L&G LOIM Global Government Bond Fundamental UCITS ETF

A sub-fund of Legal & General UCITS ETF Plc (the "Company")

Managed by LGIM ETF Managers Limited, a member of the Legal & General group (the "Manager")

Share Class: EUR Hedged Accumulating ETF **ISIN:** IE00BYPFZZ78 **DE ISIN:** DE000A14YKA5

Objectives and Investment Policy

The L&G LOIM Global Government Bond Fundamental UCITS ETF (the "Fund") is an exchange traded fund ("ETF") that aims to track the performance of the LOIM Fundamental Global Government Index (the "Index").

Dealing. Shares in this Share Class (the "Shares") are denominated in EUR and can be bought and sold on stock exchanges by ordinary investors using an intermediary (e.g. a stockbroker). In normal circumstances, only Authorised Participants may buy and sell Shares directly with the Company. Authorised Participants may redeem their Shares on demand in accordance with the "Dealing Timetable" published on <http://www.lgimETF.com>.

Index. The Index is comprised of bonds issued by the member governments of the OECD which are denominated in each country's local currency, have at least 1 year remaining to maturity (i.e. the time until they become repayable), pay a fixed rate coupon (i.e. "interest") and may be of any credit rating or may be unrated. The weight of each country's bonds within the Index depends on its "creditworthiness" (i.e. its ability to repay its debts) determined primarily by reference to its level of public debt, its revenue and its social and political stability. The weights are then adjusted to prioritise countries with higher "liquidity" (a measure of how actively its bonds are traded) and higher "yields" (i.e. investment returns).

Replication. The Fund will primarily invest in a representative sample of the bonds contained in the Index whose risk and performance characteristics closely resemble that of the Index as a whole. The Fund may also invest in (1) bonds and similar securities that are not constituents of the Index that have similar risk and performance characteristics to the bonds contained in the Index and (2) financial derivative instruments ("FDIs") (i.e. investments the prices of which are based on the bonds contained in the Index and/or such other bonds or similar securities).

Currency Hedged. The Fund will use currency hedging transactions called "FX forwards" (a type of FDI) with the aim of minimising the effect on Share Class returns of fluctuations between the currencies in which the Fund's investments are denominated and the currency in which the Shares are denominated. The performance of this Share Class is benchmarked to the LOIM Fundamental Global Government Index (EUR Hedged) (the "Performance Benchmark") which is a currency-hedged version of the Index that uses FX forwards to minimise the effect of fluctuations between the currencies in which the Index constituents are denominated and EUR.

Dividend Policy. This Share Class does not intend to pay dividends. Any income which may result from the Fund's investments will be re-invested into the Fund.

Risk and Reward Profile

- The Fund is rated 3 due to the nature of its investments and its risks. The rating is calculated based on historical data and may not be a reliable indication of the Fund's future risk profile. The risk category may shift over time. The lowest category on the above scale does not mean "risk free".
- Investing in emerging market government bonds will expose the Fund to any political, social and economic instability in the relevant countries.
- Changes to interest rates will have a significant impact on bond prices and the Fund's value.
- If a bond issuer fails to make scheduled coupon payments or fails to repay the principal amount of a bond at maturity (i.e. is in "default"), this may significantly impact the Fund's value.
- Bond markets can be "illiquid" (i.e. have limited trading activity) which may mean that the Fund is not able to buy and sell bonds at fair prices.

- Third party service providers (such as counterparties entering into FDIs with the Fund or the Company's depository) may go bankrupt and fail to pay money due to the Fund or return property belonging to the Fund.
- The Share Class performance may not closely match the performance of the Performance Benchmark because (1) the FX forwards used by the Fund may be adjusted more frequently (and at different rates) than those used by the Performance Benchmark and (2) the Fund does not replicate the Index composition exactly and is subject to fees, costs and taxes that the Index is not.
- If the Index provider stops calculating the Index or if the Fund's license to track the Index is terminated, the Fund may have to be closed.
- It may not always be possible to buy and sell Shares on a stock exchange or at prices closely reflecting the NAV.
- There is no capital guarantee or protection on the value of the Fund. Investors can lose all the capital invested in the Fund.
- Please refer to the "Risk Factors" section of the Company's Prospectus and the Fund Supplement.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
