# **Key Investor Information**

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

# CFP SDL UK Buffettology Fund - General Accumulation Shares

A sub-fund of the CFP Sanford DeLand Funds

General Accumulation Shares, ISIN GB00BF0LDZ31

Authorised Corporate Director - ConBrio Fund Partners Limited

### **Objectives and investment policy**

The investment objective of the Fund is to seek to achieve an annual compounding rate of return over the long term, defined as 5 - 10 years, which is superior to the median performance of all of the funds forming the official peer group of which the Fund is part. 'Peer group' is defined as being the Investment Association sector to which the Fund has been allocated (currently being the UK All Companies Sector) or to which it may be allocated in future, as determined by that body. Investments will be made principally in UK equities, applying the methodology of Business Perspective Investing.

Business Perspective Investing identifies companies that exhibit criteria considered essential to the long term success of that business, and are expected to possess strong operating franchises and experienced management teams. Investments are to be made at a valuation deemed to provide shareholder value over the intended long term period of investment, not to be sold for short term profits.

#### **Risk and Reward profile**

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The coloured area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards					Typically higher rewards			
Lower Risk					Higher risk			
	1	2	2	Δ	E	6	7	

The Fund is ranked as a **6** because it has experienced relatively high rises and falls in value historically. The risk number shown is not guaranteed and may change over time.

The lowest risk number does not mean risk-free investment.

The Fund holds equities concentrated by number and by location

Further information regarding the investment criteria adopted in Business Perspective Investing can be obtained directly from the Investment Adviser or at <u>https://www.sanford-deland.com/70/</u> who-we-are/business-perspective-investing

The Fund may also invest in other transferable securities, money market instruments, units and/or Shares in other collective investment schemes, deposits, warrants, cash and near cash. The Investment Adviser will adopt a focussed approach to investing in shares of those companies which it believes have strong operating franchises and experienced management teams and whose shares are undervalued and offer the potential for improved economic growth.

Holders can buy, sell and switch shares in the Fund on any UK business day. Instruction must be received before 12 noon to buy shares at that day's price.

Any income from the Fund is re-invested.

in the UK. Equities, as an asset class, tend to experience higher volatility than many other assets such as bonds or money market instruments. Funds concentrated by number of assets and/or geographic location are more vulnerable to market sentiment impacting on one or more of those assets or location and can carry a higher risk than funds holding more diversified assets.

**Liquidity risk:** during difficult market conditions some securities, such as structured investments, corporate bonds and positions in emerging markets, may become more difficult to sell at a desired price.

**Counterparty risk:** arising from securities which require a specific entity, usually a large bank, to honour its obligations to the Fund.

**Operational risk:** arising from investments in overseas markets, in particular emerging market countries, which may not have the same level of safekeeping and other controls as UK markets.

**Legal or tax risk:** arising from a change in legal regulations, tax rules or the application of them.
