sovereign issuer in case of failure of or delay in repayment.

The Fund may have exposure to Eurozone sovereign debts. In light of the fiscal conditions of certain European countries, the Fund may be subject to a number of increased risks arising from a potential crisis in the Eurozone (such as volatility, liquidity, price and currency risks). The performance of the Fund could deteriorate should there be any adverse events in the Eurozone (e.g. downgrade of sovereign credit ratings, default of one or more European countries, or even break-up of the Eurozone).

### 5. Currency Risks

The Fund may invest in assets denominated in a currency other than the base currency of the Fund. Changes in exchange rates between such currency and the base currency and changes in exchange rate controls may adversely affect the value of the Fund's assets.

The Investment Adviser may utilise techniques and instruments (e.g. currency overlays) in relation to currencies other than the base currency with the aim of generating positive returns. Any active currency management techniques implemented by the Fund may not be correlated with the underlying securities held by the Fund. As a result, the Fund may suffer significant losses even if there is no loss to the value of the underlying securities held by the Fund.

### 6. Delayed Delivery Transactions Risks

TBAs may involve counterparty default risk and a risk that the agreed (fixed) price is higher than the prevailing market price at the settlement date. These may have an adverse impact on the value of the Fund.

### 7. Derivatives Risks

Risks associated with derivatives include counterparty/credit risk, liquidity risk, valuation risk, volatility risk and market risk. The leverage effect of derivatives can result in a loss significantly greater than the amount invested and extensive exposure to derivatives may lead to a significant loss by the Fund.

The Fund may have a net derivative exposure of more than 100% of its net asset value. This may magnify any potential impact of any negative change in the value of the underlying assets on the Fund and may also increase the volatility of the Fund's price and may lead to significant losses.

Certain derivatives such as derivatives on currencies may be uncorrelated with the underlying securities held by the Fund. In this regard the Fund may suffer significant losses notwithstanding that there may be no loss in respect of the underlying securities positions (predominantly fixed income securities) held by the Fund.

**8. Securities Lending Risks**

When engaging in securities lending, the Fund will have a credit risk exposure to the counterparties to any securities lending contract. Fund investments can be lent to counterparties over a period of time. A default by the counterparty combined with a fall in the value of the collateral below that of the value of the securities lent may result in a reduction in the value of the Fund.

**9. Contingent Convertible Bonds Risks**

A contingent convertible bond may be converted into the issuer's equity or be partly or wholly written off (a "write-down") if a pre-specified trigger event occurs. Trigger levels differ and the exposure to conversion risk depends on the distance of the capital ratio to the trigger level. In case of conversion into equity, the Fund might be forced to sell these new equity shares. Such a forced sale might have an effect on market liquidity as there may not be sufficient demand for these shares. In the event of a write-down, which may be either temporary or permanent, the Fund may suffer a full, partial or staggered loss of the value of its investment. It might be difficult for the Fund to anticipate the trigger events or how the securities will behave upon conversion.

Investment in contingent convertible bonds may suffer a loss of capital. Further, contingent convertible bonds are usually subordinated to comparable non-convertible securities, and thus are subject to higher risks than other debt securities. Coupon payments on certain contingent convertible bonds may be entirely discretionary and may be cancelled by the issuer, in which event the Fund may experience losses. Investment in contingent convertible bonds may also lead to increased industry concentration risk and thus counterparty risk as such securities are issued by a limited number of banks.

## How has the fund performed?

Historic performance to 31 December 2019

||| During this period the performance of the Fund was achieved under circumstances that no longer apply. In December 2019, the Fund updated its use of derivatives which may allow for a more extensive and flexible use of derivatives by the Fund.

**Notes:**

Past performance information is not indicative of future performance. You may not get back the full amount invested. The computation of the performance is based on the calendar year end, NAV-To-NAV, with dividend reinvested expressed as a % change. These figures show by how much the share class increased or decreased in value during the calendar year shown. Performance data has been calculated in USD, including ongoing charges and taxes and excluding subscription and redemption fees, if applicable. The past performance information reflects the performance of the A2 base currency share class which the Investment Adviser views as the most appropriate representative share class. Please refer to the website [www.blackrock.com/hk](http://www.blackrock.com/hk) for performance information regarding other share classes. This website has not been reviewed by the SFC.

† The benchmark of the Fund is FTSE World Government Bond USD Hedged Index (formerly known as Citigroup World Government Bond USD Hedged Index).

Fund launch date: 1987  
Share class launch date: 1987

## Is there any guarantee?

This Fund does not have any guarantees. You may not get back the full amount of money you invest.

## What are the fees and charges?

### Charges which may be payable by you

You may have to pay the following fees when dealing in the shares of the Fund:

Fee	What you pay
<b>Subscription Fee (Initial Charge)</b>	Class A and Class D Shares: up to 5% of the price of shares Class C Shares: Nil
<b>Switching Fee (Conversion Charge)</b>	Nil <sup>^</sup> , except a delayed Initial Charge of up to 5% of the price of Class A or Class D Shares may be payable upon switching newly acquired Shares in a Reserve Fund into this Fund
<b>Redemption Fee</b>	Nil <sup>^</sup>
<b>Contingent Deferred Sales Charge</b>	Class A and Class D Shares: Nil Class C Shares: 1% of the lower of the original investment amount or redemption proceeds if the Shares are held for less than one year

<sup>^</sup> A 2% charge on redemptions/conversions may be levied where excessive trading by a shareholder is suspected.

### Ongoing fees payable by the Fund

The following expenses paid by the Fund affect you because they reduce the return on your investments:
