- The lowest category does not mean 'no risk'.
- The Fund is in this category due to the nature of its investments and previous levels of volatility (how much the value of the Fund rises and falls).
- Derivative risk** - the Fund may use derivatives to reduce costs and/or the overall risk of the Fund (this is also known as Efficient Portfolio Management or "EPM"). Derivatives involve a level of risk, however, for EPM they should not increase the overall riskiness of the Fund.
- Currency (FX) Risk** - The Fund can be exposed to different currencies and movements in foreign exchange rates can cause the value of investments to fall as well as rise.
- Share Class Hedging Risk** - The share class hedging process can cause the value of investments to fall due to market movements, rebalancing considerations and, in extreme circumstances, default by the counterparty providing the hedging contract
- Market Concentration Risk (Geographical Region/Country)** - Investing in a particular country or geographic region can cause the value of this investment to rise or fall more relative to investments whose focus is spread more globally in nature.
- Pricing risk** - Price movements in financial assets mean the value of assets can fall as well as rise, with this risk typically amplified in more volatile market conditions.
- Counterparty Default Risk** - The risk of losses due to the default of a counterparty e.g. on a derivatives contract or a custodian that is safeguarding the Fund's assets.

- ESG** - Investments are selected or excluded on both financial and non-financial criteria. The Fund's performance may differ from the broader market or other Funds that do not utilise ESG criteria when selecting investments.
- Charges from capital** - Some or all of the Fund's charges are taken from capital. Should there not be sufficient capital growth in the Fund this may cause capital erosion.

The ongoing charges figure excludes portfolio transaction costs, except in the case of an entry/ exit charge paid by the Fund when buying or selling shares in another collective investment undertaking.
- Conversion fee of up to 1.00% of the gross amount being converted may be applied for conversions between classes of the same sub-fund and from one sub-fund to another sub-fund.
