Janus Henderson European Mid and Large Cap Fund | LEI: 213800XTT5MK9SXNLH31

A sub-fund of Janus Henderson Investment Fund OEIC, a UK OEIC managed by Janus Henderson Fund Management UK Limited.

This product does not have a UK sustainable investment label as it does not have a specific Sustainability Goal, but it does include environmental and social factors in its investment process in a binding manner beyond the integration of financially material sustainability risks. Sustainable investment labels help investors find products that have a one of the sustainability goals covered by the sustainable investment labels available in the UK.

This document is dated 2 December 2024.

Fund Objective

The Fund aims to provide capital growth over the long term.

Performance target: To outperform the FTSE World Europe (ex UK) Index, after the deduction of charges, over any 5-year-period.

Sustainability Approach

The Investment Manager may invest in issuers with a high carbon intensity (other than those excluded as described below) if it determines that such issuers have a credible transition strategy, based on its proprietary methodology.

A company will only be considered as having a credible transition strategy if it has at least one of the following:

- A science-based emissions target*; or
- A verified commitment to adopt a science-based emissions target*; or
- In the specific case of the airlines sector, made significant aircraft fleet investment to reduce carbon output (that is to have a younger than average fleet age); or
- Has committed 30% of future gross capital expenditure and/or research and development to sustainability aligned projects in accordance with the Investment Manager's methodologies.

If a company does not currently have a credible transition strategy in place, the Investment Manager may still invest if the company demonstrates superior ESG risk management by achieving an ESG rating of AA or higher (rating from MSCI – <https://www.msci.com/>, or equivalent).

Additional criteria may also be applied in assessing the validity of the transition strategy.

*approved or verified by SBT- <https://sciencebasedtargets.org/> or equivalent

** rating by MSCI - <https://www.msci.com/> or equivalent

The Investment Manager applies screens to avoid investing in issuers involved in the following activities:

Excluded Activity	Exclusionary Criteria
Controversial weapons	See Further Details section
Palm oil	≥10% of revenue
Tobacco	≥10% of revenue
Thermal coal extraction and power generation	≥10% of revenue
Oil sands extraction	≥10% of revenue
Arctic oil and gas	≥10% of revenue

Exclusionary screens are applied using third party data at the point of investment and are monitored on a continuous basis. If an investment becomes ineligible based on exclusionary screens it will be divested within 90 days.

Exclusionary screens are applied to direct investments and single name derivatives (complex financial instruments) but are not applied to other derivatives or investments through collective investment schemes.

The Investment Manager may invest in companies that would be excluded by the screens if the Investment Manager believes, based on its own research and as approved by its ESG Oversight Committee, that the third-party data used to apply the exclusions is insufficient or inaccurate.

Investor Stewardship

The Investment Manager has engagements (for both insights and action) with companies the Fund invests in. Engagements include a wide range of topics including strategy, capital allocation, performance, risk, management succession, board composition, corporate governance and environmental and social issues as applicable. The Investment Manager also supports several stewardship codes globally and is a signatory to the UK stewardship code.

Sustainability Approach (continued)

Key Performance Indicators

Whether the Fund has invested in line with its sustainability approach will be measured with reference to:

- Carbon intensity of the Fund compared with its benchmark
 - ▶ Measured as Scope 1 + Scope 2 greenhouse gas emissions normalized by sales, which allows for comparison between companies of different sizes. Scope 1 emissions are those from sources owned or controlled by the company, typically direct combustion of fuel as in a furnace or vehicle. Scope 2 emissions are those caused by the generation of electricity purchased by the company.
- Credible Transition
 - ▶ % of issuers within the portfolio identified as having a credible transition strategy in accordance with the Investment Manager's proprietary methodology.
- Overall UNGC Principles and OECD MNE (Multinational Enterprises) status of the Fund
 - ▶ UNGC compliance covers matters including human rights, labour, corruption, and environmental pollution.
- ESG exclusion status
 - ▶ The exclusion of controversial activities deemed by the investment manager as having the potential to cause material negative environmental or social outcomes.

Sustainability Metrics

For the 12 months period up to 30 September 2024:

Metric	Performance
Carbon intensity of the Fund compared with FTSE Europe (ex UK) Index (Tons CO2 emitted/\$M sales)	Fund carbon intensity was 48.8 vs 95.2 for the FTSE Europe (ex UK) index (calculated as an average of each quarter)
Credible Transition	0% of issuers within the portfolio identified as having a credible transition strategy in accordance with the Investment Manager's proprietary methodology.
Overall UNGC Principles and OECD MNE status of the Fund	At all times during the period, the Fund did not hold any companies that were in breach of the UNGC principles.
ESG exclusion status	At all times during the period, the Fund did not hold any companies in breach of the exclusionary screens.

Third-party data is primarily sourced from MSCI. Data coverage for the metrics described above is obtained where it is reasonably practicable to do so but may be incomplete and coverage differs by asset class, region and size of issuers. Datapoints with coverage of less than 60-70% may be less informative for understanding product risks and opportunities.
