

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

IFSL Ravenscroft Global Blue Chip Fund Class B Shares

A Sub-fund of the IFSL Ravenscroft OEIC (ISIN Income GB00BZ3T3X22, Accumulation GB00BZ3T3W15)

This Fund is managed by Investment Fund Services Limited (IFSL)

Objectives and Investment Policy

The aim of the Fund is to provide capital growth, that is, to increase the value of your investment, over a minimum of 5 years.

At least 80% of the Fund will be invested globally in the shares of companies.

The Fund is actively managed, which means the Investment Manager decides which investments to buy or sell and when. Investments will be made in large companies whose market capitalisation (the total market value of a company's shares) is in excess of £1billion.

The Fund may invest across a range of developed markets globally with no minimum exposure to any one market or geographical region although no more than 80% will be invested in any one country.

The Investment Manager focuses on high quality companies, typically in North American and European markets, that are expected to benefit from the increase in global population, rising wealth and/or developments in technology.

The size of the holding will be determined by the value offered by a company given its growth prospects. The intention is to hold shares for 3 years or more, although companies may be sold sooner if they no longer fit the Investment Manager's investment philosophy.

The Fund will typically hold a fairly concentrated portfolio of around 35 companies operating in a range of different sectors.

The Fund will normally be fully invested save for an amount to enable ready

settlement of liabilities (including redemption of shares) and efficient management of the Fund both generally and in relation to strategic objectives, however may hold higher cash balances (up to 20%) in extreme market conditions.

The Fund may also hold money market instruments (a type of short-term loan) and funds which invest in these instruments for liquidity management purposes.

The Fund may use derivatives and forward transactions linked to exchange rates for the purpose of reducing currency risk, also known as hedging, but it is anticipated this will be infrequent. The Fund seeks to obtain its objective by investing in the equity securities of large and diverse businesses, generally with a market cap in excess of £1billion and operating in multiple geographic locations and/or industry sectors.

The Investment Association (IA), the trade body for UK investment managers, has created a number of 'sectors', as a way of dividing funds into broad groups with similar characteristics.

The Fund's investment policy puts it in the IA Global sector. You may want to assess the Fund's performance compared to the performance of this sector.

The Fund pays income. If you wish to receive this please tell us. If you do not want to receive income you will be given accumulation shares which means income is invested back into the Fund and reflected in the price of your shares.

You can buy or sell all or part of your investment on any business day subject to the minimum holding requirements.

Risk and Reward Profile

This indicator aims to give you a measure of the price movement of this share class based on past data. It uses historic returns over the last five years. If five years' data is not available, simulated data based on a representative portfolio are used.

Past data may not be a reliable indication of the future risk profile of the Fund. The risk category may change in the future and is not guaranteed. The lowest category does not mean risk free. The value of investments and the income from them may fall as well as rise and you may not get back the amount you originally invested.

This Fund has been measured as 5 because its investments have experienced moderate to high volatility in the past. The Fund's volatility is affected by various risks, including:

The Fund will be exposed to financial markets and market conditions can change rapidly. Prices can move irrationally and be affected unpredictably by diverse factors, including political and economic events.

The Fund will have exposure to overseas markets, either directly or indirectly, and is therefore exposed to currency risk. As a result, the value of your investment can be affected by changes in exchange rates.

The Fund has a concentrated portfolio, which means it has greater exposure to a smaller number of assets. Therefore, the performance of a single investment in the Fund has a greater effect on the price of the Fund.

In certain market conditions, the Fund may not be able to sell one or more of its assets for the full value, or at all. This could affect the performance of the Fund and could cause the Fund to defer or suspend redemptions of its shares, meaning investors may not be able to have immediate access to their holdings.

A company that we deal with may renege on its obligations, costing the Fund money.

The Fund may enter into various financial contracts (known as derivatives) in an attempt to protect the value of the Fund's assets or to reduce the costs of investing, although this may not be achieved.

Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the Fund, or inconvenience to investors.

Investors are encouraged to read the 'risk factors' section of the Fund's prospectus to find a more extensive list of the risks that apply to this Fund.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The entry and exit charges shown are maximum figures. In some cases you may pay less - you can find this out from your financial adviser.

The ongoing charges figure is based on expenses as at 30/11/2023. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another collective investment undertaking.

For more information about charges, please see Sections 22 - 24 of the Fund's Prospectus, which is available at www.ifslfunds.com.

One-off charges taken before or after you invest

Entry Charge 0.00%

Exit Charge None

This is the maximum that might be taken out of your money before it is invested.

Charges taken from the fund over each year

Ongoing Charges 0.66%

Charges taken from the fund under certain conditions

Performance Fee None

Past Performance

Historic performance to 31 December 2023

Past performance is not a reliable indicator of future performance; the value of your investment and any income from it can go down as well as up.

Performance returns are based on the net asset value with distributable income reinvested and takes account of all ongoing charges, but not entry and exit charges. The past performance of this share class is calculated in GBP.

This Fund was launched on 3 July 2017.

This share class was launched on 3 July 2017.
