

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

## Xtrackers Eurozone Government Bond Quality Weighted UCITS ETF Share Class: 1D (ISIN: IE00BYTRMY76), (WKN: A141RQ), (Currency: EUR)

a sub fund of Xtrackers (IE) plc. The Fund is managed by Deutsche Asset Management S.A., part of the Deutsche Bank Group.

### Objectives & Investment Policy

The Fund aims to reflect the performance of the Markit iBoxx EUR Eurozone Sovereigns Quality Weighted Index (Index). The Index is designed to represent the performance of a range of euro (EUR) currency denominated tradable debt (bonds) issued by Eurozone governments. Bonds issued by countries with favourable fundamental economic indicators will have higher representation in the Index compared to countries with weaker economic fundamental indicators.

Bonds are only eligible for inclusion in the Index if they meet certain pre-determined selection and eligibility criteria. The Index represents bonds which pay either no interest or a pre-determined rate of interest. They must also be rated as "investment grade" by the major rating agencies, meaning that the payment obligations on the bonds are likely to be met.

All countries in the Eurozone are attributed scores derived from fundamental economic indicators such as: gross domestic product (GDP) growth, rate of inflation, rate of unemployment, national debt as a percentage of GDP, default history and global

competitiveness of the country. The scores are then used to determine the level of representation that bonds issued by each country will have in the Index.

The Index is calculated on a total return gross basis, meaning all dividends and distributions paid by the issuers of the bonds are treated as being reinvested.

The Index is rebalanced on a monthly basis and country weightings are re-allocated twice a year.

To achieve the aim, the Fund will attempt to replicate the Index by buying a substantial number of the bonds which are comprised in the Index in the same proportion as the Index, as determined by the Sub-Portfolio Manager of the Fund which is Deutsche Asset Management (UK) Limited.

The Fund may employ techniques and instruments in order to manage risk, reduce costs and improve results. These techniques and instruments may include the use of derivatives.

Dividends may be paid on your shares up to four times per annum. You may redeem your shares on demand on a daily basis.

### Risk and Reward Profile

The risk and reward category is calculated using historical data which may not be a reliable indicator of the Fund's future risk profile.

The risk and reward category may shift over time and is not a target or a guarantee.

The lowest category (i.e. Category 1) does not mean a risk-free investment.

The Fund is in Category 3 because of the low range and frequency of price movements (volatility) of the underlying investments referenced by the Fund.

The following are additional risks not covered by the risk and reward category.

The Fund will attempt to replicate the performance of the Index less costs, but your investment is not expected to match the performance of the Index precisely. Exceptional circumstances may arise, such as, but not limited to, disruptive market conditions, additional costs/taxes or extremely volatile markets, which may cause the Fund's performance to be substantially different from the performance of the Index.

Deutsche Asset Management entities and related companies may act in several roles in relation to the Fund such as distributor, investment manager and management company which may involve conflicts of interest.

The Fund is not guaranteed and your investment is at risk. The value of your investment may go down as well as up.

The Index is rules-based and is not capable of being adjusted to take into account changing market circumstances. As a result you may be negatively affected by, or may not benefit from, the lack of such adjustments in changing market circumstances.

Fluctuations in interest rates of the currency of the shares, the Index or the other assets of the Fund may affect the value of your investment.

The Fund follows a rules-based strategy which will deviate from the overall market or parent index performance. Your investment may be less diversified, with no guarantee that the strategy will be achieved.

Bonds are exposed to credit risk and interest rate risk. Credit risk means that there is a risk that the bond issuer may be unable to pay interest or repay the bond principal, resulting in your investment suffering a loss. Interest rate risk means that if interest rates rise, typically the value of the bond will fall, which could also affect the value of your investment.

The Fund may use derivatives to try to manage its investments more efficiently. This may not always be successful and may result in greater fluctuations in the value of the Fund. This may negatively affect the value of the Fund and your investment. More information in relation to risks in general may be found in the "Risk Factors" section of the prospectus.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

| One-off charges taken before or after you invest  |       |
|---|-------|
| Entry charge  | None  |
| Exit charge   | None  |
| This is the maximum that might be taken out of your money before it is invested (entry charge) and before the proceeds of your investment are paid out (exit charge). |       |
| Charges taken from the Fund over a year   |       |
| Ongoing charges   | 0.20% |
| Charges taken from the Fund under certain specific conditions   |       |
| Performance fee   | None  |

Secondary market investors (those who buy or sell shares on a stock exchange) may be charged certain fees by their stock broker. These charges, if any, can be obtained from such stock broker. Authorised participants dealing directly with the Fund will pay the transaction costs related to their subscriptions and redemptions.

The ongoing charges figure is based on expenses for the year ending October 2017. It may vary from year to year. It excludes portfolio transaction costs and performance fees, if any.

More detailed charges information may be found in the "Fees and Expenses" section of the prospectus.

## Past Performance

Please be aware that past performance is not a reliable indicator of future results.

The fees for the ongoing Fund charges are included in the calculation of past performance. The entry/exit fees are excluded from the calculation of past performance.

The Fund was launched in 2015 and the share class was launched in 2015.

Past performance has been calculated in EUR.
