

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Xtrackers USD Corporate Bond UCITS ETF

Share Class: 1D (ISIN: IE00BZ036H21), (WKN: A14XH5), (Currency: USD)

a sub fund of Xtrackers (IE) plc. The Fund is managed by Deutsche Asset Management S.A., part of the Deutsche Bank Group.

Objectives & Investment Policy

The aim is for your investment to reflect the performance of the Bloomberg Barclays USD Liquid Investment Grade Corporate Index (Index). The Index is designed to reflect the performance of fixed-interest tradable debt (bonds) which are investments that pay out a fixed level of income or interest. The bonds are issued by financial, utility or industrial US and non-US companies that meet specific maturity, credit rating and liquidity requirements.

Bonds are only eligible for inclusion in the Index if they meet certain pre-determined standards. They must also be rated as "investment grade", meaning they have been judged by an independent agency as likely to meet their payment obligations.

The Index is calculated on a total return basis. This means that all interest payments received from bonds are reinvested in the Index. The Index is reviewed and rebalanced monthly.

To achieve the aim, the Fund will attempt to replicate the Index by buying a substantial number of the bonds which are comprised in the Index in the same proportion as the Index, as determined by the Sub-Portfolio Manager of the Fund which is Deutsche Asset Management (UK) Limited.

The Fund may employ techniques and instruments in order to manage risk, reduce costs and improve results. These techniques and instruments may include the use of derivatives. The Fund may also engage in secured lending of its investments to certain eligible third parties to generate additional income to offset the costs of the Fund.

Dividends may be declared on your shares on a quarterly basis. You may redeem your investment on demand on a daily basis.

Risk and Reward Profile

The risk and reward category is calculated using historical data which may not be a reliable indicator of the Fund's future risk profile.

The risk and reward category may shift over time and is not a target or a guarantee.

The lowest category (i.e. Category 1) does not mean a risk-free investment.

The Fund is in Category 3 because of the low range and frequency of price movements (volatility) of the underlying investments referenced by the Fund.

The following are additional risks not covered by the risk and reward category.

The Fund will attempt to replicate the performance of the Index less costs, but your investment is not expected to match the performance of the Index precisely. Exceptional circumstances may arise, such as, but not limited to, disruptive market conditions, additional costs/taxes or extremely volatile markets, which may cause the Fund's performance to be substantially different from the performance of the Index.

DWS entities and related companies may act in several roles in relation to the Fund such as distributor, derivative counterparty, investment manager and management company which may involve conflicts of interest.

The Fund is not guaranteed and your investment is at risk. The value of your investment may go down as well as up.

The Fund may invest in bonds which are exposed to credit risk and interest rate risk. Credit risk means that there is a risk that the bond issuer may be unable to pay interest or repay the bond principal, resulting in your investment suffering a loss. Interest rate risk means that if interest rates rise, typically the value of the bond will fall, which could also affect the value of your investment.

The Fund may use derivatives to i) try to manage its investments more efficiently; and ii) try to reduce movements in currency exchange rates between the currency of the Fund's assets and the currency of the Fund's shares. This may not always be successful and may result in greater fluctuations in the value of the Fund. This may negatively affect the value of the Fund and your investment.

More information in relation to risks in general may be found in the "Risk Factors" section of the prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
This is the maximum that might be taken out of your money before it is invested (entry charge) and before the proceeds of your investment are paid out (exit charge).	
Charges taken from the Fund over a year	
Ongoing charges	0.16%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

Secondary market investors (those who buy or sell shares on a stock exchange) may be charged certain fees by their stock broker. These charges, if any, can be obtained from such stock broker. Authorised participants dealing directly with the Fund will pay the transaction costs related to their subscriptions and redemptions.

The ongoing charges figure shown here is an estimate of the charges as there is insufficient historical data. It excludes portfolio transaction costs and performance fees, if any. The Fund's annual report for each financial year will include detail on the exact charges made.

More detailed charges information may be found in the "Fees and Expenses" section of the prospectus.

To the extent the Fund undertakes securities lending to reduce costs, the Fund will ultimately be allocated 70% of the associated revenue generated, Deutsche Asset Management (UK) Limited, as Sub-Portfolio Manager, will be allocated 15%, and Deutsche Bank AG, as securities lending agent, will be allocated 15%. To facilitate this, the Fund will initially receive 85% of the associated revenue generated from which Deutsche Asset Management (UK) Limited will receive its allocation. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.

Past Performance

Please be aware that past performance is not a reliable indicator of future results.

The fees for the ongoing Fund charges are included in the calculation of past performance. The entry/exit fees are excluded from the calculation of past performance.

The Fund was launched in 2015 and the share class was launched in 2015.

Past performance has been calculated in USD.
