## Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

## Objectives and investment policy

**Objective:** The Fund aims to achieve an investment return from income and capital growth over the medium to long term (at least three years).

**Policy:** The Fund invests in shares of companies that are involved in infrastructure around the world.

The infrastructure sector includes utilities (e.g. water and electricity), highways and railways, airports services, marine ports and services, and oil and gas storage and transportation.

The Fund does not invest directly in infrastructure assets.

The Fund may invest up to 10% in other funds.

The Fund may use derivatives to reduce risk or to manage the Fund more efficiently.

**Strategy:** The Fund's managers strategy is to invest in a globally diversified portfolio of listed infrastructure companies.

The Fund manager's investment strategy is founded on the principle of stewardship, allocating capital to what it believes are good quality companies with sound growth prospects and strong management teams. It seeks to engage actively and constructively with company leaders on sustainability and other investment risks and opportunities.

**Benchmark:** The Fund's performance is compared against the value of the FTSE Global Core Infrastructure 50/50 Index and the Fund is included in the Investment Association's Global Sector.

The Fund's manager may use its discretion when deciding which investments should be held by the Fund.

The Fund is actively managed; investment of the Fund's assets is not constrained by the benchmark composition or sector requirements and the Fund's manager has discretion within the Fund's investment policy to invest in assets without regard to the benchmark.

**Recommendation:** this Fund may not be appropriate for investors who plan to withdraw their money within five years.

You may receive a regular income from your investment which will be paid semi-annually. This may affect the potential growth of your investment.

You can buy and sell shares in the Fund on any business day. As long as we receive your instruction before 12 noon (UK time), shares will be bought at that day's price.

## Risk and reward profile

- The synthetic risk reward indicator (the SRRRI) rating is not a measure of the risk of you losing your investment but describes how much the value of the Share Class has gone up and down in the past. Where a Share Class has not yet launched, the SRRRI is calculated using representative data.
- The SRRRI rating is based on historical data which may not be a reliable indication of the future risks and rewards of the Share Class.
- We cannot guarantee that the rating of the Share Class will remain the same; it may change over time.
- Even the lowest rating 1 does not mean a risk free investment.
- On a scale of 1 (less risky) to 7 (more risky), this Share Class has a rating of 6 due to its past performance (or representative data) and the nature of its investments. Shares with a rating of 6 might have higher risks, but also higher returns.
- Risk is taken in order to make a higher potential return; the more risk a fund takes, the higher the potential return but the greater the risk of loss.

- The value of the Fund and its return is not guaranteed and may fall as well as rise. You may get back significantly less than you originally invested.

Material risks not adequately captured by the SRRRI:

- **Emerging market risk:** Emerging markets tend to be more sensitive to economic and political conditions than developed markets. Other factors include greater liquidity risk, restrictions on investment or transfer of assets, failed/delayed settlement and difficulties valuing securities.
- **Single sector risk:** investing in a single economic sector may be riskier than investing in a number of different sectors. Investing in a larger number of sectors helps to spread risk.
- **Currency risk:** the Fund invests in assets which are denominated in other currencies; changes in exchange rates will affect the value of the Fund and could create losses. Currency control decisions made by governments could affect the value of the Fund's investments and could cause the Fund to defer or suspend redemptions of its shares.
- **Listed infrastructure risk:** the infrastructure sector and the value of the Fund is particularly affected by factors such as natural disasters, operational disruption and national and local environmental laws. For further information on risks, please refer to the Risk Factors section in the Company's prospectus.
