Risk Considerations

- Franklin Gold and Precious Metals Fund invests principally in securities of gold and precious metals operation companies worldwide and across the entire market capitalization spectrum.
- The Fund is subject to market risk, equity risk, preferred securities risk, warrants risk, convertible securities risk, depositary receipts risk, foreign currency risk, emerging markets risk, liquidity risk, gold and precious metals sector risk, single sector risk, smaller- and mid-sized companies risk and counterparty risk.
- Emerging markets may involve increased risks and special considerations not typically associated with investment in more developed markets. The risks of investing in emerging markets, which can adversely affect and/or result in a substantial loss to the Fund, may include: liquidity risks, currency risks/control, political and economic uncertainties, legal and taxation risks, settlement risks, custody risk and the likelihood of a high degree of volatility.
- The Fund may at its discretion pay dividends out of the capital or out of gross income of the Fund while paying all or part of the Fund's fees and expenses out of the capital of the Fund, which results in effectively paying dividends out of capital. Payment of dividends out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any distributions involving payment of dividends out of the Fund's capital or payment of dividends effectively out of the Fund's capital (as the case may be) may result in an immediate reduction of the net asset value per share.
- Investment involves risks which may result in loss of part or entire amount of your investment. Before you decide to invest, you should make sure the intermediary has explained to you that the Fund is suitable to you. Investors should not only base on this marketing material alone to make investment decisions.
