First State Global Listed Infrastructure Fund (Fund)

Class B (Income) GBP (Share Class)

ISIN GB00B24HK556

a sub-fund of First State Investments ICVC (the Company)

First State investments (UK) Limited, the authorised corporate director of the Company

Objectives and investment policy

Objective: The Fund aims to provide income and grow your investment.

Policy: The Fund invests in shares of companies that are involved in infrastructure around the world.

The infrastructure sector includes utilities (e.g. water and electricity), highways and railways, airports services, marine ports and services, and oil and gas storage and transportation.

The Fund does not invest directly in infrastructure assets.

The Fund may use derivatives to reduce risk or to manage the Fund more efficiently.

You can buy and sell shares in the Fund on any business day. As long as we receive your instruction before 12 noon (UK time), shares will be bought at that day's price.

The Fund's manager may use its discretion when deciding which investments should be held by the Fund.

You may receive a regular income from your investment which will be paid semi-annually. This may affect the potential growth of your investment.

In addition to the charges set out in the charges section, the Fund will incur portfolio transaction costs which are paid from the assets of the Fund.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within five years.

Risk and reward profile

- The synthetic risk reward indicator (the SRRI) rating is not a measure of the risk of you losing your investment but describes how much the value of the Share Class has gone up and down in the past. Where a Share Class has not yet launched, the SRRI is calculated using representative data.
- The SRRI rating is based on historical data which may not be a reliable indication of the future risks and rewards of the Share Class.
- We cannot guarantee that the rating of the Share Class will remain the same; it may change over time.
- Even the lowest rating 1 does not mean a risk free investment.
- On a scale of 1 (less risky) to 7 (more risky), this Share Class has a rating of 5 due to its past performance (or representative data) and the nature of its investments. Shares with a rating of 5 might have higher risks, but also higher returns.
- Risk is taken in order to make a higher potential return; the more risk a fund takes, the higher the potential return but the greater the risk of

loss.

- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back significantly less than you originally invested.

Material risks not adequately captured by the SRRI:

- **Single sector risk:** investing in a single sector may be riskier than investing in a number of different sectors. Investing in a larger number of sectors helps spread risk.
- **Currency risk:** the Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund.
- **Listed Infrastructure Risk:** The Fund may be vulnerable to factors that particularly affect the infrastructure sector, for example natural disasters, operational disruption and national and local environmental laws.

For further information on risks, please refer to the Risk Factors section in the Company's prospectus.
