

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Market Access iStoxx® MUTB Japan Quality 150 Index UCITS ETF (the “Fund”)

A sub-fund of Market Access

Management Company: FundRock Management Company S.A.

ISIN: LU1598815121

Objectives and investment policy

The Fund’s objective is to replicate the performance of the iStoxx® MUTB Japan Quality 150 Index (the “Index”). The Index consists of shares of 150 Japanese companies. Constituents are selected with the aim of capturing the performance of high quality companies. The Index defines high quality companies as those with a high profitability potential, low debt, sustainable cash flow into their business and business stability. The selection of the Index constituents is based on a model which ranks companies according to certain financial ratios (ratios that are determined from companies’ financial statements). Companies are also screened by how heavily they are traded on exchange. The Index is calculated in Japanese Yen. The Index assumes that dividends of Index constituents are reinvested in the Index net of taxes. In order to achieve its investment objective, the Fund will use a method of either physical or synthetic replication of the Index. The investment manager will decide between physical and synthetic replication on an ongoing basis, in the best interests of investors. At the launch date, the fund will use physical replication.

The Fund will replicate the Index physically by aiming to invest as far as possible in the constituents of the Index, in the same proportions in which they are included in the Index. In order to replicate the Index synthetically, the Fund will invest in a portfolio of securities (whose composition can be viewed at marketaccessetf.com), and enter into a derivative agreement (the “Swap Agreement”) with a swap counterparty (the “Swap Counterparty”). Under the Swap Agreement, the Fund will exchange the performance of the portfolio of securities against the performance of the Index.

- The Fund does not pay dividends.
- You can buy or sell shares of the Fund through your stockbroker via the stock exchanges where the Fund is traded.

Other information:

- Long term holding period recommended.
- Information about the Index can be found at stoxx.com
- The indicative Net Asset Value (iNAV) can be viewed at deutsche-boerse.com

Risk and reward profile

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- The risk and reward indicator is a measure of risk based on the past performance and simulated past performance of the Fund.
- The risk and reward indicator is calculated using historical and simulated data. Historical and simulated data may not be a reliable indication for the future.
- The Fund is rated 6 due to the nature of its investments, specifically the extent and frequency with which these investments have fallen and risen historically.
- The lowest category does not mean ‘risk-free’.
- The risk and reward profile shown is not guaranteed to remain unchanged and may shift over time.
- This risk and reward indicator is not a complete measure of the risk of losing the money that you have invested.
- The Fund is neither capital-protected nor guaranteed. You may lose the entire amount that you have invested.

The indicator does not take into account the following risks of investing in the Fund:

Replication Risk: The Fund may be unable to hold the constituents of the Index in the same proportions in which they are included in the Index, and there is no guarantee that the Fund will track the performance of the Index.

Counterparty Risk: There is a risk that the Swap Counterparty may default and the Fund may lose a potentially unlimited portion of its value.

Index Methodology Risk: The Fund tracks an Index comprising shares with high quality characteristics. There is no guarantee that the Index or the Fund will meet this objective.

Concentration risk: Investment risk is concentrated in a single market. The value of the Fund is therefore affected by localised factors to a greater degree than other, broader based investments. Your investment may be affected by local market conditions including political, economic and regulatory developments in Japan.

Currency risk: Changes in foreign exchange rates may affect the value of your investment.

Operational Risk: Failure of procedures or systems, as well as human error or external events associated with the Fund’s management and/or administration, may cause losses to the Fund.

Liquidity Risk: Under certain circumstances your ability to buy or sell Fund shares via the stock exchanges where the Fund is traded may be limited.

Charges for this Fund

The charges you pay are used to pay the costs of running the Fund including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	None
Exit charge	None

This is the maximum that might be taken out of your money before it is invested or before the proceeds of the investment are paid out.

Charges taken from the Fund over a year

Ongoing charge	0.50%
----------------	-------

Charges taken from the Fund under certain specific conditions

Performance fee	None
-----------------	------

The ongoing charges figure is an estimate of the charges as there is insufficient historical data. This figure is fixed at 0.50% of the Fund's net asset value. It excludes portfolio transaction costs.

Entry and exit charges do not apply when you buy or sell shares of the Fund through your stockbroker via the Stock Exchange but you may have to pay brokerage fees.

For more information about charges please see the "Fees and Commissions" section of the Fund's particulars in the prospectus which is available at marketaccessetf.com

Past Performance

This Share Class has no performance data for a complete calendar year.

The Fund was launched on 24 May 2017.

Past performance is not a guide to future performance.
