Fund performance is calculated on a total return basis, net of all fees and in GBP terms. The value of the underlying funds and the income generated from them can go down as well as up, and is not guaranteed. Investors may not get back the original amount invested. The value of investments involving exposure to foreign currencies can be affected by currency exchange rate fluctuations. The CPI +6% target was introduced in 2020. Past performance is not a guide to future performance.

MONTHLY COMMENTARY

- Equity markets continued to surprise on the upside with a gain in February of 5.1% in developed markets (MSCI World index) and 5.6% in emerging markets (MSCI Emerging Markets index).
- Notable performers over the month included Barclays (+11%), driven by in-line FY23 results and a new strategic plan aiming to enhance shareholder returns. The new strategy focuses on simplifying operations, emphasising growth in higher return segments like Private Banking & Wealth Management, which was well-received by investors. XPS Pensions (+10%) released a positive trading update indicating that the company's financial performance is on track to meet or exceed expectations for the fiscal year ending 31st March. Strong demand, particularly in pensions and consulting, driven by regulatory reforms and guaranteed minimum pension projects is expected to continue into FY2025.
- Japan has performed strongly this year with a return of 11.5% YTD, including 3.2% in February (GBP terms), marking a 34-year high for the Nikkei index. The Fund's exposure to Japanese equities via the Morant Wright Fuji Yield fund was a key contributor to returns with the fund returning 3.9% over February and 7.9% YTD.

OCF = Ongoing Charge Figure IC = Underlying charges of closed ended funds. The OCF is the total expenses paid by the Fund, annualised, against its average net asset value. The OCF will fluctuate as the average net assets and costs change.

Important note: The OCF calculation includes synthetic costs from underlying closed ended investments (IC) such as Investment Trusts, which optically increases the costs. For the avoidance of doubt the actual amount charged has not changed, and advisers and investors should refer to the KIID document available [here](#) for the actual fees payable.
