J O Hambro Capital Management UK Dynamic Fund

Y Accumulating GB00BDZRJ101

A sub-fund of J O Hambro Capital Management UK Umbrella Fund
Managed by JOHCM Funds (UK) Limited

Objectives and investment policy

- The objective of the Fund is to achieve capital growth over a rolling seven to ten year period as well as providing income. The Fund's target is to have a return greater than the FTSE All-Share Total Return index (12pm adjusted), which is used in the calculation of performance fees.
- The Fund will aim to achieve this objective through investing at least 90% of the Fund in the shares of companies listed on either of the two primary markets of the London Stock Exchange: the Main Market (FTSE) and the Alternative Investment Market (AIM). At all times at least 75% of the Fund is invested in the shares of companies that are domiciled, incorporated or have a significant portion of their business in the UK. The Fund will typically invest in the shares of 35-50 different companies. The Fund invests in companies undergoing major transformation in their businesses. The fund manager believes these changes will lead to an improvement in the performance of these companies and their share prices. At least 50% of the Fund will be invested in companies listed on the FTSE 100 index, which contains the 100 largest companies listed on the London Stock Exchange. These are the most liquid on the exchange, meaning they can be easily bought and sold without materially affecting their share price. The Fund also invests in smaller companies. These may be less liquid and are therefore widely regarded as being riskier. Other than investing in shares listed in the UK, the Fund may also invest in shares listed elsewhere, money market instruments, deposits, warrants and units in other collective investment schemes.
- Any income the Fund generates for this share class is accumulated.
- Performance of the Fund may be measured against the FTSE All-Share Total Return Index (the "Index"). The Index is used as a target benchmark for the Fund as the Performance Fee for the Fund is payable when the performance of the Fund exceeds that of the Index. The use of the Index does not limit the investment decisions of the fund manager. Therefore the shareholdings of the Fund may differ significantly from those of the Index, however it may influence the weightings of investments in components of the Index. The Index is used as it is the broadest available index of shares listed on the London Stock Exchange, representing at least 98% of the market value of the shares listed.
- The Fund is actively managed which means that the fund manager uses their expertise to pick investments to achieve the objective of the Fund.
- You can buy and sell shares in the Fund, before 5.00pm, on any day which is a working day in London.

Risk and reward profile

◆ Lower risk				Higher risk ◆		
◆ Typically lower rewards				Typically higher rewards ◆		
1	2	3	4	5	6	7

- The risk and reward indicator is calculated on the basis of the share class volatility (the ups and downs in its value) over the prior 5 year period.

The risk and reward indicator:

- is based on historical data and may not be a reliable indication for the future;
- is not guaranteed and may change over time.
- The lowest category does not mean that a share class is risk free.

The share class category reflects the following factors:

- Higher volatility can result from investments in shares as their value may fluctuate more than other financial instruments, such as bonds.

- Your initial investment is not guaranteed.

In addition to the risk captured by the indicator, the fund value may be affected by:

- Any change in the Company's tax status or in legislation could affect the value of investments held by the Company.
- Political and /or regulatory Risks
- Liquidity risk: The risk that some securities held by the Fund may be difficult or impossible to sell at the desired time and price. The Fund's investments include shares in small-cap companies. Small-cap companies tend to be traded less frequently and in lower volumes than larger companies making them potentially less liquid and more volatile.
- Investors should note that a more detailed description of risk factors is set out in full in the Prospectus.

Charges

One off charges taken before or after you invest	
Entry charge	5.00%
Exit charge	0.00%
This is the maximum that might be taken out of your money. Consult your financial advisor or distributor for the actual amount they may charge.	
Charges taken from the fund over a year	
Ongoing charge	0.68%
Charges taken from the fund under certain conditions	
Performance fee	
During the year ended 31 December 2018 the performance fee amounted to: 0.00%.	

The charges you pay as an investor in the Fund are used to cover the operational costs of the Fund, including marketing and distribution costs. These charges reduce the potential growth of your investment.

Ongoing charges are based on figures for the year ended 31 December 2018.

This figure may vary from year to year and does not include Fund transaction costs.

For more information about charges see the Fund's prospectus, available at www.johcm.com.

Performance of the Fund may be measured against the FTSE All-Share Total Return Index (the "Index"). The Index is used as a target benchmark for the Fund as the Performance Fee for the Fund is payable when the performance of the Fund exceeds that of the Index. A performance fee of 15% is payable on the excess if the NAV outperforms the Index on an annual basis. The calculation is performed daily. Any underperformance is carried forward. This fee applies to all share classes. The use of the Index does not limit the investment decisions of the fund manager. Therefore the shareholdings of the Fund may differ significantly from those of the Index, however it may influence the weightings of investments in components of the Index. The Index is used as it is the broadest available index of shares listed on the London Stock Exchange, representing at least 98% of the market value of the shares listed.

Past performance

Past performance is not a reliable guide to future performance.

These performance results include ongoing charges and any performance fee taken from the Fund but do not include any entry charges that you might have to pay.

The share class came into existence in 2013.

Past performance has been calculated in GBP.
