Man GLG Undervalued Assets Fund Professional Accumulation Shares (Class C)

(ISIN:GB00BFH3NC99) Man GLG Undervalued Assets Fund (the 'Fund') is a sub-fund of Man UK ICVC (the 'Company').

Man Fund Management UK Limited, part of Man Group plc, is the Authorised Corporate Director.

Objectives and investment policy

- The objective of the Fund is to achieve long term capital growth.
- To achieve the objective the Fund will invest predominantly in securities of UK listed companies, which are considered to be undervalued relative to their asset base and to the returns on capital the companies are generating, either directly or indirectly (through permitted derivatives) including exchange-traded or "over-the-counter" financial derivative instruments such as stock options, equity swaps and contracts for differences.
- The Fund may use financial derivative instruments (instruments whose prices are dependent on one or more underlying asset 'FDI') extensively for investment purposes (including the taking of synthetic short positions) as well as for hedging (the practice of undertaking one investment activity with the aim of protecting against loss in another) or other efficient portfolio management purpose.
- The Fund may also invest in other transferable securities, units or shares in collective investment schemes, money market instruments, deposits, cash, near cash and derivatives and forward transactions.
- The Fund may also hold ancillary liquid assets such as time deposits and may use currency transactions, including forward currency contracts, currency swaps and foreign currencies to alter the exposure characteristics of the transferable securities held by the Fund.
- Income earned on investments will be added to the value of investors' shares. Shares can be bought and sold on each Dealing Day.

Risk and reward profile

Lower risk — Higher risk

Typically lower rewards — Typically higher rewards

1	2	3	4	**5**	6	7

- The lowest category does not mean 'risk free'.
- The risk and reward profile is not guaranteed and may change over time.
- Historical data may not be a reliable indication for the future.
- The risk category for this share class is 5 as funds of this nature engage in strategies that typically have a moderate to high volatility. The calculation is based on the historical volatility of the Fund's performance. Where there is insufficient Fund performance the calculation is based on either the historical volatility of a relevant benchmark for the investment strategy or the manager's Value at Risk limit for the Fund. Please refer to the prospectus for further information relating to the Value at Risk.

The following risks may not be fully captured by the risk and reward profile:

- The use of FDI involves additional risks: (i) FDI may be highly sensitive to price movements of the asset on which they are based; (ii) a counterparty to a non-exchange traded FDI may not meet its payment obligations in the event of default; (iii) the use of FDI may result in increased leverage. These risks may lead to significant losses.
- Liquidity characteristics of non-exchange listed investments can be irregular, and may result in higher than anticipated costs to liquidate the investment.
- The Fund is a specialist country-specific fund which, as a result, may carry greater risk than a more internationally diversified portfolio.
- The Fund is subject to normal market fluctuations and the risks associated with investing in international securities markets and therefore the value of your investment and the income from it may rise as well as fall and you may not get back the amount originally invested.

A complete description of risks is set out in the prospectus section entitled 'Risk Factors'.
