You should be aware that the price of Units can go down as well as up. The value of the product and its dividends or coupons may rise or fall. The following are key risk factors that may cause you to lose some or all of your investment:	the Prospectus for further information on risks of the product.
Market and Credit Risks	
• You are exposed to market risk in the global markets. The price of securities comprised in the portfolio of the Fund and the Units, and the income from them, may be influenced by political and economic conditions, changes in interest rates, the earnings of the corporations whose securities	
<ul> <li>are comprised in the portfolio, and the market's perception of the securities.</li> <li>You are exposed to interest rate and credit risks. Investments in debt securities are subject to interest rate fluctuations and credit risks, such as risk of default by the issuer, and are subject to adverse changes in general economic conditions, the financial condition of the issuer, or both, or an unanticipated rise in interest rates, which may impair the issuer's ability to make payments of interest and principal, resulting in a possible default by the issuer.</li> <li>You are exposed to currency risk. As investments of the Fund may be denominated in foreign currencies other than the base currency of the Fund</li> </ul>
