### What is this product?

World Technology Fund (the “Fund”) is a sub-fund of BlackRock Global Funds (“BGF”), an open-ended investment company incorporated in Luxembourg. Its home regulator is the Commission de Surveillance du Secteur Financier (CSSF).

### Objectives and Investment Strategy

To maximise total return by investing at least 70% of the Fund’s total assets in stocks of companies worldwide with the majority of their business in the technology sector.

The Fund may also invest in emerging markets (such as Brazil, South Africa and South Korea).

Subject to applicable regulatory restrictions and internal guidelines, the remaining 30% may be invested in financial instruments of companies or issuers of any size in any sector of the economy globally such as equity securities consistent with the Fund’s objective and cash.

The Fund’s expected total maximum investment in debt instruments with loss-absorption features, including but not limited to contingent convertible bonds, will be less than 30% of its net asset value. These instruments may be subject to contingent write-down or contingent conversion to ordinary shares on the occurrence of trigger event(s).

The Fund may use derivatives for hedging, efficient portfolio management and investment purposes.

### Use of Derivatives/Investment in Derivatives

The Fund’s net derivative exposure may be up to 50% of the Fund’s net asset value.

### What are the key risks?

**Investment involves risks. Please refer to the offering document for details including the risk factors.**

**1. Investment Risks**

The Fund is an investment fund. The Fund’s investment portfolio may fall in value due to any of the risk factors below and therefore your investment in the Fund may suffer losses.

**2. Equity Risk**

The values of equities fluctuate daily and a Fund investing in equities could incur significant losses. The price of equities can be influenced by many factors at the individual company level, as well as by broader economic and political developments, including changes in investment sentiment, trends in economic growth, inflation and interest rates, issuer-specific factors, corporate earnings reports, demographic trends and catastrophic events.

**3. Limited Market Sectors Risks**

The Fund’s investments are concentrated in the technology sector. This may subject the Fund to greater volatility and more rapid cyclical changes than more broad-based investments.

**4. Currency Risks**

The Fund may invest in assets denominated in a currency other than the base currency of the Fund. Changes in exchange rates between such currency and the base currency and changes in exchange rate controls may adversely affect the value of the Fund’s assets.

**5. Derivatives Risks**

In an adverse situation, if the use of derivatives for hedging and efficient portfolio management becomes ineffective, the Fund may suffer significant losses.

**6. Emerging Market Risks**

Investment in emerging markets may be subject to a higher than average volatility than more developed markets due to greater political, tax, economic, social, and foreign exchange risks.

The size and trading volume of securities markets in emerging markets may be substantially smaller than developed markets. This may subject the Fund to higher liquidity and volatility risks.

Custody and registration of assets in emerging markets may be less reliable than in developed markets, which may subject the Fund to higher settlement risk.

The Fund may be subject to higher regulatory risks due to low level of regulation, enforcement of regulations and monitoring of investors' activities in emerging markets.

**7. Foreign Investments Restrictions Risks**

Some countries prohibit or restrict investment, or the repatriation of income, capital or the proceeds from sale of securities. The Fund may incur higher costs investing in these countries. Such restrictions may delay the investment or repatriation of capital of the Fund.

**8. Small Cap Companies Risks**

Many small company stocks trade less frequently and in smaller volume, and may be subject to more abrupt or erratic price movements than stocks of large companies. The securities of small companies may also be more sensitive to market changes than the securities of large companies.

**9. Liquidity Risks**

The size and trading volume of securities in the markets relevant to the Fund may be substantially smaller than developed markets. This may lead to investments in such securities becoming less liquid, making it difficult to dispose of them which may reduce the Fund's returns/lead to losses for investors.

## How has the fund performed?

Historic performance to 31 December 2019

**Notes:**

Past performance information is not indicative of future performance. You may not get back the full amount invested. The computation of the performance is based on the calendar year end, NAV-To-NAV, with dividend reinvested expressed as a % change. These figures show by how much the share class increased or decreased in value during the calendar year shown. Performance data has been calculated in USD, including ongoing charges and taxes and excluding subscription and redemption fees, if applicable. The past performance information reflects the performance of the A2 base currency share class which the Investment Adviser views as the most appropriate representative share class. Please refer to the website [www.blackrock.com/hk](http://www.blackrock.com/hk) for performance information regarding other share classes. This website has not been reviewed by the SFC.
