Performance for additional share classes is shown later in this document.

Past performance is not a reliable indicator of future performance.

Source for performance: T. Rowe Price. Fund performance is calculated using the official NAV with dividends reinvested, if any. The value of the investment will vary and is not guaranteed. It will be affected by changes in the exchange rate between the base currency of the fund and the subscription currency, if different. Sales charges (up to a maximum of 5% for the A Class), taxes and other locally applied costs have not been deducted and if applicable, they will reduce the performance figures.

Please note that no management fees are charged to the Z, S and J share classes. No administration agent fees are charged to the J Class. No expenses or any other fees are charged to the Z class. Fee arrangements for the Z, S and J share classes are made directly with the investment manager. Please see the prospectus for further information.

Where the base currency of the fund differs from the share class currency, exchange rate movements may affect returns.

Hedged share classes (denoted by 'h', 'b' or 'n') utilize investment techniques to mitigate currency risk between the underlying investment currency(ies) of the fund and the currency of the hedged share class. The costs of doing so will be charged to the share class and there is no guarantee that such hedging will be effective.

Performance data will be displayed when a share class has more than 1 year history of returns.

This benchmark is shown for comparison purposes only.

Index returns are shown with net dividends reinvested.

KEY FUND RISKS

GENERAL FUND RISKS

General fund risks - to be read in conjunction with the fund specific risks above. **Capital risk** - the value of your investment will vary and is not guaranteed. It will be affected by changes in the exchange rate between the base currency of the fund and the currency in which you subscribed, if different. **Equity risk** - in general, equities involve higher risks than bonds or money market instruments. **ESG and Sustainability risk** - may result in a material negative impact on the value of an investment and performance of the fund. **Geographic concentration risk** - to the extent that a fund invests a large portion of its assets in a particular geographic area, its performance will be more strongly affected by events within that area. **Hedging risk** - a Fund's attempts to reduce or eliminate certain risks through hedging may not work as intended. **Investment fund risk** - investing in funds involves certain risks an investor would not face if investing in markets directly. **Management risk** - the investment manager or its designees may at times find their obligations to a fund to be in conflict with their obligations to other investment portfolios they manage (although in such cases, all portfolios will be dealt with equitably). **Operational risk** - operational failures could lead to disruptions of fund operations or financial losses.
