## AMUNDI ETF SHORT GOVT BOND EUROMTS BROAD INVESTMENT GRADE 10-15 DAILY UCITS ETF

ISIN code: (A) FR0010823385

This Fund is managed by Amundi, an Amundi Group company.

### Objectives and Investment Policy

Classification by the French Market Regulator (AMF): Diversified.

Tracking method: Swap-based replication.

By subscribing to AMUNDI ETF SHORT GOVT BOND EUROMTS BROAD INVESTMENT GRADE 10-15 DAILY UCITS ETF, you are investing in a strategy index-tracking Fund, the objective of which is to track, as closely as possible, the performance of the Short EuroMTS Investment Grade Broad 10-15 strategy index ("the Strategy Index"), whether the Strategy Index rises or falls. The target for maximum tracking error between changes in the Fund's net asset value and that of the Strategy Index is 2%.

The euro-denominated Strategy Index index with coupons reinvested is calculated and published in real time by index provider EuroMTS.

The Short EuroMTS Investment Grade Broad 10-15 Strategy Index tracks the performance of a strategy which consists of inverting exposure to the EuroMTS Investment Grade Broad 10-15 index (coupons reinvested) through the combination of a short position on the EuroMTS Investment Grade Broad 10-15 index and exposure to a risk-free financial instrument. As a result, it offers an inverse exposure - upwards or downwards - to the changes in the EuroMTS Investment Grade Broad 10-15 index. The bonds in the EuroMTS Investment Grade Broad 10-15 index are government bonds of Eurozone countries with maturities ranging from 10 to 15 years and with at least two Investment Grade ratings by the rating agencies S&P, Moody's and Fitch.

More information about the composition of the Strategy Index and its operating rules is available in the prospectus and at [euromtsindex.com](http://euromtsindex.com).

The Strategy Index is available in real time via Reuters (EM2SIEO=) et Bloomberg (EM2SIEO).

The Fund seeks to achieve its objective by: (i) entering into a Total Return Swap (a financial derivative instrument, the "TRS"), and (ii) investing in a diversified portfolio of bonds and money market instruments (the "Portfolio"). The performance of the Portfolio will be exchanged for the performance of the Strategy Index in accordance with the terms of the TRS.

The Fund's net profit as well as its net realised capital gains are automatically reinvested.

You may resell your units during the trading hours of the various stock exchanges, provided that the Market Makers can maintain market liquidity.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

### Risk and reward profile

This Fund's risk category primarily reflects the market risk of the long-term Eurozone bonds in which it is invested and the index inverse performance strategy.

The initial capital invested is not guaranteed.

Historical data such as that used to calculate the synthetic indicator may not be a reliable indicator of the future risk profile of the Fund. The risk category associated with this Fund is not guaranteed and may evolve over time.

The lowest category does not mean "risk free."

Particular risks for the Fund not included in these indicator are:

- Credit risk: this is the risk of sudden deterioration in the creditworthiness of an issuer or that of its default.
- Counterparty risk: this is the risk of default by a market operator, including a total return swap counterparty, that prevents it from honouring its obligations to the Fund.
- Complex products such as derivatives are used to obtain a daily performance opposite to that of the EuroMTS Investment Grade Broad 10-15 index.

The occurrence of one of these risks may decrease the net asset value of your portfolio.

## Charges

The charges and fees paid are used to cover the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest
