ESG information

ESG approach - Integrated

ESG Integration is the systematic inclusion of financially material ESG factors, alongside other relevant factors, in investment analysis and investment decisions with the goals of managing risk and improving long-term returns. ESG integration does not by itself change this product's investment objective, exclude specific types of companies or constrain its investable universe. This product is not designed for investors who are looking for a product that meets specific ESG goals or wish to screen out particular types of companies or investments, other than those required by any applicable law such as companies involved in the manufacture, production or supply of cluster munitions.

Performance information

Source: J.P.Morgan Asset Management. Share class performance shown is based on the quoted price of the share class, assumes any net income was reinvested, and includes ongoing charges but not any entry or exit fees.

Indices do not include fees or operating expenses and you cannot invest in them.

The Yield reflects net distributions declared over the past 12 months

as a percentage of the quoted price at the date shown. It does not include the Entry charge and investors may be subject to tax on their distributions. Where a portion of the fund's expenses are charged to capital this has the effect of increasing the distribution for the year and constraining the fund's capital performance to an equivalent extent.

The performance shown prior the launch date of this share class relates to the A share class. The A share class performance has not been amended or simulated to adjust for the lower ongoing fees of the C share class.

Prior to 01/11/13 the benchmark was Russell 2000 Growth Index (Net of 30% withholding tax).

Definitions

NAV Net Asset Value of a fund's assets less its liabilities per Share. **Quoted Price** The single price at which all client orders are executed. **Morningstar Medalist Rating™** is the summary expression of Morningstar's forward-looking analysis of investment strategies as offered via specific vehicles using a rating scale of Gold, Silver, Bronze, Neutral, and Negative.

Analyst-Driven % Displays the percentage of Analyst's input into the overall rating assignment, including direct analyst coverage and inheritance of an analyst-rated pillar.

Data Coverage % Displays the percentage of available input data for rating calculation at the Pillar level.

Quartile ranking measures how well a fund has performed in the relevant Morningstar sector. 1st quartile means ranked in the top 25% of funds in the sector, 2nd quartile is the next 25% and so on.

Correlation measures the strength and direction of the relationship between movements in fund and benchmark returns. A correlation of 1.00 indicates that fund and benchmark returns move in lockstep in the same direction.

Alpha (%) a measure of excess return generated by a manager compared to the benchmark. An alpha of 1.00 indicates that a fund has outperformed its benchmark by 1%.

Beta measures a fund's sensitivity to market movements (as represented by the fund's benchmark). A beta of 1.10 suggests the fund could perform 10% better than the benchmark in up markets and 10% worse in down markets, assuming all other factors remain constant. Usually the higher betas represent riskier investments.

Annualised volatility (%) measures the extent to which returns vary up and down over a given period.

Sharpe ratio performance of an investment adjusting for the amount of risk taken (compared a risk-free investment). The higher the Sharpe ratio the better the returns compared to the risk taken.
