

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

## Xtrackers II Global Aggregate Bond Swap UCITS ETF

Share Class: 2C - USD Hedged (ISIN: LU0942970285), (WKN: DBX0NW), (Currency: USD)

a sub fund of Xtrackers II. The Fund is managed by Deutsche Asset Management S.A., part of the Deutsche Bank Group.

### Objectives & Investment Policy

The aim is for your investment to reflect the performance of the Bloomberg Barclays Global Aggregate Bond USD Hedged Index (Index). The Index is linked to the Barclays Global Aggregate Bond Index (Underlying Index), which is intended to reflect the global market in investment grade fixed-rate tradeable debt (bonds) market, meaning those bonds issued by issuers considered less likely to default.

The Underlying Index contains all the bonds from the following three indices: the U.S. Aggregate Index, the Pan-European Aggregate Index and the Asian-Pacific Aggregate Index (Regional Aggregate Indices). In addition, bonds eligible for inclusion in the Global Treasury Index, the Eurodollar Index, the Euro-Yen Index, the Canadian Index, and the Investment Grade 144A Index, which are not already included in the Regional Aggregate Indices, shall also be eligible for inclusion in the Underlying Index. The Index uses foreign exchange transactions to reduce the effects of exchange rate fluctuations between the currencies in which the bonds underlying the Underlying Index

are denominated and the US dollar, in which currency the Index is denominated (currency hedging).

The Underlying Index is rebalanced on a monthly basis, at each month-end. On each rebalancing date, the following specific rules will be applied to the eligible bonds in order to determine those bonds which shall be included in the Underlying Index: (i) amount outstanding/minimum issue size, (ii) quality, (iii) maturity, (iv) seniority/order of repayment of the debt, (v) taxability, (vi) coupon payments, (vii) eligible local currencies, (viii) market of issue and (ix) bond type.

The Index is calculated daily on a total return basis which means that amounts equivalent to interest payments on the bonds are reinvested in the Underlying Index.

To achieve the aim, the Fund will invest in transferable securities and/or secured and/or unsecured cash deposits and enter into financial contract(s) (derivative(s)) with Deutsche Bank relating to the transferable securities and/or secured and/or unsecured cash deposits; and a portfolio of securities aimed at replicating the performance of the Index.

No dividends will be paid on your shares.

You may redeem your shares on demand on a daily basis.

### Risk and Reward Profile

The risk and reward category is calculated using historical data which may not be a reliable indicator of the Fund's future risk profile.

The risk and reward category may shift over time and is not a target or a guarantee.

The lowest category (i.e. Category 1) does not mean a risk-free investment.

The Fund is in Category 3 because of the low range and frequency of price movements (volatility) of the underlying investments referenced by the Fund.

The following are additional risks not covered by the risk and reward category.

The Fund does not invest directly in the components of the Index and its returns will be dependent on the performance of the transferable securities and/or secured and/or unsecured cash deposits and the performance of the derivatives used.

The Fund will enter into a derivative with a counterparty (initially Deutsche Bank). If the counterparty fails to make payments (for example, it becomes insolvent) this may result in your investment suffering a loss.

Deutsche Asset Management entities and related companies may act in several roles in relation to the Fund such as distributor, derivative counterparty and management company which may involve conflicts of interest.

The Fund is not guaranteed and your investment is at risk. The value of your investment may go down as well as up.

The Fund is exposed to less economically developed economies (known as emerging markets) which involve greater risks than well developed economies. Political unrest and economic downturn may be more likely and will affect the value of your investment.

Your investment is dependent on the performance of the Index less costs but your investment is not expected to match that performance precisely.

The Fund may use derivatives to try to reduce movements in currency exchange rates between the currency of the Fund's assets and the currency of the Fund's shares. This may not always be successful and may result in greater fluctuations in the value of the Fund. This may negatively affect the value of the Fund and your investment.

Fluctuations in interest rates of the currency in which the shares and the Fund's assets are expressed may affect the cost of providing the derivatives in which the Fund invests which may affect the real value of your investment.

Bonds are exposed to credit risk and interest rate risk. Credit risk means that there is a risk that the bond issuer may be unable to pay interest or repay the bond principal, resulting in your investment suffering a loss. Interest rate risk means that if interest rates rise, typically the value of the bond will fall, which could also affect the value of your investment.

More information in relation to risks in general may be found in the "Risk Factors" section of the prospectus.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
This is the maximum that might be taken out of your money before it is invested (entry charge) and before the proceeds of your investment are paid out (exit charge).	
Charges taken from the Fund over a year	
Ongoing charges	0.20%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

Secondary market investors (those who buy or sell shares on a stock exchange) may be charged certain fees by their stock broker. These charges, if any, can be obtained from such stock broker. Authorised participants dealing directly with the Fund will pay the transaction costs related to their subscriptions and redemptions.

The ongoing charges figure shown here is an estimate of the charges as there is insufficient historical data. It excludes portfolio transaction costs and performance fees, if any. The Fund's annual report for each financial year will include detail on the exact charges made.

More detailed charges information may be found in the "Fees and Expenses" section of the prospectus.

## Past Performance

Please be aware that past performance is not a reliable indicator of future results.

The fees for the ongoing Fund charges are included in the calculation of past performance. The entry/exit fees are excluded from the calculation of past performance.

The Fund was launched in 2014 and the share class was launched in 2014.

Past performance has been calculated in USD.
