

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

BMO Bloomberg Barclays Global High Yield Bond (GBP Hedged) UCITS ETF

(ISIN IE00BZ053R76), a Sub-Fund of BMO UCITS ETF ICAV.
This Fund is managed by BMO Asset Management Limited.

Objectives and investment policy

The objective of this Exchange Traded Fund is to provide an exposure to global fixed-rate high yield bonds that have a maturity greater than one year and a minimum issue size of US\$500m (or its equivalent in other currencies) which are hedged to sterling.

The Fund seeks to achieve this by investing mainly in a portfolio of high yield bonds (securities that pay either a fixed or variable level of income on a periodic basis and generally repay a specified amount at a pre-determined date and typically with an independently assessed credit worthiness rating of BB and below or without a credit rating) that track the performance of the Bloomberg Barclays Global High Yield Corporate Very Liquid ex-144A Hedged to GBP Index Hedged to GBP (the Index) (or another similar index determined by the Directors), while seeking to minimise as far as possible the tracking error (a measure of how closely a portfolio follows the index to which it is benchmarked) between the Fund's performance and that of the Index.

The Fund will aim to replicate the Index by holding all of the Index Securities in a similar proportion to their weighting in the Index. Where full replication of the Index is not reasonably possible, the Fund will use the stratified sampling methodology to select Index Securities to build a portfolio that is comparable to that of the Index.

Although the Fund will invest mainly in high yield bonds it may also invest in other opened ended funds and derivative contracts (an investment contract between the Fund and a counterparty the value of which is derived from one or more underlying assets) to hedge positions or to manage the Fund more efficiently and reduce risk. Hedging is an investment technique that may be used to protect the value of the Fund from adverse price movements in bonds or in currencies other than the Fund's accounting currency, which is sterling. The Fund normally hedges currency exposure back to sterling. The use of derivatives may mean the Fund is leveraged but such leverage will not normally exceed 100% of the Fund's net asset value.

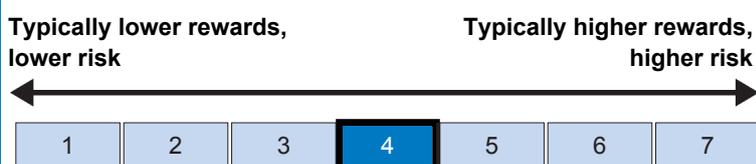

Income generated by the Fund will be paid to you quarterly.

There is no minimum holding period for this Fund, but it may not be suitable for investors who need to encash their investment within five years.

The Fund's shares are listed on the London Stock Exchange (LSE). In normal circumstances, only authorised participants (e.g. select financial institutions) may buy and sell shares directly with the Fund. Other investors can buy or sell shares daily through an intermediary on the LSE where the shares are traded.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Historical data may not be a reliable indicator of the Fund's future risk and reward profile. The risk category shown is not guaranteed and may change over time. The lowest category does not mean 'risk free'. The value of your investment may fall as well as rise.

The category is based on the rate at which the value of the investments held by the Fund have moved up and down in the past.

The indicator does not adequately reflect the following risks of investing in particular assets, which may impact on future investment return:

Credit Risk: receiving income or capital due from debt instruments is dependant on the provider's ability to pay.

Derivative Risk: derivative values may rise and fall at a greater rate than equities and debt instruments. Losses can be greater than the initial investment.

Fixed Interest Securities Risk: changes in interest rates can affect the values of fixed interest holdings.

Leverage Risk: the use of derivatives to increase the exposure of the Fund to the market through either long or short positions will make the value of the Fund's investments more volatile than those of an unleveraged fund.

Market Risk: the value of assets held by the Fund may go down as well as up. There can be no assurances that the investment objectives of the Fund will be achieved.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the Fund over a year

Ongoing charges	0.35%
-----------------	-------

Charges taken from the Fund under specific conditions

Performance fee	NONE
-----------------	------

The ongoing charges figure is based on the last year's expenses and may vary from year to year. It excludes the costs of buying or selling assets for the Fund (unless these assets are shares of another fund).

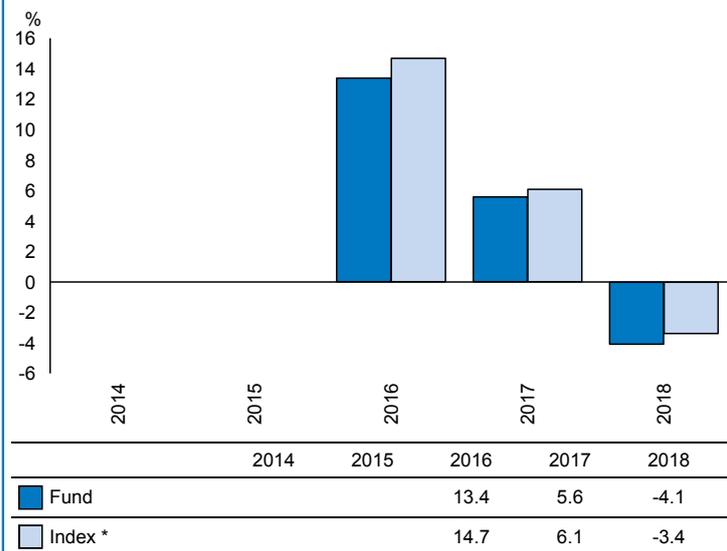

Not applicable to secondary market investors. Investors dealing on a stock exchange will pay fees charged by their stockbrokers. Such charges are publicly available on exchanges on which the shares are listed and traded, or can be obtained from stockbrokers. It excludes:

Performance fees

Portfolio transaction costs, except in the case of an entry/exit charge paid by the UCITS when buying or selling units in another collective investment undertaking.

For more information about charges, please see the section entitled Fees and Expenses in the Fund's prospectus, which is available at www.bmogam.com/etf.

Past performance

You should be aware that past performance is not a guide to future performance.

Fund launch date: 05/11/2015.

Share/unit class launch date: 05/11/2015.

Performance is calculated in GBP.

This chart shows how much the Fund increased or decreased in value as a percentage in each year.
