

Global Investment Grade Credit Fund

- The Fund may invest primarily in investment grade corporate fixed income instruments.
- Investments in fixed income securities are subject to interest rate, credit and downgrade risks. The Fund is also subject to risks of investing in high yield, below investment grade and unrated securities.
- It is subject to the risks associated with investment, global investment, emerging markets, sovereign debt, mortgage-related and other asset-backed securities, currency, liquidity and repurchase / reverse repurchase transactions.
- It may invest more than 10% in non-investment grade securities issued or guaranteed by a single sovereign issuer (e.g. Sri Lanka and Hungary) which may be subject to increased credit risk and risk of default.
- It may invest extensively in financial derivative instruments which may involve additional risks (e.g. market, counterparty, liquidity, volatility, and leverage risks).
- It may at its discretion pay dividends out of capital directly or effectively, which amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to the original investment. Any distributions involving the payment of dividends out of the Fund's capital may result in an immediate reduction of the Fund's net asset value per share.
- Investments involve risks and your investment may suffer significant losses.
- Investors should not rely solely on this material and should read the offering document of the Fund for further details including the risk factors.

FUND DESCRIPTION

The Global Investment Grade Credit Fund is an actively managed portfolio that invests primarily in investment grade global corporate instruments. The fund is diversified broadly across industries, issuers, and regions on the basis of PIMCO's top-down and bottom-up processes.

The fund offers diversification benefits and greater income potential relative to government bonds or domestic corporate strategies while seeking to retain many of the defensive features of government bonds.

The fund looks to benefit from PIMCO's investment process, which combines our global top-down views on the macroeconomic environment with independent bottom-up security analysis. PIMCO's investment team has the experience and depth to actively manage a broad and diversified opportunity set.

Today our professionals work in 17 offices across the globe, united by a single purpose: creating opportunities for investors in every environment.

² Yields reported gross of fees, the deduction of which will reduce the yield. ³ Annualised distribution yield= (Dividend Rate * 4) / NAV on ex-dividend day. Annualised Distribution Yield is as of 31/03/2020. Dividend is not guaranteed. A positive distribution yield does not imply a positive return. ⁴ Where permitted by the investment guidelines stated in the portfolios offering documents, "other" may include exposure to, convertibles, preferred, common stock, equity-related securities, and Yankee bonds. Negative allocations may result from derivative positions and unsettled trades and does not imply the fund is short cash, is levered, or that the derivatives are not fully cash backed. Duration is the sensitivity of a fixed income security to a change in interest rates. The longer the duration of a fixed income security, the higher its sensitivity to interest rates. Duration Weighted Exposure (DWE%) is the percentage weight of each sector's contribution to the overall duration of the fund. Morningstar ratings are shown for funds with 4 or 5 star ratings only. Other share classes ratings are either lower or unavailable. A rating is not a recommendation to buy, sell or hold a fund. Copyright © 2020 Morningstar Ltd. All Rights Reserved. Investment involves risk. Past performance is not a guarantee or a reliable indicator of future results and no guarantee is being made that similar returns will be achieved in the future. Investment returns not denominated in US/HK dollar will expose US/HK dollar-based investors to exchange rate fluctuations. The Funds typically offer different share classes, which are subject to different fees and expenses (which may affect performance), have different minimum investment requirements and are entitled to different services. In an environment where interest rates may trend upward, rising rates will negatively impact most bond funds, and fixed income securities held by a fund are likely to decrease in value. Bond funds and individual bonds with a longer duration (a measure of the expected life of a security) tend to be more sensitive to changes in interest rates, usually making them more volatile than securities with shorter durations. PIMCO Funds: Global Investors Series plc is an umbrella type open-ended investment company with variable capital and is incorporated with limited liability under the laws of Ireland with registered number 276928.
