

SPP Generation 60-tal is a mixed fund which, with a large spread, invests in major equity and interest rate markets throughout the world. The fund is also a generation fund, which means that the older you get, the less risk the fund adopts. This is achieved by the fund having a pre-determined plan for the gradual reduction of the funds equity share, and respective gradual increase in the funds interest rate share over time. The de-escalation of the equity share takes place over a 20-year period, starting in 2020. When de-escalation begins in 2020, the funds equity share will amount to at least 80 per cent. The fund follows our criteria for sustainable investments. This means that we do not invest in companies that contribute to the violation of human rights, corruption, harming the climate and environment, the production of landmines, cluster munitions, or nuclear weapons. In addition, the Fund also refrain from investing in companies whose turnover is more than 5 percent from production/distribution from: fossil fuels, weapons/arms, tobacco, alcohol, gambling, pornography, cannabis and companies with large fossil reserves.
