

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Franklin Templeton Investment Funds - **Legal entity identifier:** 0JRKFOGJGO9U5HR6QY84
Franklin European Corporate Bond Fund (the "Fund")

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

<p><input checked="" type="radio"/> <input type="checkbox"/> Yes</p> <p><input type="checkbox"/> It will make a minimum of sustainable investments with an environmental objective: ___%</p> <p><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> It will make a minimum of sustainable investments with a social objective: ___%</p>	<p><input checked="" type="radio"/> <input type="checkbox"/> No</p> <p><input checked="" type="checkbox"/> It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 11% of sustainable investments</p> <p><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input checked="" type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promotes E/S characteristics, but will not make any sustainable investments</p>
--	---

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What environmental and/or social characteristics are promoted by this financial product?

The environmental and/or social characteristics promoted by the Fund vary by the composition of the portfolio and inter alia include reduction of greenhouse gasses emissions, energy conservation, biodiversity protection, responsible solid and water waste management, alignment with the international business conduct principles and/or board gender diversity. The Investment Manager seeks to attain these characteristics by:

- avoiding investments in issuers that are lagging in the transition to a low-carbon economy; and
- implementing negative screens as part of its investment process, as further detailed in section "What investment strategy does this financial product follow?" below.

Moreover, the Fund has a minimum allocation of 10% of its portfolio to sustainable investments in economic activities that contribute to environmental objectives and a minimum allocation of 1% of its portfolio to sustainable investments in economic activities that contribute to social objectives.

The Fund does not use a reference benchmark to which it aligns the environmental and/or social characteristics that the Fund promotes.

Sustainability indicators
measure how the environmental or social characteristics promoted by the financial product are attained.

● ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

The sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted are:

- percentage of investments in green bonds;
- percentage of investments in social bonds;
- percentage of investments in sustainability bonds;
- percentage of investments in bonds issued by best-in-class issuers (the "Environmental Champions");
- exposure to the principle adverse impacts (the "PAIs") indicators compared to the benchmark Bloomberg Barclays Euro Aggregate; and
- the list of issuers, with which the Investment Managers engage.

For the purpose of calculating the sustainability indicators above:

- Environmental Champions are defined as corporate issuers ranked within the top 20% of their peer industry group, based on the greenhouse gas intensity.
- A Fund-level weighted average of each of all the mandatory PAIs indicators under consideration is calculated every quarter for both the Fund and its benchmark.

While the Fund is not committing to have a Fund level PAIs average better than its benchmark's average, the difference between those two metrics informs how successful the Fund is in investing into Environmental Champions as well as issuers of green bonds.

● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The objective of the sustainable investments is, amongst others, to fund and promote either:

- the efficient use of energy, raw materials, water, and land;
- the production of renewable energy;
- the reduction of waste, and greenhouse gas emissions, and lower impact of economic activities on biodiversity;
- the development of a circular economy;
- tackling inequalities and fostering social cohesion;
- social integration;
- good labour relations; or
- investments in human capital, including disadvantaged communities.

The Fund's sustainable investments include a minimum allocation of 10% of its portfolio to sustainable investments in economic activities that contribute to environmental objectives.

This is achieved by investing in bonds labelled as being green or in any other securities whose:

- proceeds are used on eligible environmental projects;
- framework adheres to international standards (including but not limited to, the International Capital Market Association (the "ICMA") Green Bond Principles, future European Union Green Bond Standard (the "EU GBS")); and
- issuers do not significantly harm other environmental and social objectives while demonstrating good governance practices.

The use of proceeds for these bonds is clearly defined and aligned with the objectives above.

Additionally, the Fund commits to include a minimum allocation of 1% of its portfolio to sustainable social activities. This is achieved by investing in bonds labelled as being social or in any other securities, whose:

- proceeds are used on eligible social projects;
- framework adheres to international standards (including but not limited to, ICMA Social Bond Principles); and
- issuers do not significantly harm other environmental and social objectives while demonstrating good governance practices.

● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

The Investment Managers use proprietary data tools and qualitative research to ensure alignment with the Do No Significant Harm (the “DNSH”) principles across the portfolio.

All issuers are monitored using the Principle Adverse Impact Risk App (the “PAI Risk App”). The PAI Risk App uses data from a third-party provider to identify issuers involved in harmful economic activities and/or controversies and exclude such issuer from the investment universe. Another tool, ESG Credit App ranks corporate issuers by their greenhouse gas emissions and greenhouse gas intensity using various references such as Scope 1 and 2 greenhouse gasses emissions, emitters’ historic trajectories, Science Based Target initiative (“SBTi”) target. Corporate issuers falling within the bottom 20% of the investment universe (i.e. climate laggards) based on the ESG Credit App are also excluded from the portfolio.

When deploying funds to sustainable investments, especially the 11% of portfolio of the Fund committed towards environmental and social objectives, the Investment Managers apply additional qualitative assessment (based on internal research or on external third-party opinion) of the issuer’s and of the projects’ DNSH eligibility.

– – – *How have the indicators for adverse impacts on sustainability factors been taken into account?*

When assessing compliance of the Fund’s investments with the Do No Significant Harm principles, the Investment Manager takes into account all mandatory PAI indicators of Table 1 of Annex I of the SFDR Regulatory Technical Standards (“RTS”), to the extent they are relevant for the investments contemplated by the Fund and other references deemed by the Investment Manager as proxies for adverse impact. The Investment Manager performs this analysis at the level of each sustainable investment so that the relevance and materiality of the PAI indicators may vary across investments. Issuers deemed to be in breach of these indicators will not qualify as sustainable investments.

While assessing eligible green and social bonds, the Investment Managers review and document the materiality of the relevant PAIs for the project and how the project’s implementation affects the issuer’s overall PAIs outlook.

For example, while investing in a green bond whose use of proceeds targets development of renewable energy sources, (e.g., solar/PV panels), the Investment Managers ascertain that financed projects reduce exposure to PAIs linked to greenhouse gas emissions.

– – – *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The sustainable investments are aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

Alignment is monitored using data from MSCI. Breaches identified by that service provider are flagged in the investment compliance system for subsequent investigation by the Investment Managers. Where due diligence proves that the issuer is not aligned with OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, it is deemed un-investible.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

Yes,

PAIs indicators are considered for the purpose of:

- **identifying best-in-class issuers;**
- **restricting Fund's investable universe;**
- **guiding thematic engagement; and**
- **applying exclusions.**

Identifying best-in-class issuers

The Fund seeks exposure to bonds issued by corporates deemed by the Investment Managers to be **Environmental Champions**. Environmental champions are identified using a proprietary ESG rankings: the ESG Credit App ranks corporate issuers by their greenhouse gas emissions and greenhouse gas intensity using various references such as Scope 1 and 2 greenhouse gasses emissions, emitters' historic trajectories, SBTi target.

Restricting Fund's investable universe

Issuers falling within the bottom 20% of the investment universe (i.e. climate laggards) based on the ESG Credit App are also **excluded** from the portfolio.

Guiding thematic engagement

The Investment Managers commit to **engage** with 5% of holdings which are considered as underperformers in terms of their aggregate exposure to applicable mandatory PAIs metrics.

Applying exclusions

The Fund also considers UNGC violations and exposure to controversial weapons for the purpose of applying specific ESG exclusions as described in the investment strategy section.

More information on how the Fund considered its PAIs may be found in the periodic reporting of the Fund.

No

What investment strategy does this financial product follow?

The Fund employs a proprietary ESG rating methodology with the aim to avoid investment in issuers that are lagging in the transition to support a low-carbon economy. The ESG rating methodology is applied to at least 90% of issuers present in the Fund's portfolio and is binding for the portfolio construction.

The Fund uses a combination of external and internal data inputs to determine climate transition performance (i.e., the extent to which an issuer is responding to the threat of climate change, for example by engaging in a combination of decarbonisation of products and services, establishing low or no emissions infrastructure, and reducing or eliminating reliance on fossil fuels, including revenue generated from fossil fuels), including but not limited to issuers' direct emissions trajectory relative to peers, decarbonisation of product and services portfolio, and the assessment of opportunities in clean technology and energy.

In addition to the above, the Fund applies specific ESG exclusions. Across the entire portfolio, the Fund shall not invest in issuers that:

- repeatedly and seriously violate the United Nations Global Compact principles, the UN Guiding Principles on Business and Human Rights, and the OECD Guidelines for Multinational Enterprises, such as:
 - protection of international human rights;
 - no complicity in human rights violations;
 - respect for freedom of association and the right to collective bargaining;
 - elimination of forced labour;
 - abolition of child labour;
 - elimination of discrimination in respect of employment and occupation;

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

- precautionary principle in dealing with environmental problems and/or approach to environmental challenges;
- promoting greater environmental awareness and/or responsibility;
- development and dissemination and/or diffusion of environmentally friendly technologies; and
- working and/or standing up against corruption in all its forms;
- “Not Free” status according to the Freedom House Index for sovereign issuers;
- manufacture controversial weapons such as those that are defined as being indiscriminate; or those that manufacture components intended for use in such weapons;
- derive more than 5% of their revenue from production of conventional weapons;
- manufacture tobacco or tobacco products; or those that derive revenue from such products that exceeds the Investment Managers’ 5% threshold;
- derive more than 5% of their revenue from gambling or adult entertainment;
- derive more than 5% of their revenue from the mining of thermal coal and its sale to external parties;
- derive more than 5% of their revenue from the most polluting fossil fuels;
- exceed the Investment Managers’ 30% tolerance level of fossil fuels or 5% tolerance level of thermal coal used to generate electricity or lack ambitious regarding decarbonization targets for electricity generation;
- negatively affect biodiversity-sensitive areas; and
- score an ESG rating of CCC according to MSCI.

If a security held by the Fund falls under at least one of the above exclusions, the Investment Managers will divest from such security as soon as practicable and at the latest within a period of six months.

● ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The binding elements of the investment strategy can be summarized as follows:

- the exclusion of the bottom 20% of the investment universe based on the ESG Credit App;
- the commitment to engage with the 5% of holdings which are considered as underperformers in terms of their PAIs metrics; and
- the application of the ESG exclusions further described in the investment strategy section of this annex.

● ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

The Fund excludes from its portfolio issuers that score in the bottom 20% of its investment universe, based on the ESG Credit App.

● ***What is the policy to assess good governance practices of the investee companies?***

Assessment of good governance is achieved on both quantitative and qualitative levels.

For the quantitative assessment of corporate issuers, the issuers not following governance practice are determined using references included into PAI Risk App and are deemed un-investible.

For the qualitative assessment of corporate issuers, the Investment Managers consider governance factors, such as board composition (including but not limited to gender, independence, skill set), governance practices or shareholders protection.

Issuers not passing PAI Risk App initial test and/or with qualitatively assessed governance deficiencies are deemed un-investible.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

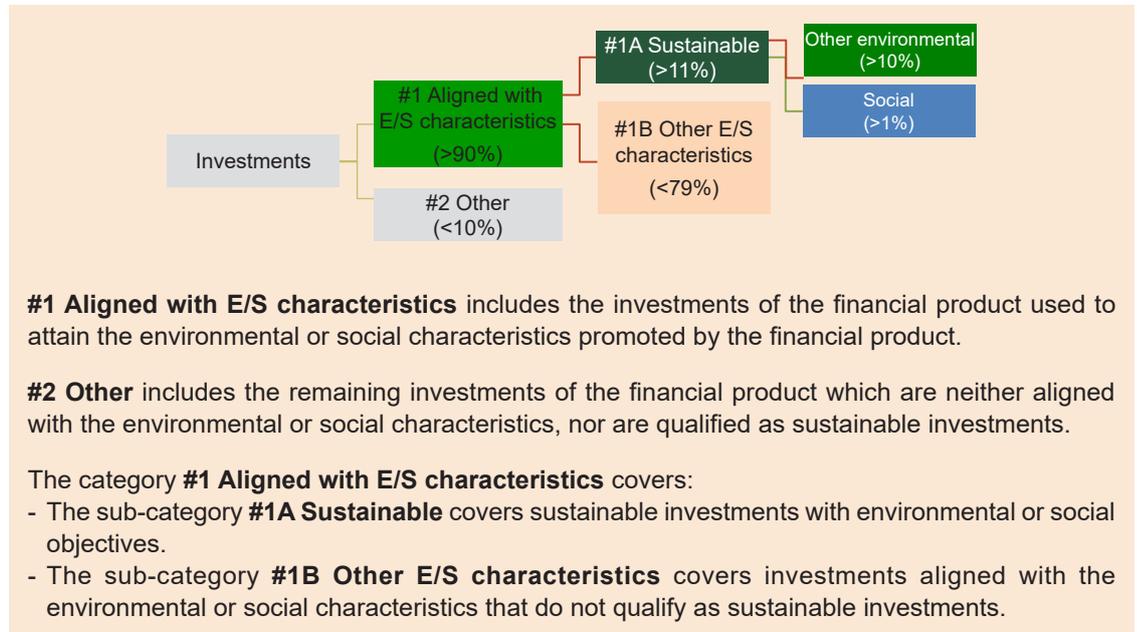

Asset allocation describes the share of investments in specific assets.

What is the asset allocation planned for this financial product?

At least 90% of the Fund's portfolio is aligned with environmental and/or social characteristics promoted by the Fund. The remaining portion (<10%) of the portfolio is not aligned with the promoted characteristics and consists of liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds).

Out of the Fund's portfolio segment which is aligned with the promoted environmental and/or social characteristics, the Fund undertakes a further commitment to invest a minimum of 11% of its portfolio to sustainable investments, with the portion of investments aligned with environmental and/or social characteristics.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

● **How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?**

For asset-based derivatives, the Investment Managers subject the assets to all relevant ESG screenings. The ESG screenings depend on the nature of the asset.

If the Investment Manager is not in position to determine the ESG quality of the underlying asset because of its nature (e.g., currency forwards for hedging purposes), the Investment Managers assess the ESG credentials of a derivative contract counterparty. If a counterparty is a subsidiary without separate ESG reporting scheme, the ESG characteristics of a parent company apply. The Fund does not engage in derivatives with financial institutions which are not meeting the Investment Managers' ESG criteria. To qualify as eligible counterparty, a financial institution must meet at least two of the following criteria:

- MSCI ESG rating of BBB or above – or in absence of MSCI rating, being above industry average rating as judged by alternative third party ESG data providers;
- signatory to the Equator Principles;
- signatory to Task Force on Climate-Related Financial Disclosures; and
- is committed to set a SBTi target.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

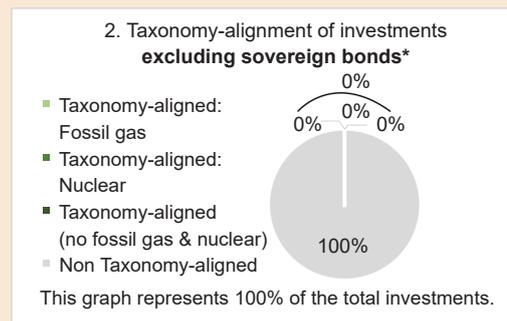

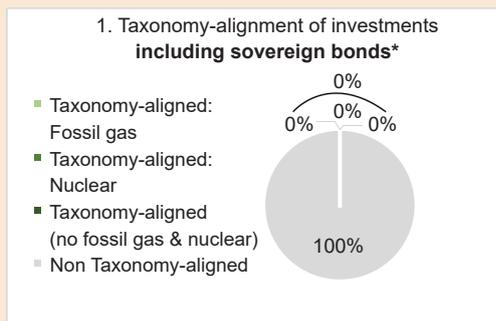

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

● **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy⁹?**

- Yes:
- In fossil gas
 - In nuclear energy
- No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What is the minimum share of investments in transitional and enabling activities?**

Not applicable.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The Fund commits to have a minimum share of 10% of sustainable investments with an environmental objective aligned with SFDR in its portfolio. The Investment Managers are not currently in a position to specify the exact proportion of the Fund's underlying investments which take into account the EU criteria for environmentally sustainable economic activities. However, the position is kept under review as the underlying rules are finalized and the availability of reliable data increases over time.

What is the minimum share of socially sustainable investments?

The minimum share of sustainable investments with a social objective is 1% of the Fund's portfolio.

⁹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The “#2 Other” investments include liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) held for the purposes of servicing the day-to-day requirements of the Fund.

No minimum environmental and/or social safeguards have been put in place.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

No.

Reference benchmarks

are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Where can I find more product specific information online?

More product-specific information can be found on the website:
