

Template pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:

## Allianz Capital Plus

Legal entity identifier: 549300XT1DVY4H170178

### Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Does this financial product have a sustainable investment objective?

☒ ☐ Yes

☒ ☐ No

☐ It will make a minimum of **sustainable investments with an environmental objective: \_\_%**

☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of **1.50%** of sustainable investments

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ with a social objective

☐ It will make a minimum of **sustainable investments with a social objective \_\_%**

☐ It promotes E/S characteristics, but **will not make any sustainable investments**

### What environmental and/or social characteristics are promoted by this financial product?

Allianz Capital Plus (the "Sub-Fund") promotes a broad range of environmental and/or social characteristics. The Sub-Fund invests at least 90% of its assets following the "Multi Asset Sustainability Strategy" which includes, but is not limited to, various sustainability strategies of the management company and/or, invests in Green Bonds and/or Social Bonds, and/or Sustainability Bonds and/or SFDR Article 8 & 9 Target Funds ("SFDR Target Funds").

Depending on the sustainability strategy selected by the Investment Manager the promoted environmental and/or social characteristics could comprise environmental, social, human rights, governance, business behaviour factors or investments in companies providing solutions that create positive environmental and social outcomes.

In addition, sustainable minimum exclusion criteria for direct investments apply.

No reference benchmark has been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Sub-Fund.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

#### • What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

As part of the Multi Asset Sustainability Strategy the Investment Manager allocates at least 90% of Fund's assets in various sustainability approaches.

To measure the attainment of the environmental and/or social characteristics the following sustainability indicators are used and reported on, at the fiscal year end:

- The actual percentage of the Sub-Fund's assets invested in Green Bonds, and/or Social Bonds, and/or Sustainability Bonds and/or in SFDR Target Funds and/or in Equities and/or Debt Securities in accordance with the Multi Asset Sustainability Strategy.
- In case the Investment Manager decides to directly invest in Debt or Equity Securities as part of the Multi Asset Sustainability Strategy the adherence to the respective binding element will be reported.
- Confirmation that Principal Adverse Impacts (PAIs) of investment decisions on sustainability factors are considered through the application of exclusion criteria (with exception of cash, derivatives, external Target Funds and internal Target Funds not following a sustainability strategy).

- **What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?**

Sustainable investments contribute to environmental and/or social objectives, for which the Investment Manager uses as reference frameworks, among others, the UN Sustainable Development Goals (SDGs), as well as the objectives of the EU Taxonomy:

1. Climate Change Mitigation
2. Climate Change Adaptation
3. Sustainable Use and Protection of Water and Marine Resources
4. Transition to a Circular Economy
5. Pollution Prevention and Control
6. Protection and Restoration of Biodiversity and Ecosystems

The assessment of the positive contribution to the environmental or social objectives is based on a proprietary framework which combines quantitative elements with qualitative inputs from internal research. The methodology applies first a quantitative breakdown of a securities issuer into its business activities. The qualitative element of the framework is an assessment if business activities contribute positively to an environmental or a social objective.

To calculate the positive contribution on the Sub-Fund level the revenue share of each issuer attributable to business activities contributing to environmental and/or social objectives is considered provided the issuer is satisfying the Do No Significant Harm (“DNSH”) and Good Governance principles, and an asset-weighted aggregation is performed as a second step. Moreover, for certain types of securities, which finance specific projects contributing to environmental or social objectives the overall investment is considered to contribute to environmental and/or social objectives, but also for these a DNSH as well as a Good Governance check for issuers is performed.

- **How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?**

In order to ensure that Sustainable Investments do not significantly harm any other environmental and/or social objective, the Investment Manager is leveraging the PAI indicators, whereby significance thresholds have been defined to identify significantly harmful issuers. Issuers not meeting the significance threshold can be engaged for a limited time period to remediate the adverse impact. Otherwise, if the issuer does not meet the defined significance thresholds twice subsequently or in case of a failed engagement, it does not pass the DNSH assessment. Investments in securities of issuers which do not pass the DNSH assessment are not counted as sustainable investments.

#### Principal adverse impacts

are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How have the indicators for adverse impacts on sustainability factors been taken into account?***

All mandatory PAI indicators are considered either as part of the application of the exclusion criteria or through thresholds on a sectorial or absolute basis. Significance thresholds have been defined and they refer to qualitative or quantitative criteria.

Recognizing the lack of data coverage for some of the PAI indicators equivalent data points are used to assess PAI indicators when applying the DNSH assessment, when relevant, for the following indicators for corporates: share of non-renewable energy consumption and production, activities negatively affecting biodiversity-sensitive areas, emissions to water, lack of processes and compliance mechanisms to monitor compliance with UNGC principles and OECD Guidelines for Multinational Enterprises; for sovereigns: GHG Intensity and investee countries subject to social violations. In case of securities which finance specific projects contributing to environmental or social objectives equivalent data at project level might be used to ensure that Sustainable Investments do not significantly harm any other environmental and/or social objective. The Investment Manager will strive to increase data coverage for PAI indicators with low data coverage by engaging with issuers and data providers. The Investment Manager will regularly evaluate whether the availability of data has increased sufficiently to potentially include assessment of such data in the investment process.

- ***How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

The Investment Manager’s sustainable minimum exclusion list screens out companies based on their involvement in controversial practices against international norms. The core normative framework consists of the Principles of the UN Global Compact, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles for Business and Human Rights. Securities issued by companies having a severe violation of these frameworks will be restricted from the investment universe.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.*

*The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.*

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

☐ No

The Management Company has joined the Net Zero Asset Manager Initiative and considers PAI indicators through stewardship including engagement, both are relevant to mitigate potential adverse impact as a company.

Due to the commitment to the Net Zero Asset Manager Initiative, the Management Company aims to reduce greenhouse gas emissions in partnership with asset owner clients on decarbonisation goals, consistent with an ambition to reach net zero emission by 2050 or sooner across all assets under management. As part of this objective the Management Company will set an interim target for the proportion of assets to be managed in line with the attainment of net zero emissions by 2050 or sooner.

The Sub-Fund's Investment Manager addresses PAI indicators regarding greenhouse gas emission, biodiversity, water, waste as well as social and employee matters for corporate issuers, and, where relevant, the freedom house index is applied to investments in sovereigns. PAI indicators are considered within the Investment Manager's investment process through the means of exclusions as described in the “binding elements” section of the Sub-Fund.

The data coverage for the data required for the PAI indicators is heterogenous. The data coverage related to biodiversity, water and waste is low and the related PAI indicators are considered through exclusion of securities issued by companies having a severe violation / breach of principles and guidelines such as the Principles of the United Nations Global Compact, the OECD Guidelines for Multinational Enterprises, and the United Nations Guiding Principles for Business and Human Rights on the grounds of problematic practices around human rights, labour rights, environment, and corruption issues. Therefore, the Investment Manager will strive to increase data coverage for PAI indicators with low data coverage. The Investment Manager will regularly evaluate whether the availability of data has increased sufficiently to potentially include assessment of such data in the investment process.

The following PAI indicators are considered:

Applicable to corporate issuers

- GHG Emissions
- Carbon footprint
- GHG Intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Activities negatively affecting biodiversity-sensitive areas
- Emissions to water
- Hazardous waste ratio
- Violation of UN Global compact principles
- Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles
- Board gender diversity
- Exposure to controversial weapons

Applicable to sovereign and supranational issuers

- Investee countries subject to social violations

The information on the PAI indicators will be available in the end-year report of the Sub-Fund.

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

### What investment strategy does this financial product follow?

Allianz Capital Plus's investment objective is to invest in European equity and bond markets in accordance with the Multi Asset Sustainability Strategy. A Sub-Fund managed according to the Multi Asset Sustainability Strategy (“MAS Strategy”) invests in (i) Equities and / or Debt Securities of companies that either provide for environmental and/or social characteristics and/or pursue activities contributing to an environmental or social objective and / or invests (ii) in Green Bonds and/or Social Bonds, and/or in Sustainability Bonds and/or (iii) in SFDR Target Funds.

In case of direct investments in Equities and/or Debt Securities, the Sub-Fund's Investment Manager may choose one or more of the below strategies that promote environmental and/or social characteristics and/or pursue activities contributing to an environmental or social objective:

### **SRI Strategy**

The Sub-Fund or strategy promotes environmental and social characteristics through integrating environmental, social, human rights, governance, and business behaviour factors into the Sub-Fund's investment process through a best-in-class approach. This encompasses the evaluation of corporate or sovereign issuers based on an SRI Rating that it is used to construct the portfolio.

### **SDG-Aligned & SDG-Aligned Type A Strategy**

The Sub-Fund's or strategy's Sustainable Investment objective is to invest in Equities and/or in Debt Securities of companies providing solutions that create positive environmental and social outcomes, as assessed by the contribution of companies' outputs to the attainment of one or more of the SDGs or other Sustainable Investment objectives, which the Sub-Fund's Investment Manager may additionally determine and to which the companies contribute to.

### **Green Bond Strategy**

The Sub-Fund's or strategy's Sustainable Investment objective is to mobilize capital markets towards the transition to a low carbon society, natural capital preservation and adaptation to climate change. The Sub-Fund or strategy invests primarily in Green Bonds financing climate change mitigation or adaptation projects or other environmental sustainability projects, notably in the following fields: energy efficiency, renewable energy, raw materials, water and land, waste management, greenhouse gas emissions reduction, biodiversity preservation or circular economy.

### **Green Transition Strategy**

The Sub-Fund or strategy promotes environmental and/or social characteristics through the mobilization of capital markets towards the transition to a low carbon society, natural capital preservation and adaptation to climate change.

### **KPI Strategy (Absolute)**

A Sub-Fund or strategy managed according to the Sustainability Key Performance Indicator Strategy (Absolute) ("KPI Strategy (Absolute)") promotes environmental objectives by applying an investment objective related to an environmental key performance indicator referred to as "Sustainability KPI" to provide transparency on the measurable sustainability outcome pursued. The "Sustainability KPI" to be measured is the GHG Intensity defined by the Weighted Average GHG Intensity (Sales) of issuers included in the Fund's portfolio. GHG Intensity will be addressed by ensuring a pre-determined year-on-year improvement pathway of the weighted average GHG Intensity on Fund's portfolio level at the Fund's fiscal year ends.

### **KPI Strategy (Relative)**

A Sub-Fund or strategy managed according to the Sustainability Key Performance Indicator Strategy (Relative) ("KPI Strategy (Relative)") promotes environmental objectives by applying an investment objective related to an environmental key performance indicator referred to as "Sustainability KPI" to provide transparency on the measurable sustainability outcome pursued. The "Sustainability KPI" to be measured is the GHG Intensity of issuers acquired by the Fund defined by the Weighted Average GHG Intensity (Sales). GHG Intensity of the Fund will be addressed by having a lower Weighted Average GHG Intensity than its benchmark.

### **ESG Score Strategy**

A Sub-Fund or strategy managed according to the ESG Score Strategy promotes Environment, Social and Governance factors through the ESG Score Strategy. The ESG Score Strategy aims to measure a company's resilience to long-term risks across the three pillars of Environment, Social and Governance. ESG pillars will be addressed by outperforming the Weighted Average ESG Score of issuers whose shares have been acquired by the Fund against the Weighted Average ESG Score of issuers which are components of Fund's benchmark.

### **KPI Strategy (Absolute Threshold)**

A Sub-Fund or strategy managed according to the Sustainability Key Performance Indicator Strategy (Absolute Threshold) ("KPI Strategy (Absolute Threshold)") targets a specific minimum allocation into Sustainable Investments. Sustainable investments are investments in economic activities which contribute to environmental and/or social objectives, for which the Investment Managers uses as reference frameworks the UN Sustainable Development Goals (SDGs), as well as the objectives of the EU Taxonomy.

The Sub-Fund's general investment approach (Sub-Fund's applicable General Asset Class Principles in combination with its individual investment restrictions) is described in the prospectus.

- [What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?](#)

A Sub-Fund managed according to the Multi Asset Sustainability Strategy ("MAS Strategy") invests in (i) Equities and / or Debt Securities of companies that either provide for environmental and/or social characteristics and/or pursue activities contributing to an environmental or social objective and / or invests (ii) in Green Bonds and/or Social Bonds, and/or in Sustainability Bonds and/or (iii) in SFDR Target Funds.

Overall, the Investment Manager is required to invest min 90% of Sub-Fund's assets in SFDR Target Funds and/or in Equities and/or Debt Securities in accordance with the Multi Asset Sustainability Strategy.

Application of the following sustainable minimum exclusion criteria for direct investments (with exception of cash, derivatives, external Target Funds, and internal Target Funds not following a sustainable strategy):

- securities issued by companies having a severe violation / breach of principles and guidelines such as the Principles of the United Nations Global Compact, the OECD Guidelines for Multinational Enterprises, and the United Nations Guiding Principles for Business and Human Rights on the grounds of problematic practices around human rights, labour rights, environment, and corruption issues,
- securities issued by companies involved in controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, biological weapons, depleted uranium, white phosphorus, and nuclear weapons),
- securities issued by companies that derive more than 10% of their revenues from weapons, military equipment, and services,
- securities issued by companies that derive more than 10% of their revenue from thermal coal extraction,
- securities issued by utility companies that generate more than 20% of their revenues from coal,
- securities issued by companies involved in the production of tobacco, and securities issued by companies involved in the distribution of tobacco with more than 5% of their revenues.

Direct investments in sovereign issuers with an insufficient freedom house index score are excluded.

The sustainable minimum exclusion criteria are based on information from an external data provider and coded in pre- and post-trade compliance. The review is performed at least half yearly.

- **What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?**

The Sub-Fund does not commit to reduce the scope of the investments by a certain minimum rate.

- **What is the policy to assess good governance practices of the investee companies?**

Good governance principles are considered by screening out companies based on their involvement in controversies around international norms corresponding to the four good governance practices: sound management structures, employee relations, remuneration of staff and tax compliance. Companies having a severe violation in either of those areas will not be investible. For certain cases, flagged issuers shall be on a watch list. These companies will appear on this watch list when the Investment Manager believes that engagement may lead to improvements or when the company is assessed to take remedial actions. Companies on the watch list remain investible unless the Investment Manager believes that the engagement or the remedial actions of the company does not lead to the desired remedy of the severe controversy.

In addition, the Sub-Fund's Investment Manager is committed to actively encourage open dialogues with investee companies on corporate governance, proxy voting and broader sustainability issues in advance of shareholder meetings (regularly for direct investments in shares). The Sub-Fund's Investment Manager's approach to proxy voting and company engagement is set out in the Management Company's Stewardship Statement.

**Good governance** practices include sound management structures, employee relations, remuneration of staff and tax compliance.

**Asset allocation** describes the share of investments in specific assets.

## What is the asset allocation planned for this financial product?

Min. 90% of the Sub-Funds' assets are used to meet the environmental or social characteristics promoted by this Sub-Fund. A low portion of the Sub-Fund might contain assets which do not promote environmental or social characteristics. Example of such instruments are derivatives, cash and deposits, some Target Funds and investment with temporarily divergent or absent environmental, social, or good governance qualifications or investments outside of the specified quota to be invested as part of the Multi Asset Sustainability Strategy. Min. 1.50% of the Sub-Funds' assets will be invested in Sustainable Investments. The minimum percentage of investments that are aligned with the EU Taxonomy is 0.01%. The Sub-Fund's Investment Manager does not commit to a minimum share of environmentally Sustainable Investments that are not aligned with the EU Taxonomy. The Sub-Fund's Investment Manager does not commit to a minimum share of socially sustainable investments. While the Sub-Fund cannot commit to a minimum share of environmentally or socially sustainable investments, such investments may be freely allocated to within the Sub-Fund aggregated sustainable investment commitment disclosed (1.50%).

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

- **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

Not applicable

### **To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The Taxonomy-aligned investments include debt and/or equity in environmentally sustainable economic activities aligned with the EU-Taxonomy. The minimum percentage of investments that are aligned with the EU Taxonomy is 0.01%. Taxonomy-aligned data is provided by an external data provider. The Investment Manager has assessed the quality of such data. The data will not be subject to an assurance provided by auditors or a review by third parties. The data will not reflect any data in government bonds. As of today, there is no recognized methodology available to determine the proportion of Taxonomy-aligned activities when investing in government bonds.

Taxonomy-aligned activities in this disclosure are based on share of turnover. Pre-contractual figures use turnover as its financial metric as a default in line with the regulatory requirements and based on the fact that complete, verifiable or up-to date data for CAPEX and/or OPEX as financial metric is even less available.

Taxonomy-aligned data is only in rare cases data reported by companies in accordance with the EU Taxonomy. The data provider has derived Taxonomy-aligned data from other available equivalent public data.

- **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>1</sup>?**

☐ Yes

☐ In fossil gas      ☐ In nuclear energy

☒ No

The Sub-Fund does not pursue any investments in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy. Nevertheless, as result of this investment strategy, investments may occur in corporates which are also active in these activities. Further information will be provided as part of the annual reporting, if relevant.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies,
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

**1. Taxonomy-alignment of investments including sovereign bonds \***

**2. Taxonomy-alignment of investments excluding sovereign bonds \***

This graph represents X% of the total investments.

It is noted that this Sub-Fund does not provide for a binding minimum quota for investments in sovereign bonds. Therefore, this Sub-Fund may have (but must not have) an exposure to sovereign bonds. In the absence of a binding minimum quota for investments in sovereign bonds, this graph does not generate any additional added value compared to the left-hand graph.

\* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

- What is the minimum share of investments in transitional and enabling activities?

The Sub-Fund's Investment Manager does not commit to a split of minimum taxonomy alignment into transitional, enabling activities and own performance.

#### What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

Taxonomy-aligned investments are considered a sub-category of Sustainable Investments. If an investment is not Taxonomy-aligned since the activity is not yet covered under the EU Taxonomy or the positive contribution is not substantial enough to comply with the Taxonomy technical screening criteria, the investment can still be considered an environmentally Sustainable Investment provided it complies with all criteria. The Investment Manager does not commit to a minimum share of environmentally Sustainable Investments that are not aligned with the EU Taxonomy. The overall sustainable investment share may also include investments with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy, and while the Sub-Fund cannot commit to a minimum share of environmentally or socially sustainable investments, such investments may be freely allocated to within the Sub-Fund aggregated sustainable investment commitment disclosed (min. 1.50%).

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

#### What is the minimum share of socially sustainable investments?

The Investment Manager defines Sustainable Investments based on internal research, which uses, among others, the UN Sustainable Development Goals (SDGs), as well as the objectives of the EU Taxonomy as reference frameworks. The Investment Manager does not commit to a minimum share of socially Sustainable Investments, as the SDGs contain environmental as well as social objectives. The overall sustainable investment share may also include investments with a social objective, and while the Sub-Fund cannot commit to a minimum share of environmentally or socially sustainable investments, such investments may be freely allocated to within the Sub-Fund aggregated sustainable investment commitment disclosed (min. 1.50%).

#### What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

Under “#2 Other” investments into cash, Target Funds, or derivatives can be included. Derivatives might be used for efficient portfolio management (including risk hedging) and/or investment purposes, and Target Funds to benefit from a specific strategy. For those investments no environmental or social safeguards are applied.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

No reference benchmark has been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Sub-Fund.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?  
Not applicable
- How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?  
Not applicable
- How does the designated index differ from a relevant broad market index?  
Not applicable
- Where can the methodology used for the calculation of the designated index be found?  
Not applicable

Where can I find more product specific information online?

More product-specific information can be found on the website: <https://regulatory.allianzgi.com/SFDR>
