KEY PRODUCT FEATURES

WHAT ARE YOU INVESTING IN?

- You are investing in a sub-fund of BlackRock Global Funds (“BGF”).
- BGF is an open-ended investment company incorporated in Luxembourg and its home regulator is the Commission de Surveillance du Secteur Financier (CSSF).
- Non-Distributing Shares do not pay dividends whereas Distributing Shares pay dividends.
 - For Distributing (G), (R), (S) and (Y) Shares (if available): (i) dividends may come from capital of the Fund; (ii) this may reduce capital and the potential for capital growth of the Fund, and (iii) similar to other Distributing Shares, there is no guarantee of payout and the dividends may rise or fall.

Refer to “The Company” and “The Funds” of the Singapore Prospectus for further information on features of the product.

¹ The Prospectus is available for collection at the offices of the Singapore Representative during normal business hours or accessible at www.blackrock.com/sg.

Investment Strategy

- The Fund invests at least 70% of its total assets in high yield fixed income transferable securities denominated in US dollars. The Fund may invest in the full spectrum of available fixed income transferable securities, including non-investment grade. Currency exposure is flexibly managed.
- As part of its investment objective the Fund may invest up to 20% of its total assets in ABS and MBS whether investment grade or not. These may include asset-backed commercial paper, collateralised debt obligations, collateralised mortgage obligations, commercial mortgage-backed securities, credit-linked notes, real estate mortgage investment conduits, residential mortgage-backed securities and synthetic collateralised debt obligations. The underlying assets of the ABS and MBS may include loans, leases or receivables (such as credit card debt, automobile loans and student loans in the case of ABS and commercial and residential mortgages originating from a regulated and authorised financial institution in the case of MBS). The ABS and MBS in which the Fund invests may use leverage to increase return to investors. Certain ABS may be structured by using a derivative such as a credit default swap or a basket of such derivatives to gain exposure to the performance of securities of various issuers without having to invest in the securities directly.
- The Fund's exposure to Distressed Securities is limited to 10% of its total assets and its exposure to contingent convertible bonds is limited to 20% of total assets.
- The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management.

Refer to "Investment Objective, Policy and Strategy" and "Use of Derivatives and Securities Lending" of the Singapore Prospectus for further information on investment strategy.

KEY RISKS

WHAT ARE THE KEY RISKS OF THIS INVESTMENT?

The price of Shares of the Fund and any income from them may fall as well as rise.

These risk factors may cause you to lose some or all of your investment.

Refer to "Risk Factors" of the Singapore Prospectus for further information on risks of the product.

Market and Credit Risks

- **The Fund may be subject to Credit Risk of Issuers**
 - The Fund may be exposed to the credit/default risk of bonds that it invests in. In the event of bankruptcy or default of an issuer, the Fund may experience losses and incur costs.
 - The actual or perceived downgrading of a rated debt security or its issuer could decrease the value and liquidity of the security, and may have an adverse impact on the Fund. However, the Fund may continue to hold it to avoid a distressed sale.

- **The Fund may be subject to Interest Rate Risks**
 - An increase in interest rates may adversely affect the value of the bonds held by the Fund.
- **The Fund may be subject to Sovereign Debt Risks**
 - The Fund may invest in bonds issued or guaranteed by governments or authorities, which may involve political, economic, default, or other risks.

Liquidity Risks

- Redemptions may be suspended in certain circumstances detailed in the Prospectus.

Product-Specific Risks

- **The Fund may be subject to Derivatives Risks**
 - The use of derivatives may expose the Fund to a higher degree of risk. Derivative contracts can be highly volatile and a relatively small market movement may have a potentially larger impact on derivatives than on standard bonds or equities. Leveraged derivative positions can hence increase the Fund's volatility. The Fund may sustain loss as a result of the failure of a derivatives counterparty to comply with the terms of the derivatives contract.
- **The Fund may be subject to Non-Investment Grade Bonds Risks**
 - The Fund may invest in non-investment grade bonds. This may subject the Fund to higher credit/default risks, volatility and liquidity risks than investment grade bonds.
