*This figure is based on actual expenses incurred for the year ended 31 March 2020. It represents the sum of the ongoing expenses chargeable to the relevant share class expressed as a percentage of the average net asset value of the relevant share class. This figure may vary from year to year. It does not include any extraordinary expenses.

**This share class was launched but is currently inactive. This figure represents the Principal Investment Manager's best estimate of the ongoing charges of the share class over a year based on the information available in respect of another active share class of the Sub-Fund with a similar fee structure. This figure may vary from year to year.

What is this product?

Mirae Asset China Sector Leader Equity Fund (the "Sub-Fund") is a sub-fund of Mirae Asset Global Discovery Fund which is a mutual fund domiciled in Luxembourg and its home regulator is the Commission de Surveillance du Secteur Financier (CSSF).

Objective and Investment Strategy

Objective

The primary objective of the Sub-Fund is to achieve long term growth in the share price through

capital appreciation, measured in US Dollars, of the underlying equity portfolio.

Strategy

The Investment Manager will seek to achieve the objective of the Sub-Fund by investing mainly in equities and equity related securities (such as but not limited to shares and depository receipts) of sector leading companies domiciled in or exercising a large portion of their business in China and Hong Kong.

Securities of “sector leading companies” refer to securities that are highly ranked (usually means first or second), or expects to be highly ranked in the future, in terms of market share, earnings or market capitalization within their respective country, region, industry, products produced or services offered.

The Sub-Fund’s direct investments in China A-Shares (including those listed on the Small and Medium Enterprise Board, the ChiNext Board and/or the Science and Technology Innovation Board) through the Shanghai-Hong Kong Stock Connect and the Shenzhen-Hong Kong Stock Connect programs (the “Stock Connect”) (as further described in the section headed “Additional disclosure in relation to Stock Connect” in the Information for Hong Kong Investors) shall be up to 100% of its net assets. The Sub-Fund may also make indirect investments in China A-Shares via access products. In aggregate the Sub-Fund may invest up to 100% of its net assets in China A-Shares (through direct and indirect investment) and/or China B-Shares.

The Sub-Fund is actively managed and references the MSCI China All Shares Index (the “Benchmark”) by seeking to outperform it. There are no restrictions on the extent to which the Sub-Fund’s portfolio may deviate from the one of the Benchmark.

The Sub-Fund may use financial derivative instruments for efficient portfolio management and hedging purposes only.

Use of derivatives / investment in derivatives

The Sub-Fund’s net derivative exposure may be up to 50% of the Sub-Fund’s net asset value.

What are the key risks?

Investment involves risks. Please refer to the Hong Kong offering document for details including the risk factors.

1. Risk of investing in China

- Investing in China can be significantly affected by general economic and political conditions and changes in government policy in China. The investment may also be sensitive to regulatory developments, tax law and practice in China and fluctuations in the rate of exchange of Renminbi.
- Investment in China also carries a higher risk than investment in a developed market (e.g. investment and repatriation restrictions, currency fluctuations, government involvement in the private sector, investor disclosure requirements, possibility of limited legal recourse and higher liquidity risk).

2. Single Country risk

- The Sub-Fund invests mainly in China and Hong Kong, its investment is not as diversified as regional funds or global funds. The Sub-Fund tends to be more volatile than regional funds or global funds and its portfolio value can be exposed to country specific risks.

3. Currency / Foreign exchange risk

- Underlying investments of the Sub-Fund may be denominated in currencies other than the base currency of the Sub-Fund. Also, a class of shares may be designated in a currency other than the base currency of the Sub-Fund. The net asset value of the Sub-Fund may be affected unfavorably by fluctuations in the exchange rates between these currencies and the base currency and by changes in exchange rate controls.

4. Risk of investing in equities and equity related securities

- The Sub-Fund invests mainly in equities and equity related securities and the value of the Sub-Fund may be affected by changes in the stock markets, changes in the value of individual portfolio securities, as well as by economic, political, and issuer specific changes. At times, stock markets and individual securities can be volatile and prices can change substantially in short periods of time.

5. Risks related to investments through the Stock Connect

- The relevant rules and regulations on the Stock Connect are subject to change which may have potential retrospective effect. The Stock Connect is subject to quota limitations. Where a suspension in the trading through the Stock Connect is effected, the Sub-Fund's ability to invest in China A-Shares or access the PRC market through the Stock Connect will be adversely affected. In such event, the Sub-Fund's ability to achieve its investment objective could be negatively affected.

6. Risks associated with Small and Medium Enterprise Board, the ChiNext Board and/or the Science and Technology Innovation Board

- The Sub-Fund may invest in the Small and Medium Enterprise Board ("SME Board") and/or the ChiNext Board of the Shenzhen Stock Exchange via the Shenzhen-Hong Kong Stock Connect and/or the Science and Technology Innovation Board ("STAR Board") of the Shanghai Stock Exchange via the Shanghai-Hong Kong Stock Connect. Investments in the SME Board, ChiNext Board and/or the STAR Board may result in significant losses for the Sub-Fund and its investors, and will be subject to additional risks, including higher fluctuation on stock prices and liquidity risk, over-valuation risk, differences in regulations, delisting risk and concentration risk.
- Higher fluctuation on stock prices and liquidity risk - listed companies on the SME Board, STAR Board and/or ChiNext Board are usually of emerging nature with smaller operating scale. In particular, listed companies on ChiNext Board and STAR Board are subject to wider price fluctuation limits, and due to higher entry thresholds for investors may have limited liquidity, compared to other boards. Hence, companies listed on these boards are subject to higher fluctuation in stock prices and liquidity risks and have higher risks and turnover ratios than companies listed on the main board of the Shenzhen Stock Exchange or the Shanghai Stock Exchange.
- Over-valuation risk - stocks listed on the SME Board, STAR Board and/or ChiNext Board may be overvalued and such exceptionally high valuation may not be sustainable. Stock price may be more susceptible to manipulation due to fewer circulating shares.
- Differences in regulations - the rules and regulations regarding companies listed on ChiNext Board and STAR Board are less stringent in terms of profitability and share

capital than those in the main board and SME Board.

- Delisting risk - it may be more common and faster for companies listed on the SME Board, STAR Board and/or ChiNext Board to delist. In particular, ChiNext Board and STAR Board have stricter criteria for delisting compared to other boards. This may have an adverse impact on the Sub-Fund if the companies that it invests in are delisted.
- Concentration risk - STAR Board is a newly established board and may have a limited number of listed companies during the initial stage. Investments in STAR Board may be concentrated in a small number of stocks and subject the Sub-Fund to higher concentration risk.

7. Risks related to investment in Mainland equity securities and PRC tax risks

- The Sub-Fund may invest in China and may be subject to the risks of investing in emerging markets generally as well as country specific risks relating to China.
- The value of the Sub-Fund may be more susceptible to adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory event affecting mainland China.
- There are risks and uncertainties associated with the current PRC tax laws, regulations and practice in respect of capital gains realized via the Stock Connects or access products on the Sub-Fund's investments in the PRC (which may have retrospective effect). Any increased tax liabilities on the Sub-Fund may adversely affect the Sub-Fund's value.
- Based on professional and independent tax advice, the Sub-Fund will not make tax provision for realized and unrealized capital gain derived from China A-Shares.

8. RMB currency and conversion risks

- RMB is currently not a freely convertible currency and is subject to currency exchange control and repatriation policies of the Chinese government.
- Although offshore RMB (CNH) and onshore RMB (CNY) are the same currency, they trade at different rates. Any divergence between CNH and CNY may adversely impact investors.

9. Risk of financial derivative instruments

- The use of financial derivatives instruments may expose the Sub-Fund to higher risks including market volatility risk, credit risk, counterparty risk and liquidity risk. In adverse situation, the use of financial derivative instruments in effective portfolio management and hedging purposes may become ineffective and the Sub-Fund may suffer significant losses.

10. Risk of Foreign Account Tax Compliance Act ("FATCA")

- The Sub-Fund will endeavour to satisfy the requirements imposed by FATCA to avoid the imposition of FATCA withholding tax. In the event that the Sub-Fund is not able to comply with the requirements imposed by FATCA and the Sub-Fund suffers US withholding tax on its US investments (if any) as a result of non-compliance, the Sub-Fund may be adversely affected and may suffer significant loss as a result.

11. Investment risk

- The Sub-Fund is an investment fund. The Sub-Fund's investment portfolio may fall in value and therefore your investment in the Sub-Fund may suffer losses.

How has the Sub-Fund performed?

On 10 August 2020, the Sub-Fund's investment policy was amended to permit greater exposure to China A-Shares through Stock Connect. Performance prior to 10 August 2020 was achieved under circumstances that no longer apply.

■ Class A - Capitalization: USD
■ Benchmark

- Share class[^]: Class A - USD
- Past performance information is not indicative of future performance. Investors may not get back the full amount invested.
- The computation basis of the performance is based on the calendar year end, NAV-to-NAV, with dividends (if any) reinvested.
- These figures show by how much the share class increased or decreased in value during the calendar year shown. Performance data has been calculated in USD including ongoing charges and excluding subscription fee and redemption fee you might have to pay.
- The Sub-Fund launch date: 22 July 2008
- Share class launch date: 2 September 2009
- Prior to 10 August 2020, the benchmark is MSCI China 10/40 Index. With effect from 10 August 2020, the benchmark is MSCI China All Shares Index. The benchmark changed to MSCI China All Shares Index because it is considered to be more reflective of the Sub-Fund's investment policy and strategy.
- [^] The Principal Investment Manager views Class A – USD as the most appropriate representative share class as it is the share class available to all investors in Hong Kong and is denominated in the Sub-Fund's base currency.

Is there any guarantee?

The Sub-Fund does not have any guarantees. You may not get back the full amount of money you invest.

What are the fees and charges?

Charges which may be payable by you

You may have to pay the following fees when dealing in the shares of the Sub-Fund.
