LYXOR IBEX 35 INVERSO DIARIO UCITS ETF (the "Fund")

ISIN: FR0010762492 - Collective investment scheme (FCP) domiciled in France.

Managed by Lyxor International Asset Management S.A.S. ("LIAM")

Investment objectives and policies

The investment objective is to track both the upward and downward trend in the IBEX 35 Inverso Index (Bloomberg Code: IBEXSH) ("Benchmark Index"), representative of a x2 leverage short position strategy on the reinvested-dividends IBEX 35 index, the main Spanish stock market index, with daily rebalancing.

The anticipated ex-post tracking error under normal market conditions is 0.10%.

The Fund aims to achieve its objective through indirect replication, namely by entering into one or more over-the counter swap agreements (financial futures).

The Fund may invest in a diversified portfolio of international equities, the performance of which will be swapped against that of the Benchmark Index via financial futures. An up-to-date breakdown of the Fund's securities portfolio is provided on the website www.lyxoretf.com.

The net asset value is also indicated on the Reuters and Bloomberg pages of the Fund and may also be stated on the websites of stock markets where the Fund is listed.

The unit currency is the euro (EUR).

Risk and return profile

The risk and return category provided below is based on the historical performance of the assets included in the fund or of its benchmark index. This risk indicator may, therefore, not be a reliable indicator of future risk, and it may change over time. The lowest category does not mean that the investment is risk-free. Resulting from its exposure to the Benchmark Index, the Fund has been classified within category 6. Category 6 indicates that it is possible to suffer a severe loss of capital under normal market conditions; the value of your investment may change substantially and experience quite large daily upside or downside variations.

The significant risks for the UCITS not taken into account in the above-mentioned indicator and which could result in a decrease in the Fund's net asset value and which the Fund is authorised to include in this document (see the Risk Profile section of the prospectus for more information concerning the risks):

- **Counterparty:** the Fund is exposed to the risk of bankruptcy or any other type of default by any counterparty with which it has concluded an agreement or transaction. In accordance with UCITS regulations, this risk may not exceed 10% of the Fund's total assets, for a given counterparty.
- **Risk linked to the use of futures:** in order to achieve its investment objective, the fund uses OTC-traded futures to reach the performance of the Benchmark Index. These futures may be affected by various types of risks such as amendments to the law and/or regulations, including tax regulations.
