This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Wells Fargo (Lux) Worldwide Fund - Global Factor Enhanced Equity Fund,

a sub-fund of Wells Fargo (Lux) Worldwide Fund

Class I (EUR) Shares - acc. (hedged) (LU2087620956)

Management Company: Wells Fargo Asset Management Luxembourg S.A.

Objectives and Investment Policy

The fund seeks long-term capital appreciation by investing, under normal circumstances, at least two-thirds of its total assets in the common stock securities of companies located in the countries represented in the MSCI World Index which are listed, traded or dealt in on regulated markets worldwide. The fund will invest in the securities of companies located worldwide. The fund will invest in no fewer than three countries, which may include the United States, and may invest more than 25% of its total assets in any one country.

The fund may also use futures, forward contracts, options, or swap agreements, as well as other derivatives, for hedging or efficient portfolio management purposes.

The fund seeks to add value above the MSCI World Index using a systematic approach designed to build a portfolio of stocks that provides exposure to factors (or characteristics) (including, but not limited to, value, quality, momentum, size, and low volatility) commonly tied to a stock's potential for enhanced risk-adjusted returns relative to the market.

This share class does not distribute dividends. Income is reinvested in the fund.

This share class will seek to be 100% hedged to USD, however it may not be possible to always hedge the class 100% against fluctuations of the reference currency.

You may sell your shares on each business day when banks in Luxembourg are open for normal business and the New York Stock Exchange is open for trading (a "Business Day").

The fund is actively managed but uses the MSCI World Index as a reference for selecting investments and for performance comparison. The investments of the fund may deviate significantly from the components of and their respective weightings in the benchmark.

Risk and Reward Profile

This rating system is based on the volatility of the fund's returns over the past 5 years, using returns from a comparable existing share class for periods before the start of the class. Please note past returns may not be a reliable indicator of the future risk and reward profile of the fund; the rating may change over time based on future returns; and category 1 does not mean a risk-free investment.

Lower Risk

< Typically Lower Rewards

Higher Risk

Typically Higher Rewards >

1	2	3	4	5	6	7
---	---	---	---	---	---	---

The class is in category 6 because the average amount returns varied each year over the past 5 years was equal to or above 15.0% and less than 25.0%.

The following additional risks may impact the fund's returns:

Counter-Party Risk - The fund may incur a loss if the other party to an investment contract, such as a repurchase or reverse repurchase agreement or certain derivative contracts, fails to fulfill its contractual obligation to the fund.

Derivatives Risk - The fund may incur a loss if the other party to an investment contract, such as a derivative, fails to fulfill its contractual obligation to the Fund. The use of derivatives can lead to losses, particularly when they are used to enhance return rather than offset risk.

Market Risk - The market price of securities owned by the fund may go up or down, sometimes rapidly or unpredictably. A security may decline in value due to factors affecting the issuer or securities markets generally or particular industries represented in the securities markets.

Smaller Company Securities Risk - Securities of companies with smaller market capitalisations tend to be more volatile and less liquid than larger company stocks.

The fund may not achieve its objective and/or you could lose money on your investment in the fund. For more information about the fund's risks, please see "Investment Objectives and Policies" and "Risk Warnings" in the prospectus, which is available at wellsfargoassetmanagement.com.

Charges for this Fund

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distribution. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	None
Exit Charge	None
This is the maximum that might be taken out of your money before it is invested.	

Charges taken from the fund over a year	
Ongoing Charges	0.25%
Charges taken from the fund under certain specific conditions	
Performance Fee	None

The **entry** and **exit charges** shown are the highest possible charges you would pay. Please consult your advisor or distributor to find out your actual charges, which might be less. Because the class does not have twelve months of operating history, the **ongoing charges** reflect the total expense ratio cap put in place by the Investment Adviser. Any costs that would cause the capped total expense ratio to be exceeded will be absorbed by the Investment Adviser. **Ongoing charges** may vary from year to year. The **ongoing charges** do not include the portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking.

For more information about the fund's charges, please see "Fees and Expenses" in the prospectus.

Past Performance

Past performance is not a guide to future performance. Performance calculations are based on the net asset value, include ongoing charges but exclude entry and exit charges, if any, and are calculated in EUR with income reinvested. The base currency of the fund is USD.

Fund launch date: 2019. Share Class launch date: 2020.

No historical performance is available as this share class has not been invested for more than a full calendar year.

The chart shows performance against the MSCI World Index (USD). The fund does not track the index.
