Schroder Global Recovery Fund

a sub-fund of Schroder Investment Fund Company

Class L Accumulation GBP (GB00BYRJXP30)

This fund is managed by Schroder Unit Trusts Limited, which is a member of the Schroders Group.

Objectives and Investment Policy

Objectives

The fund aims to provide capital growth by investing in the equities of companies worldwide which are considered to be undervalued relative to their long term earnings potential.

Investment Policy

The fund is actively managed and invests at least 80% of its assets in equities of companies worldwide that have suffered a set back in either share price or profitability, but where long term prospects are believed to be good.

The fund applies a disciplined value investment approach, seeking to invest in a select portfolio of companies that the Investment Manager believes are significantly undervalued relative to their long-term earnings potential.

The fund may also invest directly or indirectly in other securities (including in other asset classes), countries, regions, industries or currencies, collective investment

schemes (including Schroder funds), warrants and money market instruments, and hold cash.

The fund may use derivative instruments for investment purposes as well as for efficient portfolio management.

Benchmark

The fund does not have a target benchmark. The fund's performance should be compared against the MSCI World (Net Total Return) index and the Investment Association Global Equity Income sector average return.

Dealing Frequency

You may redeem your investment upon demand. This fund deals daily.

Distribution Policy

This share class accumulates income received from the fund's investments, meaning it is kept in the fund and its value is reflected in the price of the share class.

Risk and Reward Profile

The risk and reward indicator

The risk category was calculated using simulated performance data and may not be a reliable indicator of the fund's future risk profile.

The fund's risk category is not guaranteed to remain fixed and may change over time.

A fund in the lowest category does not mean a risk-free investment.

The fund is in this category because it can take higher risks in search of higher rewards and its price may rise and fall accordingly.

Risk factors

The following risks may affect fund performance.

China country risk: Changes in China's political, legal, economic or tax policies could cause losses or higher costs for the fund.

Concentration risk: The fund may be concentrated in a limited number of geographical regions, industry sectors, markets and/or individual positions. This may result in large changes in the value of the fund, both up or down, which may adversely impact the performance of the fund.

Counterparty risk: The counterparty to a derivative or other contractual agreement or synthetic financial product could

become unable to honour its commitments to the fund, potentially creating a partial or total loss for the fund.

Currency risk: The fund can be exposed to different currencies. Changes in foreign exchange rates could create losses.

Derivatives risk: A derivative may not perform as expected, and may create losses greater than the cost of the derivative.

Emerging markets & frontier risk: Emerging markets, and especially frontier markets, generally carry greater political, legal, counterparty and operational risk.

Equity risk: Equity prices fluctuate daily, based on many factors including general, economic, industry or company news.

Leverage risk: The fund uses derivatives for leverage, which makes it more sensitive to certain market or interest rate movements and may cause above-average volatility and risk of loss.

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares.

Operational risk: Failures at service providers could lead to disruptions of fund operations or losses.

Performance risk: Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro economic environment, investment objectives may become more difficult to achieve.

Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Stock Connect risk: The fund may be investing in China "A" shares via the Shanghai-Hong Kong Stock Connect and

Shenzhen-Hong Kong Stock Connect which may involve clearing and settlement, regulatory, operational and counterparty risks.

Charges

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
This is the maximum that might be taken out of your money before it is invested.	
Charges taken from the fund over a year	
Ongoing Charge	0.89%
Charges taken from the fund under certain specific conditions	
Performance fee:	None

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures and in some cases you might pay less. You can find out the actual entry and exit charges from your financial advisor.

The ongoing charges figure is based on the last year's expenses for the year ending August 2018 and may vary from year to year.

Please see the prospectus for more details about the charges.

Past Performance

Past performance is not a guide to future performance and may not be repeated. The value of investments may go down as well as up and you may not get back the amount you originally invested.

The chart shows performance in British pound after the ongoing charges and the portfolio transaction costs have been paid.

The fund was launched on 30 October 2015.
