Xtrackers II EUR Cash Swap UCITS ETF

Share Class: 1C (ISIN: LU0290358497), (WKN: DBX0AN), (Currency: EUR)

a sub fund of Xtrackers II. The Fund is managed by Deutsche Asset Management S.A., part of the Deutsche Bank Group.

Objectives & Investment Policy

The aim is for your investment to reflect the performance of the DEUTSCHE BANK EONIA TOTAL RETURN INDEX® (Index).

The Index reflects the performance of a deposit earning interest at the rate of the Euro Over Night Index Average (EONIA), with the interest being re-invested in the deposit daily. EONIA is a weighted average of the interest rates at which banks in the Euro-

zone lend to each other on an unsecured basis overnight (as calculated by the European Central Bank).

To achieve the aim, the Fund will buy tradable debt (bonds) and/or invest in cash deposits and enter into financial contract(s) (derivative(s)) with Deutsche Bank relating to the bonds/deposits and EONIA, in order to obtain the return on the Index.

Dividends will not be paid on your Shares.

You may redeem your investment on demand on a daily basis.

Risk and Reward Profile

The risk and reward category is calculated using historical data which may not be a reliable indicator of the Fund's future risk profile.

The risk and reward category may shift over time and is not a target or a guarantee.

The lowest category (i.e. Category 1) does not mean a risk-free investment.

The Fund is in Category 1 because of the low range and frequency of price movements (volatility) of the underlying investments referenced by the Fund.

The following are additional risks not covered by the risk and reward category.

The Fund does not invest directly in the components of the Index and its returns will be dependent on the performance of the bonds and/or cash deposits and the performance of the derivatives used.

Deutsche Asset Management entities and related companies may act in several roles in relation to the Fund such as distributor, index sponsor, derivative counterparty and management company which may involve conflicts of interest.

The Fund will enter into a derivative with a counterparty (initially Deutsche Bank). If the counterparty fails to make payments (for example, it becomes insolvent) this may result in your investment suffering a loss.

The Fund may invest in bonds the value of which depends on the issuer being able to make its payments. There is always a risk that the issuer will fail to do so which may result in your investment suffering a loss.

The Fund is not guaranteed and your investment is at risk. The value of your investment may go down as well as up.

The Fund provides a notional exposure to interest rates, which may be volatile. Interest rates react to various economic, fiscal, monetary and political factors. This may result in your investment suffering a loss, up to a total loss.

Your investment is dependent on the performance of the Index less costs but your investment is not expected to match that performance precisely.

The Index may also be subject to disruption or adjustment events which may prevent its calculation or lead to adjustments to the rules of the index which may cause your investment to suffer losses.

More information in relation to risks in general may be found in the "Risk Factors" section of the prospectus.
