

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

IFSL Church House Tenax Absolute Return Strategies Class C Shares

A Sub-fund of the IFSL CH Special Mandates Fund (ISIN Income GB00BNBNRD03, Accumulation GB00BNBNRF27)

This Fund is managed by Investment Fund Services Limited (IFSL)

Objectives and Investment Policy

The aim of the Fund is to provide a positive absolute return (after any charges have been taken out of the Fund) over any rolling twelve-month period at low levels of volatility (meaning changes in value of up to 5% per annum in normal market conditions).

Capital invested in the Fund is at risk and there is no guarantee that a positive return will be achieved over any rolling twelve-months, or any other period.

The Fund is actively managed, which means the Investment Manager decides which investments to buy or sell and when. The Fund will gain a diverse exposure to a range of global asset classes.

The Fund may at any one time be invested in one or more of the following: bonds (which are loans typically issued by companies and governments), shares of companies, other funds, money market instruments (which are short-term loans) and deposits.

Up to 10% of the Fund may be invested in units/shares in other funds (which could include other funds managed by the Authorised Corporate Director, the Investment Manager or one of their associates).

The Investment Manager has no fixed asset allocation for any asset class but will change the asset mix in the Fund from time to time, considering market conditions, in a way that, in the Investment Manager's view, is consistent with the Fund's aim to maintain a low level of volatility. As such, the Fund may hold high proportions in cash and other lower-risk assets such as near cash, money market instruments and deposits.

The Investment Manager is not constrained by any particular asset allocation in respect of geography, industry or sector. The shares of companies in which the Fund invests may be from companies anywhere in the world. The bonds may

include floating rate notes (a debt instrument with a variable interest rate), index linked (a bond whose interest payment varies depending on the performance of a specific index) or convertible securities (bonds that can convert into shares).

The Fund may hold up to 20% in cash to enable the ready settlement of liabilities, for the efficient management of the portfolio or in pursuit of the Fund's investment objective.

The Fund does not invest in derivatives, however other funds purchased may have the ability to use derivatives to varying degrees.

The Investment Association (IA), the trade body for UK investment managers, has created a number of 'sectors', as a way of dividing funds into broad groups with similar characteristics.

The Fund aims, but does not guarantee, to deliver positive returns (greater than zero) in any market conditions over rolling 12 month periods. This puts it in the IA Targeted Absolute Return sector.

The IA publishes figures showing how often funds in this sector fail to provide returns greater than zero for available rolling 12 month periods over the last three years on its website (www.theia.org/industry-data/fund-sectors/tar-monitoring).

As the Fund does not have a benchmark, you may want to assess the Fund's performance using this data.

The Fund pays income. If you wish to receive this please tell us. If you do not want to receive income you will be given accumulation shares which means income is invested back into the Fund and reflected in the price of your shares.

You can buy or sell all or part of your investment on any business day subject to the minimum holding requirements.

Risk and Reward Profile

This indicator aims to give you a measure of the price movement of this share class based on past data. It uses historic returns over the last five years. If five years' data is not available, simulated data based on a representative portfolio are used.

Past data may not be a reliable indication of the future risk profile of the Fund. The risk category may change in the future and is not guaranteed. The lowest category does not mean risk free. The value of investments and the income from them may fall as well as rise and you may not get back the amount you originally invested.

This Fund has been measured as 3 because its investments have experienced low to moderate volatility in the past. The Fund's volatility is affected by various risks, including:

The Fund will be exposed to financial markets and market conditions can change rapidly. Prices can move irrationally and be affected unpredictably by diverse factors, including political and economic events.

The Fund may be exposed to the shares of smaller companies which are typically riskier than larger, more established companies. Difficulty in trading may arise, resulting in a negative impact on your investment. Shares in smaller companies may be harder to sell at a desired price and/or in a timely manner, especially in difficult market conditions.

The Fund may be exposed to emerging markets, which are typically riskier than more established markets, as they can involve a higher than average risk due to the volatility of currency exchange rates, limited geographic focus, investment in a smaller number of issues, political and economic instability and less liquid markets. Difficulty in trading may arise, resulting in a negative impact on your investment.

The Fund may be exposed to bonds, the prices of which will be impacted by factors including; changes in interest rates, inflation expectations and perceived credit quality.

The Fund may have exposure to overseas markets, either directly or indirectly, and is therefore exposed to currency risk. As a result, the value of your investment can be affected by changes in exchange rates.

Bonds known as 'sub-investment grade' bonds generally produce a higher level of income, but carry greater risk that the issuer will not be able to pay the income or repay the capital at maturity.

In certain market conditions, the Fund may not be able to sell one or more of its assets for the full value, or at all. This could affect the performance of the Fund and could cause the Fund to defer or suspend redemptions of its shares, meaning investors may not be able to have immediate access to their holdings.

A company that we deal with may renege on its obligations, costing the Fund money.

The Fund's cash may be deposited with various financial institutions. The Fund may suffer a loss if these institutions fail to make its payments or become insolvent.

Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the Fund, or inconvenience to investors.

Investors are encouraged to read the 'risk factors' section of the Fund's prospectus to find a more extensive list of the risks that apply to this Fund.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The entry and exit charges shown are maximum figures. In some cases you may pay less - you can find this out from your financial adviser.

The ongoing charges figure is based on expenses as at 30/09/2023. This figure may vary from year to year. It excludes:

- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another collective investment undertaking.

For more information about charges, please see Section 8 of the Fund's Prospectus, which is available at www.ifslfunds.com.

One-off charges taken before or after you invest

Entry Charge	0.00%
Exit Charge	None

This is the maximum that might be taken out of your money before it is invested.

Charges taken from the fund over each year

Ongoing Charges	0.82%
------------------------	-------

Charges taken from the fund under certain conditions

Performance Fee	None
------------------------	------

Past Performance

Historic performance to 31 December 2023

Past performance is not a reliable indicator of future performance; the value of your investment and any income from it can go down as well as up.

Performance returns are based on the net asset value with distributable income reinvested and takes account of all ongoing charges, but not entry and exit charges. The past performance of this share class is calculated in GBP.

This Fund was launched on 22 November 2007.

This share class was launched on 23 November 2015.

On 24 August 2020 the Fund converted from a NURS to a UCITS.
