Schroder International Selection Fund Global Multi-Asset Income

A Distribution CNH Hedged | Data as at 30.06.2021

Fund objectives and investment policy

The fund aims to provide an income distribution of 5% per annum and capital growth over a market cycle by investing in a diversified range of assets and markets worldwide. The fund aims to provide a volatility (a measure of how much the fund's returns may vary over a year) of between 5-7% per annum.

This fund may use financial derivative instruments as a part of the investment process. Derivatives carry a high degree of risk and should only be considered by sophisticated investors.

Past Performance is not a guide to future performance and may not be repeated. The value of investments and the income from them may go down as well as up and investors may not get back the amounts originally invested. Exchange rate changes may cause the value of any overseas investments to rise or fall.

Fund (offer to bid)	4.3	5.0	4.8

Performance over 5 years (%)

Past performance and any forecasts are not necessarily a guide to the future or likely performance.

The value of investments and income from them can go down as well as up and is not guaranteed. The distributions are not guaranteed. Ordinarily, they will be reviewed annually. In the event of the Fund's income and realised gains being less than indicated distribution amount per unit per annum, distributions will be made from capital. Investors should be aware that the distributions may exceed the income and realised gains of the Fund at times and lead to a reduction of the amount originally invested, depending on the date of initial investment. Where 'since inception' performance figures are stated, please note that the inception date is the same as the share class launch date under 'Fund Facts'.
