

## Investment Objective

- Trade with your local broker in your own currency (no FX charges).
- Physically-backed: all monies invested in Microsoft Corp.
- Liquid. Multiple market makers guarantee intraday liquidity.
- Simple to trade: like any other stock – but simpler (no need for W-8BENs).

## Risk Warnings

The value of an investment in ETPs may go down as well as up and past performance is not a reliable indicator of future performance. An investment in ETPs is dependent on the performance of the underlying assets of the relevant investment strategy, less costs, but it is not expected to match that performance precisely. ETPs are products which feature specific risks that prospective investors should understand before investing in them.

Securities issued by the Issuer are products involving a significant degree of risk and may not be suitable for all types of investor. Any decision to invest should be based on the information contained in the Relevant Prospectus of the Issuer (or any supplements thereto) which includes, inter alia, information on certain risks associated with an investment. The price of any securities may go up or down and an investor may not get back the amount invested. Securities are priced in US Dollars/Euros/Pounds and the value of the investment in other currencies will be affected by exchange rate movements.

Please refer to the section entitled "Risk Factors" in the relevant prospectus for further details of these and other risks associated with an investment in exchange-traded products. You should consult an independent investment adviser prior to making an investment in exchange-traded products in order to determine its suitability to your circumstances.
