

GodFond Sverige & Världen is an equity fund that aims to track developments in the Swedish and global equity market, including developed countries and emerging markets. The fund is managed as an index tracking fund and does not adopt any active positions versus the market. The fund optimizes the selection of companies that ranked high in sustainability based on our standard for sustainable investments. Our standard for sustainable investments means, among other things, that we refrain from investing in companies that are in breach of international standards and conventions. These include human rights, labour law and international law, corruption and financial crime, serious climate and environmental damage, and controversial weapons (land mines, cluster bombs and nuclear weapons). We also exclude companies where more than 5 per cent of net sales come from the production and/or distribution of fossil fuels, tobacco, weapons, alcohol, gambling, pornography, cannabis, or companies with large fossil reserves.
