AMUNDI ETF LEVERAGED MSCI USA DAILY UCITS ETF - EUR

ISIN code: (C/D) FR0010755611

This Fund is managed by Amundi, an Amundi Group company.

Objectives and Investment Policy

Classification by the French Market Regulator (AMF): International equities.

Tracking method: Swap-based replication.

By subscribing to AMUNDI ETF LEVERAGED MSCI USA DAILY UCITS ETF - EUR, you are investing in a strategy index-tracking Fund with the objective to track, as closely as possible, the performance of the MSCI USA Leveraged 2x Daily strategy index ("the Strategy Index"), whether the Strategy Index rises or falls. The target for maximum tracking error between changes in the Fund's net asset value and that of the Strategy Index is 2%.

The euro-denominated Strategy Index with net dividends reinvested is calculated and published in real time by index provider MSCI. You are exposed to the currency exchange risk between the currencies of the stocks in the index and the currency of the unit in which you are invested.

The MSCI USA Leveraged 2x Daily Strategy Index tracks the performance of a strategy which consists in doubling exposure to the MSCI USA Index. It accordingly offers double exposure to the upward and downward trends experienced by the MSCI USA index. In this respect, if the MSCI USA index rises by 1%, the Fund's NAV will rise by 2% minor borrowing costs, and conversely if the index falls by 1% the Fund's NAV will fall by 2% plus borrowing costs. The equities in the MSCI USA Index are leading securities traded on the US market. The leverage is daily. The performance of the leveraged index over a period longer than 1 day can therefore differ by 2 times the performance of the no-leverage index over the same period.

More information about the composition of the Strategy Index and its operating rules is available in the prospectus and at [msci.com](https://www.msci.com).

The Strategy Index is available in real time via Reuters (.MIUS00000MEU) and Bloomberg (M00UUS02).

The Fund seeks to achieve its objective by: (i) entering into a Total Return Swap (a financial derivative instrument, the "TRS"), and (ii) investing in a diversified portfolio of equities (the "Portfolio"). The performance of the Portfolio will be exchanged for the performance of the Strategy Index in accordance with the terms of the TRS.

Through the Portfolio, you will be permanently invested at a level of at least 75% in stocks eligible for the Plan d'Epargne en Actions (PEA, tax wrapper reserved to residents in France).

The Fund's net profit and net realised capital gains are reinvested or redistributed each year at the discretion of the Management Company.

You may resell your units during the trading hours of the various stock exchanges, provided that the Market Makers can maintain market liquidity.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and reward profile

This Fund's risk category reflects the market risk of the international equities in which it is invested and the leverage strategy of the Index.

The initial capital invested is not guaranteed.

Historical data such as that used to calculate the synthetic indicator may not be a reliable indicator of the future risk profile of the Fund. The risk category associated with this Fund is not guaranteed and may evolve over time.

The lowest category does not mean "risk free."

Particular risks for the Fund not included in these indicator are:

- Counterparty risk: this is the risk of default by a market operator, including a total return swap counterparty, that prevents it from honouring its obligations to the Fund.
- The leverage strategy for the Strategy Index is used to obtain a daily multiple (x2) of the movements of the equities in the MSCI USA Index.

The occurrence of one of these risks may decrease the net asset value of your portfolio.
