### KEY PRODUCT FEATURES

#### WHAT ARE YOU INVESTING IN?

- You are investing in a sub-fund of BlackRock Global Funds ("BGF").
- BGF is an open-ended investment company incorporated in Luxembourg and its home regulator is the Commission de Surveillance du Secteur Financier (CSSF).
- Non-Distributing Shares do not pay dividends whereas Distributing Shares pay dividends.
  - o For Distributing (G), (R), (S) and (Y) Shares (if available): (i) dividends may come from capital of the Fund; (ii) this may reduce capital and the potential for capital growth of the Fund, and (iii) similar to other Distributing Shares, there is no guarantee of payout and the dividends may rise or fall.

Refer to "The Company" and "The Funds" of the Singapore Prospectus for further information on features of the product.

## Investment Strategy

- The Fund seeks to maximise total return by investing globally at least 70% of its total assets in the equity securities of companies engaged in any activity forming part of the food and agriculture value chain, including packaging, processing, distribution, technology, food and agriculture-related services, seeds, agricultural or food-grade chemicals and food producers. As part of this, the Fund invests in companies which are actively combatting global sustainability challenges within the nutrition theme. The three major sustainable nutrition trends in focus are: the promotion of healthy and sustainable eating choices, delivering efficiencies across global food supply chains, and enabling less resource intensive farming. The companies are rated by the Investment Adviser based on their ability to manage the risks and opportunities associated with the nutrition theme and their ESG risk and opportunity credentials, their ability to strategically manage longer-term issues surrounding ESG and the potential impact this may have on a company's financials. The assessment of the level of engagement in each activity may be based on percentage of revenue, a defined total revenue threshold, or any connection to a restricted activity regardless of the amount of revenue received.
- The Fund adopts a "best in class" approach to sustainable investing. This means that the Fund selects the best issuers (from an ESG perspective) for each relevant sector of activities (without excluding any sector of activities). More than 90% of the issuers of securities the Fund invests in are ESG rated or have been analysed for ESG purposes.
- The investment universe of the Fund is represented by any company worldwide which, in the opinion of the Investment Adviser, prioritises changing consumer preferences towards nutrition as a key strategic driver of its business ("Factset Nutrition Universe"). The weighted average ESG rating of the Fund will be higher than the ESG rating of the Factset Nutrition Universe after eliminating at least 20% of the least well-rated securities from the Factset Nutrition Universe.
- The Fund may invest directly up to 20% of its total assets in the PRC by investing via the Shanghai-Hong Kong Stock Connect and the Shenzhen-Hong Kong Stock Connect.
- The Fund's exposure to contingent convertible bonds is limited to 5% of its total assets.
- The Fund may use derivatives for investment purposes and for the purposes of efficient portfolio management. Any ESG rating or analyses referenced above will apply only to the underlying securities of derivatives used by the Fund.

Refer to "Investment Objective, Policy and Strategy" and "Use of Derivatives and Securities Lending" of the Singapore Prospectus for further information on investment strategy.
